

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

PREFACE.

Shortly after the arrival of the author in the Philippines he, in common with many others, felt the need of a work upon the Tagalog language in English, and began to prepare this compendium, working upon it from time to time as other military duties permitted, and, upon being ordered to duty in Washington for the purpose of having better facilities for the completion of the work, has been enabled to bring it to such completion, under the direction of Maj. W. D. Beach, Fifteenth Cavalry, chief of the Second Division, General Staff.

As the Tagalog, belonging to a very different family of languages from those with which Americans are familiar, has extremely dissimilar characteristics from English or any Aryan tongue, the writer has devised type scheme, presented in the folder herewith, by which the salient points of difference may be seen at a glance and vividly retained in the memory,

thus enabling the student to use correct and intelligible Tagalog

Supplemented by that constant practice necessary for the ear, it is believed that the copious index to this work, together with the type scheme, selected vocabularies, and plain nontechnical (as far as possible) explanations of the grammatical structure of Tagalog, will prove to be of value to those whose duty or inclination may lead them to consult this book. Such, at

least, is the hope of the writer.

The Tagalog language is easily pronounced, regular in its forms, and although its structure is complex, yet when once grasped it is so plain that it is not only clearly comprehended, but is a key to all the Malayan tongues, especially to those of the Philippines. It is an idiom which builds up its sentences and parts of speech from roots by means of particles which are prefixed, infixed, or suffixed to the roots. Several of these particles may be combined with the same root, each having its share in the modification of the inherent idea of the root.

Attention is also invited to the great use of the "definite" in Tagalog,

the so-called "passive" of the Spanish writers upon this subject.

The index, which has been made very full and copious, should be consulted, as every probable combination of particles has been noted, as well as Tagalog roots and English words occurring in the work. For example, every word preceded by the compound particle *ipinag* has been listed, thus

enabling the root to be found at once, and so on in like manner.

The writer desires to express his appreciation for assistance received from the military authorities both in the Philippine Islands and the United States, from many of his brother officers, and from Profs. Friedrich Hirth, of Columbia; E. W. Hopkins, of Yale (secretary of the American Oriental Society); Paul Haupt and F. W. Blake, of Johns Hopkins; Otis T. Mason of the Smithsonian Institution, and the late John W. Huett, of Luther College, Illinois. Valuable suggestions were also received from Messrs. Pedro Serrano Laktaw, author of a Tagalog-Spanish dictionary; Luis Torres, and Vicente Albert, all of Manila.

A HANDBOOK AND GRAMMAR OF THE TAGALOG LANGUAGE.

BIBLIOGRAPHY OF TAGALOG.

BOOKS CONSULTED IN THE PREPARATION OF THIS WORK.

It is scarcely necessary to mention that authorities upon Tagalog have not been very plentiful, even with the great revival of interest in the Malayo-Polynesian languages which has taken place within the last few years. The number of works, old and new, large and small, upon this subject, or bearing upon it, is very close to forty, and many of these are of little value or are obsolete. The number of reprints, however, brings the aggregate up to about one hundred, but this has no bearing upon the material available for study.

The isolation of the Philippine Islands under the Spanish régime also contributed to the neglect of the Philippine languages, and it seems almost as if Spanish and foreign workers in this field studiously avoided consulting one another's researches, or else were ignorant of them. In the review of books written upon Tagalog, or containing notices of it, works written to teach Spanish to the Tagalogs, novels—generally romances of the type current in the middle ages in Europe—lives of saints, and miscellaneous works, which make up what may be called the Tagalog literature, have been omitted. The total number of works in Tagalog may be estimated at from four to five hundred, and very few can be said to have a literary

The energy of those who are able to write Tagalog well has mainly been absorbed in newspaper work, and no great work has as yet appeared in the

It can scarcely be doubted that if some of the great works of the world were translated into Tagalog and placed where they would be accessible to the common people, who do not speak or read Spanish, and are almost too old to learn English well, that the results would be of great and immediate

importance in the mental development of the race.

The honor of the first written treatise upon the Tagalog language probably belongs to the Friar Agustín de Alburquerque, who arrived at Manila ably belongs to the Friar Agustin de Alburquerque, who arrived at Manila from Nueva España (Mexico) in 1571, and after three years' residence in Taal, Balayan, and other parts of Batangas, became Prior of Tondo in 1575, holding the position until his death in 1580. This treatise has never been published, and the assertion is opposed by the Franciscan order, which claims the credit for the first work upon this subject. (See Vol. II, p. 563, "Estadismo de las Islas Filipinas, de Zúñiga," edited by W. E. Retana, Madrid, 1893; "La Política de España en Filipinas," año VI, núm. 134; and the "Catálogo Bio-Bibliográfico de los Religiosos Agustinos," Pérez, Manila 1901; Manila, 1901.)

To the Franciscan friar Juan de Plasencia, or Portocarrero, who came to the Philippines with the first mission of his order in 1577, is attributed an "Arte y Diccionario" of Tagalog in 1581, which has remained in manuscript. (See "Catálogo Biográfico de los Religiosos Franciscanos," Moya, Manila, 1880.)

However, the most important point is when the first printed work up the language was published, and this was undoubtedly in the year 16 when an "Arte y Reglas de la Lengua Tagala," by Friar Francisco de f José of the Dominican order, and who arrived in the Philippines in 16 was printed in the "Partido de Bataán," probably by Tomás Pinpír Tagalog. The book is a quarto of 327 pages of rice paper. One ca exists in the Museo-Biblioteca de Ultramar at Madrid. Other edition this book were printed at Manila in 1752 and 1832. (See Retana's edit of Zúñiga, pp. 101-105.)

This work was followed in 1612 by the "Vocabulario de la Len Tagala," by Friar Pedro de San Buenaventura of the Franciscan or who was in charge of parishes in the present province of La Laguna, whose work was printed in Pila by Tomás Pinpín and Domingo Lo Tagalogs. The book is described by Medina in his "La Imprenta Manila," Santiago de Chile, 1896, and a facsimile of the title-page is giv

The Franciscan friar Juan de Oliver, who died in the Camarines 1597, is said to have written a treatise upon the Tagalog, but his we seems to have been limited to correcting and adding to the "Arte y Dio nario" of Plasencia. Another of the same order, Francisco de San Anoio, who was in charge of Baler from 1611 to 1616, and from that ti until his death in 1624 resided in the present La Laguna, wrote "Arte" and a Tagalog-Spanish vocabulary, which works existed in mascript in 1745, the author being known also as "Orejita." (See (Biog. Rel. Fran., Manila, 1880; and the preface to the "Arte" of Totans

The Augustinian friar Juan de Quiñones, who died in Manila in It also left a work upon the Tagalog, which is said by Beristaín to have b printed in Manila in 1581. (See Beristaín, Biblioteca Hispano-Americ Setentrional, Amecameca, México, 1883–1887, 2d ed.) The first edit was printed in Mexico City in 1816. (See Vol. II, p. 464.) The maseems to be doubtful.

The Franciscan friar Gerónimo Monte y Escamilla, who died in 1t is said to have left in manuscript an "Arte" and "Diccionario" in Talog, but the work, if extant, is in the archives of his order. (See (Rel. Fran., Manila, 1880, p. 60.) A similar manuscript is said to h been written by Francisco de San Antonio, of the same order, who can to the Philippines in 1606 and died at Pila, La Laguna, in 1624. (See D. 139.)

p. 139.)

The third printed work upon Tagalog was the "Arte de Idioma Talog," by the Franciscan Agustín de la Magdalena, who arrived in islands in 1665 and lived in Tayabas and Laguna for some years. Retuing to Mexico he there gave his manuscripts to the press in 1679, and 1684 returned to Manila, dying in Santa Cruz de La Laguna in 1689. (La Imprenta en México, Medina, Sevilla, 1893, No. 1784; and Cat. J Fran., Manila, 1880, p. 292.)

The Dominican friar Teodoro (Quiros) de la Madre de Díos, who ce to the islands in 1627 and died in 1662, has been credited with an "Ar of Tagalog by some bibliographers of Philippine literature, but Mecmarks such a work as doubtful, as far as the printing is concerned.

The eighteenth century witnessed a revival of interest in the languand in 1703 two works, both of which have been reprinted, were prin. The first was the "Compendio de la Arte de la lengua Tagala," prir in Manila. This excellent treatise was reprinted at Sampáloc in 1787, in Manila proper in 1879. Both the early editions are now rare. author was the Augustinian friar Gaspar de San Agustín, who came to Philippines in 1668, and died in Manila in 1724. He is better known the author of the work "Conquistas de las Islas Filipinas," Part I, Mrid, 1698; Part II, Valladolid, 1890. The third edition, however, ret many obsolete words.

The second work was a "Vocabulario," or dictionary of the Taga written by the Franciscan friar Domingo de los Santos, who came to Philippines in 1665, and after administering parishes mainly in La Lagr

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF STAFF,
Washington, August 30, 1905.

Sir: I have the honor to transmit herewith the manuscript of a work entitled "A Handbook and Grammar of the Tagalog Language," consisting of 399 pages of typewriting, which I estimate will make about 200 pages in print. I would suggest that the work be bound in a substantial waterproof cover, similar to that used for the latest edition of the "Soldier's Handbook," and that the size be 8 by 5½ inches, or approximately so.

I would also invite attention to the folders accompanying. * * * It

I would also invite attention to the folders accompanying. * * * It would be best to have the left-hand edge of the folders begin at the outside margin of the printed page, so that when extended the student could read the corresponding text to the synopsis at the same time and not be obliged to turn the pages back and forth.

Very respectfully,

WILLIAM E. W. MACKINLAY, First Lieutenant, First Cavalry.

died in Majayjay in 1695. His work was printed in the town of Tayabas in 1703, and but two copies seem to be known. One is from the Marsden collection, and is in the library of King's College, London, and the other in the archives of the Franciscan order. Some leaves of a manuscript "Arte" by the same author are also preserved in the archives. This dictionary was reprinted in Sampáloc in 1794 and in Manila in 1835. It is now obsolete. (See Cat. Rel. Fran., Manila, 1880, p. 294; Biblioteca Filipiua, Retana, Madrid, 1898 [referred to hereafter as R.]; Nos. 77 and 148; ld., Nos. 26 note, 66 note, 66 and 594; and Cat. Bio.-Bib. Rel. Agustinos, Manila, 1901, pp. 133-134.)

The next work upon this subject was the "Arte y Reglas de la lengua Tagala," by the Augustinian friar Tomás Ortíz, printed at the convento of Sampáloc in 1740. The author came to the Philippines in 1690, was a missionary in China until about 1712, and died in Manila in 1742. (See

Medina, La Imprenta en Manila and Cat. Rel. Agustinos, p. 169.)
In 1742 the Franciscan friar Melchor Oyanguren de Santa Inés, who had lived in the Philippines, mainly at Los Baños and Sariaya, from 1717 to 1736, gave a work to the press in Mexico entitled "Tagalysmo." This interesting book, which has never been reprinted, compares with Tagalog the Mandarin dialect of Chinese, Hebrew, and Greek, the Tagalog being reduced as far as possible to a Latin basis. (R., 39.)

In 1745 the work of the Franciscan Sebastián de Totanés was printed at Sampáloc. This valuable treatise, entitled "Arte de la lengua Tagala y Manual Tagálog," was reprinted at Sampáloc in 1796, at Manila in 1850, and in Binondo (Manila) in 1865. (R., 42, 79, 202, and 329.) The author came to the Philippines in 1717 and remained twenty-nine years in the islands. During his residence at Lilio and Pagsanhan, La Laguna, from 1732 to 1738, he wrote the foregoing book. He died in Madrid in 1748, having left the Philippines in 1748. (Cat. Rel. Fran., Manila, 1880, pp. 390-391.)

In 1754 the great "Vocabulario," or dictionary, of the Tagalog, explained in Spanish, was printed at Manila by the Jesuits. The main authors were Juan de Noceda, S. J., and Pedro de San Lucar, S. J. A second edition, with a Spanish-Tagalog appendix, was printed in Valladolid in 1832, which is now very rare, nearly all copies having been lost by shipwreck en route to the islands. There is a copy in the Library of Congress. Another edition, with additions, was printed by the Augustinian order at Manila in 1860. This work, although many words are obsolete, is the standard on Tagalog as yet. It is also becoming rare. (R., 48, 136, and 268.)

to the Islands. There is a copy in the Library of Congress. Another edition, with additions, was printed by the Augustinian order at Manila in 1860. This work, although many words are obsolete, is the standard on Tagalog as yet. It is also becoming rare. (R., 48, 136, and 268.) The next work containing a notice of Tagalog is in English. In Johann Reinhold Forster's "Observations made during a Voyage round the World" (London, 1778; German translation by his son, Georg Forster, Berlin, 1783) a list of 47 English words is given, with their equivalents in Tagalog, Pampango, Malay, and several Polynesian dialects. From some rare words the Tagalog would appear to have been taken from Noceda and San Lucar. Forster was born in Germany in 1729, a descendant of the Forester family of Scotland, and accompanied Captain Cook in his second voyage to the South Sea (1772–1775). After his return he became professor at Halle, Germany, where he died in 1798. His book is especially valuable concerning the Polynesian races and islands.

A few years later the German naturalist Peter Simon Pallas (born 1741, died 1811), who had become professor of natural history in the Imperial Academy of Sciences at St. Petersburg in 1768, published there in 1787–1789 the work known as the "Vocabularium Catharine," from its patroness, Catharine II. Written in Russian, it gives the corresponding word for nearly 200 terms in 200 languages. In this list Pampango is No. 186 and Tagalog No. 187. The source is not given, but that for the Tagalog is evidently the same as that of Forster. The Latin equivalent for the Russian words is given in the preface. The full title of the work is "Linguarum totius Orbis Vocabularia comparativa." It is in two quarto volumes.

At the same time the Spanish author Lorenzo Hervas y Panduro (born 1735, died 1809), of the Society of Jesus, published two works bearing upon Tagalog to a slight extent, but of importance as inspiring other work upon the same line. The first was his "Aritmética," published in Cesena, Italy, in 1785, and the second, his "Vocabolario Poliglotto," published at the same place in 1787, both in Italian. In the latter he gives specimens of the language of 1593, of 1604, and his own time. The Spanish edition, printed at Madrid in two volumes in 1801, has his observations upon Tagalog in the second volume.

In 1803 Prof. Franz Carl Alter, librarian of the Imperial and Royal University of Vienna, published a work of 60 pages upon the Tagalog, with the title "Ueber die tagalische Sprache." This work seems based upon a manuscript vocabulary from the library of Count Wrbna at Vienna, supplemented by words from Pallas and the works of the Abbé Hervas. The latter seems to have corresponded with Alter, who speaks of Hervas in the preface to his book, and also of Miss Knight, of England, probably a sister of Thomas Payne Knight, the numismatist, as being interested in his researches.

A work which is yet of value to the student is that of Johann Christoph Adelung (born in Germany in 1731, died in Dresden, Saxony, 1806), entitled "Mithridates, oder Allgemeine Sprachenkunde." In the first volume, which appeared at Berlin in 1806, on pages 127 and 128, two versions of the Lord's Prayer are given—one of 1593 and the other of current form—with an explanation of the grammatical forms as deduced from the words. The author, who gives specimens from over 500 languages, is best remembered for his great work in German philology, and at the time of his death was principal librarian of the Elector of Saxony, at Dresden.

his death was principal librarian of the Elector of Saxony, at Dresden.

Adriano Balbi (born in Venice in 1782, died there 1848) published an
"Atlas Ethnographique du Globe" at Paris in 1826. (See Table No. 364

and pp. 246 to 249, for remarks upon Tagalog.)

The catalogue of William Marsden, the eminent orientalist (born in England in 1754, died there 1836), published at London in 1827, contains mention of some manuscript "Artes" of Tagalog not known to have been printed. One is an "Arte" by a Dominican friar, dated 1736, and the other a "Vocabulario" by the Dominican Miguel Ruiz, dated 1580. This, however, must be an error, as the Dominicans did not arrive in the Philippines until 1587. Miguel Ruiz was one of their early friars, but little seems to have been recorded about him. In Marsden's Miscellaneous Works (London, 1834), page 94, are also some observations upon Tagalog.

Works (London, 1834), page 94, are also some observations upon Tagalog. To the genius of the German author Wilhelm von Humboldt the world is indebted for his magnificent work upon the Malayo-Polynesian languages, which was published by the Royal Academy of Sciences at Berlin, in three volumes, in 1838, under the title "Ueber die Kawi-Sprache auf der Insel Java." His dissertation upon the Tagalog verbal system and formations in Volume II, pages 347 to 396, clearly establishes the fact that the Tagalog and allied tongues of the Philippines have preserved the verbal modifying particles to a greater extent than any other members of this great linguistic family, and on page 288 of the same volume he goes so far as to say that at first view the student of Tagalog seems to have come into a wholly new system. This noted philologist, who was born in 1767 and died in 1835, has evidently taken the greater part of his material upon the Tagalog from the second (1796) edition of Totanés, and hence lacked the advantage of having been upon the ground.

The Augustinian friar Manuel Buzeta, better known as the author of the "Geographical Dictionary" or Gazetteer of the Philippines (in cooperation with Bravo), published a Tagalog grammar at Madrid in 1850. (R., 199.) The author, whose name is spelled "Buceta" in the Cat. Rel. Agustinos, came to the Philippines in 1827, where he was in charge of the church at Guiguinto in 1832 and of Malate in 1848. He returned to Spain in 1849, and resided at Madrid until 1854, in which year he left the order and

returned to secular life.

The work of Sinibaldo de Mas upon the islands, published at Madrid in two volumes in 1843, contains a short comparative vocabulary of Tagalog, Visayan, Ilocano, Ibanag (Cagayan), and Malay. (R., 180.)

In 1854 the "Tagalog-Spanish Dictionary" of Rosalio Serrano, a Tagalog of Bulacan Province, was printed at Manila, and second and third editions have appeared, the third being printed in Binondo (Manila) in 1869. A Spanish-Tagalog dictionary by the same author was printed in Manila in 1872. (R., 227, 376, 426.)

In 1855 Carlos Cuarterón, a priest who had also been a pilot in the Southern Islands, published a work at Rome entitled "Spegazione e traduzione" at the and of which there is a vocabulary of Italian Malay

duzione," at the end of which there is a vocabulary of Italian, Malay,

Tagalog, and Joloano. (R., 229.)

In 1872 the grammar of Joaquín de Coria (Gil y Montes de Santo Domingo) was published at Madrid, where the author had accepted the position of professor of Tagalog in the Central University. The work shows the careful study of the author, who came to the islands in 1831 and resided in the Tagalog region until his return to Spain in 1866. On account of his accepting the chair of Tagalog against the wish of the prelate of his order, he was dropped from its rolls; but, unfortunately, the plan of Minister Moret did not succeed, and the position to which he was elected never became active. The author was born in 1815 and entered the Franciscan Order in 1830. (R., 411; also Cat. Biog. Rel. Fran., p. 656.)

The same year, 1872, appeared the popular Spanish-Tagalog "Lessons upon the Grammar" of Bishop José Hevia Campomanes, bishop of Nueva

Segovia (Vigan). A second edition appeared in 1877, the third in 1883, the fourth in 1888, and the sixth in 1901. All the editions were printed at Manila and are alike, no corrections or additions having been made.

(R., 1133.)

Here should be mentioned the interesting work of V. M. de Abella, the "Vade-mecum Filipino," a manual of Spanish-Tagalog dialogues. It contains a vocabulary of Manila local words and phrases. The first edition was published in 1868 (T. H. Pardo de Tavera, Bib. Fil., No. 9), and other editions were published in 1869 and 1871, and the ninth had been reached 1873. (R., 2524.) All editions were printed in Manila.

The most practical of all Tagalog-Spanish grammars appeared in Manila

in 1878, the work of the Recoleto friar Toribio Minguella. Interlinear translations, simplicity of arrangement, and clearness of explanation make this little book of great value, and many of its suggestions and ideas have

been very useful in the preparation of this present work.

In 1880 Prof. H. Kern, a Javan-born Hollander, made a valuable contribution to philology by his list of words in Tagalog which are derived from the Sanskrit. This article, which appeared in the "Bijdragen tot de Taal-, Land- en Volkenkunde van Nederland-Indië" at The Hague, volg. (series) 4, deel (volume) 4, pages 535 to 564, shows the large number of such words and their importance in expressing some most necessary ideas of civilization. This field was further explored by T. H. Pardo de Tavera, who published a pamphlet of 55 pages at Paris in 1887, in which the Sanskrit words which have passed into Pampango are also noted. (R., 1066.) Kern remarks in his article that the scarcity of Sanskrit words in the dialects of northern Celebes indicates that the Tagalog received this element directly from Cambodia and Sumatra, and not by way of Celebes. an interesting suggestion, which might lead to something if studied upon. Dr. F. R. Blake, teacher of Tagalog and Visayan at Johns Hopkins University, Baltimore, Md., also read an article on "Sanskrit loan-words in Tagalog" at the April, 1903, meeting of the American Oriental Society, at Baltimore, Md. Doctor Blake has also written articles upon "Analogies between Semitic and Tagalog" and the "Differences between Tagalog and Bissyan."

In 1999 appeared the second edition of a Second Discount Tagalog and Bissyan."

In 1882 appeared the second edition of a Spanish-Tagalog and Pampango vocabulary by E. Fernández, printed at Manila. This was followed in

1883 by his Tagalog-Spanish vocabulary, both of which are very useful books. (P. T., 1061, and R., 756.)

The valuable "rapport" of Dr. Joseph Montano, Paris, 1885, to the French minister of public instruction, contains several Philippine vocabulations of the property o laries, some of them of little known languages, and also quite an analysis (R., 885.) of the Tagalog.

Under the pseudonym of Julius Miles, an unknown author published a small Tagalog Spanish grammar and phrase book at Barcelona, Spain, in

In 1887 (R., 1054.)

In 1889 Friar Toribio Minguella, Recoleto, published a work in Madrid upon the unity of the human race as proved by philology. In this work he makes some comparisons between Semitic and Tagalog.

The same year Dr. Pardo de Tavera published his pamphlet upon the origin of the names of the Tagalog numerals, at Manila. W. G. Seiple, of Johns Hopkins University, also published an article upon the Tagalog numerals in the Johns Hopkins University Circular, No. 163, June, 1903, Baltimore, Md.

In 1889 also appeared the "Spanish-Tagalog Dictionary" of Pedro Serrano Laktaw, son of Rosalio Serrano, and in 1903 director of the Spanish paper, El Pueblo, of Manila. It is understood that the author is now working

upon a Tagalog-English dictionary. (R., 1260.)
In 1890 a most valuable little work was published in Manila, under the title "Colección de Refranes, Frases y Modismos Tagalos," translated and explained in Spanish by the Franciscan Friars Gregorio Martín and Mariano Martínez Cuadrado, and edited by the Friar Miguel Lucio y Bustamente. The first came to the Philippines in 1874, the second in 1875, and the editor in 1860. All administered parishes mainly in La Laguna Province, Friar Martínez also serving for many years at Binangonan de Lampon, on the Pacific. This collection comprises 879 proverbs, phrases, and idiomatic expressions as used in the vicinity of Tanay and Pililla, where the authors resided, and embraces but a part of the wealth of the language in this regard. Many of these expressions, marked "T. P." (Tagalog proverbs) have been quoted in the explanation of the language. (R., 1318.)

In 1893 Dr. Ferd. Blumentritt, of Leitmeritz, Bohemia, published a translation of a sketch of Tagalog orthography by Doctor Rizal, at The Hague, under the title "Die Transcription des Tagalog," von Dr. José Rizal.

The advent of the United States forces at Manile and the occupation of

The advent of the United States forces at Manila and the occupation of the Tagalog region led to several small pamphlets being issued with the English, Spanish, and Tagalog in parallel columns. One of these was written by Capt. John Bordman, jr., Twenty-sixth U. S. Volunteer

In 1902 Constantino Lendoyro, a Spanish gentleman of more than twenty years' residence in the Philippines, published his work, entitled "The Tagalog Language," at Manila. It is a very good book, but is full of typographical errors, and in many places the English is not idiomatic. The author deserves much credit for his labor, and a corrected edition would be of great value. At any rate, he is entitled to commendation for having written, in a foreign language, a work upon the Tagalog which shows his thorough knowledge of the Philippine tongue.

In 1902 R. Brandstetter issued a work upon the Tagalog and Malagasy languages at Lucerne, which is of interest as showing the resemblance

between these two languages spoken at such distant points.

In 1903 the "English-Tagalog Pocket Dictionary," of P. D. Neilson, was published at Manila, and, while merely giving the Tagalog equivalent for the English word, is of considerable value. The Tagalog-English part has also been published.

Mention should also be made of "Crawfurd's Grammar of the Malay Language," which has also a dictionary attached, London, 1852. Many valuable comparisons are made between Tagalog and other Malayan languages.

For a grammatical discussion of authority upon the Malayan languages

the student is referred to the "Grundriss der Sprachwissenschaft," of F. Müller, II. Band, II. Abtheilung, pages 87–160 (Vienna, 1887).

THE TAGALOG LANGUAGE.

The Tagalog is the most important of the many tongues and dialects of the Philippines, which seem to number well over threescore, a on account of its being the most widely understood, the most euphonious, and the most developed by contact with foreign idioms. It thus occupies a similar position to that held by Malay farther to the south, and to English in the world at large. Spoken by over a million and a half of the most energetic race in the islands, occupying the city of Manila, eight provinces surrounding the metropolis, and a number of outlying islands and districts beyond these limits, it is also generally understood by many far beyond its own territory, especially in seaport towns throughout the archipelago.

The language seems to be divided into a northern and a southern dialect, the former being spoken in Bulacan, Bataan, Nueva Ecija, Rizal, and Tarlac, and the latter occupying La Laguna, Batangas, Cavite, Tayabas, Marinduque, the coast of Mindoro, and part of Ambos Camarines. Each of these dialects is more or less split up, each town almost having local mannerisms by which the people of one neighborhood easily dintinguish a stranger. Yet the region above described is clearly the territory of one and the same language, which is different and distinguishable from the Pampangan language on the north and the Bicol on the south by the test

of intelligibility.

Philologically, Tagalog belongs to the Malayan branch of the great Malayo-Polynesian linguistic family, which extends from Hawaii to Madagascar and from Formosa to Easter Island west of Chile, including New Zealand, Tonga, and Samoa, as well as Borneo, Celebes, Java, Sumatra, the Malay Peninsula, and the Philippines, from east to west, a distance of

180°, or half the circumference of the earth.

Considering the rudimentary state of culture existing up to comparatively recent times of the majority of the peoples speaking the languages of this family, its unity is remarkable, and a thorough knowledge of one tongue is found to be of great utility in the acquirement of any other of the

great group, especially in the same branch.

Tagalog, together with other civilized tongues of the Philippines, such as Visayan, Pampangan, Ilocano and Bicol, has preserved the verbal system better than any other, and the basis for the comparative study of the family must be taken from the Philippine tongues and not from the more cultivated Malay, Kawi, or modern Javanese, all three of which have been profoundly affected by Sanskrit and to a lesser degree by Arabic, something as English has been affected by Latin and French elements.

The number of roots or primitive-idea words in Tagalog seems to be about 17,000, there being 16,842 words in the Noceda and Sanlucar dictionary of 1832, according to Crawfurd, the distinguished Malay scholar. ("Malay Grammar," p. cxiv.) Of these some 284 are derived from the Sanskrit, and are evidently borrowed through the Malay. Many of these are names for things unknown to the primitive Malayan peoples, but others are abstracts and various words, some of which would seem to have supplanted a primitive Malayan word. Thus in many cases American and Tagalog use words in their own languages which are from the same remote source in India, and coming around the earth east and west meet again in the Philippines. Such a word is pad, "foot," from the Sanskrit pada, which has descended into English "foot" and Spanish "pie." The origin of these words is marked after each in the handbook. The names of the chief workers in this field have been given in the list of books consulted.

The Philippine Bureau of Ethnology, however, has given out as a result of its researches, that the number of distinct tongues is not over 15 or 16, the larger number being made up by counting very similar dialects.

The Japanese language seems to have furnished no words to the Tagalog, although many Japanese came to the islands during the seventeenth century, owing to the expulsion of Japanese converts to Catholicism, who found a refuge in Manila and the adjoining provinces, mainly in Pampanga, where it is said many of them settled around Macabebe. It is thought that some Japanese expressions still exist in the Macabebe dialect

of the Pampangan language.

Notwithstanding a comparatively close contact with the Chinese for several centuries, and certainly antedating the Spanish conquest by many hundred years, very few words seem to have come into Tagalog from any of the numerous dialects of that Empire. The Chinese element in Tagalog seems limited to a few commercial terms, some household implements, and a few miscellaneous terms, some of which are confined in their use to Sangley or Chinese-Mestizo families. These words are noted wherever they occur in the handbook. Professor Hirth, the Chinese scholar, thinks that the first notices of the Philippines are to be found in the work of Chao Ju-kua, collector of customs of Chuan-chou, a city in Fo-Kien Province, between 1210 and 1240. In this work he speaks of the islands of Po-ni (Borneo), Ma-i (Mindoro? or Panay?), and of the Pi-Shō-ye of Taiwan (Formosa). This latter name sounds something like "Bisaya," the native name for Visaya. The book speaks also of the San-sū, or "Three Islands." Book 325 of the "History of the Ming Dynasty (1368-1643) of China," as abstracted by Groeneveldt, speaks of the Kings (Sultans) of Sulu as attacking Puni (Borneo) in 1368, and of the Kings (Sultans) of Sulu as attacking Puni (Borneo) in 1368, and of the Kings of Sulu, Paduka (Javanese "Lord") Pahala as dying while on a visit to the Emperor at Te Chou on the Grand Canal (Shantung Province). The Emperor then recognized his eldest son, Tumohan, as Sultan of Sulu, in 1417. The brother of Pahala, who was named Suli, made a visit to China in 1421, but a few years after this no more was heard from this Kingdom. From this and other extracts it would seem that the Chinese knew of the Mohammedan settlements at Manila and Tondo prior to the arrival of the Spaniards, and must have carried on a lucrative trade with them, otherwise the pirate Li-Ma-hong would not have made such a desperate attempt to take the city so soon after its foundation in 1571.

The Arabic words in Tagalog, which are hardly more than a dozen in number, evidently came in with the Mohammedan religion, and upon the extinction of that faith around the mouth of the Pasig, all but a few words fell into disuse. Mohammedanism could have hardly become established in the Tagalog region before 1450 to 1500, as it came very slowly from India or Arabia to Java, and thence by way of Borneo and Sulu to the Bay of Manila and the Pasig Valley. It had apparently not extended to the inland provinces, its farthest northern point appearing to have been Hagonoy. Arabic words which were adopted by the Spanish and thus brought

into Tagalog are not included in the above remarks.

Spanish, as a matter of course, has contributed a great number of words to Tagalog, many of which have been thoroughly naturalized. They are mainly religious, governmental, social, legal, and abstract terms, including also terms for foreign articles and luxuries. Some names for Mexican articles are not Spanish but Nahuatl or Aztec, owing to the intimate connection between Mexico and the Philippines for more than two centuries, and there are even some Arawak words from the tongue of Cuba, Haiti, and Puerto Rico among these.

English has as yet given but few words to Tagalog. Of these the newspapers use four, which seem to have no exact native or Spanish equivalents, viz: "Self-government," "high life," "sport," and "besbol," or baseball. The latter has been verbalized and taken into the language

bodily, while the others are still quoted.

The construction of Tagalog does not seem to have been influenced by any of the foregoing, but to have retained its Malayan structure.

THE PRONUNCIATION OF TAGALOG.

The most succinct statement upon the above subject is that given by Rev. W. A. Goodell, of the Methodist mission in the Philippines, as printed in Stuntz's "The Philippines and the Far East," page 483:

in Stuntz's "The Philippines and the Far Fast," page 485:

"II. The pronunciation of Tagalog is very simple, and there are no sounds to which the American vocal organs are not accustomed. The letter (sound) most difficult to get is 'ng,' which has exactly the sound which it has in the middle of the word 'ringing,' but which becomes difficult when at the beginning of a word, as in the word(s) 'nguni't,' one of the words (terms) translating the conjunction 'but,' and which often occurs at the beginning of a sentence.

"But although so simple in word pronunciation, Tagalog is extremely difficult in utterance, for one reason because of the great number of long words (compounds) it contains, and for another and more important still, because of the rhythmic movement of the language, a quality that can not be described and a characteristic for which no rules whatever can be given, but which is entirely as much a part of the Tagalog language as are its

words themselves.'

The "rhythmic movement" spoken of by the Rev. Mr. Goodell, who is an excellent speaker of Tagalog, is what may be called the "national accent," and, like the tones of Chinese and other allied tongues, can only

be acquired by long practice.

The vowels are really but three in number, although a, e, i, o, and u, with their Spanish values, are printed (ah, a, e, o, oo). Of these "e" and "i" are habitually confused, and "e" can hardly be said to exist in pure "O" and "u" are also confused, the tendency being to drop "againg. "O" and "u" are also confused, the tendency being to drop "o" and substitute "u" in many words, a process which has already taken effect in Pampangan. The diphthongs are ao (ow), au (aw), less nasal than ao, and ua (wa); but there are no triphthongs, as each vowel in such combinations preserves its own sound.

The native consonants, pronounced (except n_{Y}) as in English, are B, C (K), D, G (hard), H, L, M, N, NG, P, R, S, and T. The sound of F does not exist in Tagalog, and is replaced by P. V is also a foreign sound merging with B to the Tagalog ear. Z is pronounced like S, and is found only in Spanish words. The same is true of X, which is pronounced at the beginning of a word as H. W is beginning to be used in native papers as a seminormal place of initial us (we) and in so (sw). K is also used by warny vowel in place of initial ua (wa) and in ao (aw). K is also used by many in place of hard C and Q. Y is used as a part of the diphthong ay (ai), and also as an initial consonant.

The pronunciation and construction of the language will be more clearly understood by carefully studying the two versions of the Dominical Oration, or Lord's Prayer, given below with interlinear pronunciation and trans-

lation.

PREE TRANSLATION.

Once upon a time there was a rat who said to himself, because his liver was out of order: "I do not wish to remain here in this town of mine; I will go and ascend the mountains, looking for another town, where I can see some of my friends, some agreeable food for rats, and some good living." The rat went out, traveling daily, until arriving at the seashore it saw a giant clam (Tridacna), with slightly opened mouth. Quoth the rat: "What is this? Truly, I have not seen anything like this yet." Then the rat went into the mouth of the giant clam (taklobo) to look at the meat, but was caught (by it) until his head was cracked, and it was cut off at the neck.

ACCENTS.

From the foregoing examples it will be seen that there are three accents used in Tagalog, the acute ('), the grave ('), and the circumflex (^).

The acute accent may fall upon any syllable, but in Tagalog is generally to be found upon the last (ultima) or the next to the last syllable (penultima). The acute accent upon a word ending in a vowel indicates that the final vowel has an open, broad sound, and that the suffixed particles "an" and "in" prefix an "h" when joined to such words. Example: Magandá, "elegant;" kagandahan, "elegance;" bili, "trade, barter;" ang bilhin, "what bought." Words ending in a consonant take "an" or "in" only, even it bearing the acute accent, which is only written in such words when occurring upon the penultima or antepenultima. Example: Umitting, "to borrow;" magitting, "to lend;" magpititing, "to lend freely (or with good will);" kautangan, "debt;" paitting, "credit." In many cases the suffixing of "han" or "hin" draws the accent one syllable farther toward the end of the word. This also applies to "an" or "in." Example: Patán, "idea of killing or death;" kautatáyan, "death" (abstract noun); ang kautatayán, "the place of death." The acute accent is not written with words ending in a vowel, unless the accent is upon the final vowel. It may be taken as a rule that words unmarked with an accent, if ending with a consonant, take the accent upon the ultima, words ending with n and s being excepted. Words ending with an unaccented vowel or "n" or "s" generally take the accent upon the penultima.

This is also the rule in Spanish.

The grave accent in Tagalog merely marks those words ending in a vowel, which take "an" or "in," instead of "han" or "hin." The stress is not laid upon the syllable marked with the grave accent, but upon the one preceding. Example: Batà, "child" (in general), pronounced "bahta," the final vowel having an obscure sound; kabalaan, "childishness" (pro. kah-bah-tah-an). The grave accent is not used with words

ending in a consonant.

The circumflex accent is only used upon the final vowel of those words ending with an abrupt, obscure vowel sound, upon which the stress of the voice is placed. It admits only "an" or "in" as a suffix. Example: Dumalità, "to suffer, to endure;" kadalitaan, "suffering, endurance;"

tumuro, "to signal;" katuroan, "signaling;" ang tinuroan, "person or sta-

tion signaled to.'

Practice is the essential requirement to become familiar with the accent, which is most important in Tagalog, as many words are only distinguished by the accent, although differing totally in meaning. Example: Aso, by the accent, although differing totally in meaning. Example: Asó, "smoke;" áso, "dog;" gátus, "milk;" gatás, "path, trail;" sumilang, "to rise" (as the sun); sumilang (ultima), "to pass between;" bumasa, "to read;" bumasa, "to moisten."

As has been already mentioned there are some 17,000 "roots" in the Tagalog language, many of which are nouns, pronouns, adverbs, and prepositions, etc., in themselves. Verbs are generally formed by the use of certain particles, of which there are some 17, of which all except one (um) have a definite and indefinite form. Together with the noun and adjective forming particles, of which there are several, the possible number of intelligible Tagalog words can not be far from 50,000 to 60,000, quite sufficient to express any nontechnical ideas of any language whatsoever. Yet with all this there are some curious facts about the language and its vocabulary. Many general terms can not be expressed in one word, but the modifications of a general act have many words to express them, some-times far more than exist in English or Spanish. A similar parallel is offered by the lack of a verb in early English to express the idea of motion in general, although Anglo-Saxon had many words for different kinds of motion, which are used daily by all English-speaking people. Upon this point Brian H. Hodgson, the noted oriental scholar, says, in his work upon the aborigines of India, published at Calcutta in 1847, page iii: "" * " Home-bred words are all very particular, and proportionably numerous; while general terms, if more conveniently few, are less characteristic and very apt to be of exotic (foreign) origin; take the English general term 'to move;' it is Latin and one; but of the numerous sorts of special motion (to hop, to skip, to jump, to tumble down, to get up, to walk, to fly, to creep, to run, to gallop, to trot), all are 'genuine Saxon, by the soul of Hengist.'" This idea will be more fully explained under "The verb." In addition to such particularizing words, there are also many synonyms or words meaning the same thing in Tagalog, many of which are local or provincial and are not heard in the same locality. For this reason Crawfurd's remarks upon Tagalog and Visayan, as expressed in his "Malay Grammar," London, 1852, page cxix, are still pertinent.

He eays:

"The languages of the Philippine Islands may be described, not as copithe state of society in which the natives of the Philippines were formed, ideas are considered more in concrete than in abstract, and by an importance being attached to trivial matters a profusion springs up which, in a more advanced state of society, are considered unworthy of retention, or which, if retained, would only be productive of perplexity and distraction. * * * In Tagalog there are 12 names for the cocoanut, including its different varieties and conditions as to maturity and preparation for use. * * * In the same language there are 11 words to express the verb 'to boil' (with variations), and 75 (really about 50) for the verb 'to go.'"

It may be added that the verb "to carry" with its variations has some eighty words to express all combinations in Tagalog, and there are many other verbs which have been particularized in this manner, which will be

more fully set forth in the appropriate place.

The main object of this work is to facilitate the acquisition of an elementary knowledge of the Tagalog language. It should be borne in mind that Tagalog is not constructed on English or Spanish lines, either in grammar or syntax. The universal tendency upon using a new language is to translate one's own language word for word, or phrase for phrase, into the foreign one. The native may understand, but the result is not elegant. No language can be learned entirely from books, and to supplement the special needs of each person constant practice in speaking with educated or

intelligent Tagalogs is necessary. Even with a considerable vocabulary, the American will find difficulty in conveying just what he wants to say in Tagalog, unless he masters the idioms and peculiarities of the language. This will not be a very easy task, but, once mastered, the key is held to all the Philippine languages, and it might be said to all the Malayan languages of the East Indies.

To those who have had to depend upon ignorant or untrustworthy interpreters, a knowledge of the local tongue will be felt to be indispensable, and this knowledge will also be a protection to the people ignorant of Spanish or English who in many cases have been so unmercifully fleeced

by unscrupulous interpreters.

This work has been divided into sections, and the use of technical terms has been avoided to as great an extent as possible. Where cases, etc., have been used, it has not been because such exist in the Tagalog language, but as an aid to the memory of those who are more or less familiar with

Latin, French, Spanish, German, and other European tongues.

The essential peculiarities of Tagalog are its "roots," which may be made into nouns by the use of the article, into adjectives by other prefixed particles, into adverbs in other cases, and finally into verbs by the use of particles, into acceptable in the case, and the great use of the definite, which is grammatically a "passive," and is so treated by all grammarians who have been consulted, although many times this "passive" inust be translated into English by an "active" verb. For this reason the terms "definite" and "indefinite" have been used in the present work. This point is more fully explained under the verb.

Examples have been given wherever possible, and the vocabulary given has largely been founded on actual experience. It is impossible to invent a series of phrases which will serve for any two people. The questions may be given according to the book, but the answer, coming from a speaker of the language, will be constructed out of that vastly more extensive vocabulary existing in his brain, and the whole scheme be thrown out of joint. For this reason a careful study of the examples of the language and the manner of building up the sentences will in the end prove of more solid benefit than the memorizing of a large number of set phrases, which

may or may not be appropriate.

Some phrases suitable to certain situations have been inserted, such as matters relating to the procuring of something to eat, directions to the house boys, distances to places, the weather, and other similar matters, the careful perusal of which will enable more complex sentences to be

uttered with success and a mastery of the idiom acquired.

Magandang gabi pb.

How is your father? (mother?)

Well, by the grace of God.

Not very well. Is that so? I regret to hear (lit., "feel") it.

How is the sick one?

Getting better now. Is there anything I can do for you? (lit., Have you any orders for me?)

No, thank you. Sit down, sir.

Thank you.

I am in a hurry. I wish only to speak to Pedro.

I will regard it as a great favor if you will tell Pedro that I was here to-day.

Don't worry about it, sir; I will tell him.

Pedro just left this minute.

Where did he go?

1 think (It seems) he went to buy some cloth.

I am going away now.

Are you going? Until later.

Until to-morrow.

Until day after to-morrow.

Until we meet again (lit., "Until we see each other").

Well, I'm going (lit., "you there").

Where are you going? I am going home.

When are you going back to Manila?

On Sunday.

When are you going (down) to Manila?

When are you going up to La Laguna?

Come up! Come down! Come in! Get out of here! Move on! Clear out! Don't move! Come near.

VOCABULARY.

Tomás. Thomas. Mary. María. John. Juan. Joseph. José.

Father. Amá. Mother. Iná. Brother. Kapatid na lalaki.a Sister. Kapatid na babaye.a

THE ARTICLE OF PROPER NOUNS (SI).

In Tagalog a definite article, Si, is generally prefixed to the names of persons related to or well known to the speaker or writer, as well as with names of relationship and terms of affection. It may also be used with the proper name of an animal belonging to the speaker. In some of the provinces diminutives are much used, especially within the family. There are also some terms of this nature largely used in Sangley, or Chinese-Tagalog families, which are taken from Chinese and will be discussed later.

Older brother (first born). Koya; si koya, my elder brother. The pronoun is understood.

Elder brother. Elder sister. My father. My mother.

Manung (Manila and southern dialect). Kaka; si kaka, my elder sister.

Si amá. Si iná.

This article is declined as follows:

Nom. John. Gen. John's; of John. Dat. To, for John. Si Juan. Ni Juan; kay Juan.

Acc. John. Abl. From, with, John.

Kay Juan.

When a name is to be used in the plural, the article of common nouns, ang, is used, as: The Johns, ang mangá Juan; or better, ang mangá tinatawag na Juan (those who are called John).

The article of names has a special plural when coupled with certain words, as of the parents, relatives, companions, or the home.

Nom. John and his ——. Gen. The field of John and his family. Dat. To, for, Pedro and his -

Si**ná** Juan. Ang búkid niná Juan.

The field of Pedro and his family. Acc. Abl. From, by, Pedro and his -

Ang kaná Pedrong búkid.

^aThese two words are derived from "patid" and "ka," meaning "tied with the same cord." "Lalaki" is male and "babaye" is female. In Tagalog, however, separate words are used to express "elder brother," "elder sister," "younger brother or sister," etc.

Si is not used alone before names of persons unrelated to the speaker except in a joking way; in other cases the Spanish word Schor, Mr., is inserted as: Si Schor Blanco, Mr. Blanco. Ginóo is the Tagalog equivalent for "Schor" and Gat for "Don." Dayang is "Dona." These terms are used by purists.

THE ARTICLE OF COMMON NOUNS.

The article ang (the) is used with all common nouns, and also those proper nouns not applying to persons—i. e., the Pasig, ang Pásig; the Philippines, ang Filipinas. Sometimes this article is prefixed to names of cities. It is declined both in the singular and plural, the word mangá (sign of plurality) being added in the latter case.

DECLENSION OF "ANG."

Nom. sing. The.
Gen. sing. Of the.
Dat. sing. To, for, the. Ang. Nang; sa. Sa. The. Nang; sa. Acc. sing. Abl. sing. From, by, the. Nang; sa. Nom. plur. The. Ang mañgá. Gen. plur. Of the. Dat. plur. To, for, the. Nang mangá; sa mangá. Sa mañgá. The. Nang mañgá; sa mañgá. Acc. plur. Sa mañgá; nang mañgá. Abl. plur. From, with, the.

The forms ni and nina of the article of names and the form nang of the article of common nouns are used when a word in the genitive follows a nominative in the sentence. Examples: The mother of John, ang ina ni Juan; the house of Thomas and his family, ang bahay nina Tomas; the darkness of the night, ang kadiliman nang gab-i.

The forms kay, kaná, and sa are used with the genitive when inserted between the nominative article and its noun. Examples: The mother of John, ang kay Juan iná; the house of Thomas and his family, ang kaná Tomás báhay; the darkness of the night, ang sa gab-i na kadilimán. Ancient Greek has almost this same construction.

THE COMMON NOUN.

Nouns in the Tagalog language are of various classes; some are root words, whose derivation can not be traced; others are built up from roots, and many are foreign words, mainly from Spanish, although some Arabic and Sanskrit words are to be found, as well as a few from Chinese and other sources. They are indeclinable, and the sign of plurality is generally indicated by the word manya placed before the noun pluralized.

preposition.

Ex.: 1. Have you any rice? (¿Mayróon kang bigás?) Have you that rice? (¿Na sa iyo iyang bigás?) 2. Yes, sir, I have some (Opó, mayróon akó). Yes, sir, I have it (Opó, na sa ákin).

Mayroon is used when asking in a general way, as in the market or in a shop or store; na sa is used when a certain object is meant. Magkano means "how much;" ayao is "I do not wish to," and alin is "which." With the foregoing vocabulary all ordinary comforts and supplies, except clothing, can be asked for throughout the provinces where Tagalog is understood, and these words are generally understood throughout the island of Luzon on account of their general similarity to the corresponding words in other dialects. The most conspicuous exception is túbig (water), which is danum in Pampango, Ilocano, and other northern dialects of Luzon.

Sex is distinguished by the addition of the words lalaki, "male," or babáye, "female," with the appropriate "tie" (g, ng, or na). Ex.: My sister (Ang aking kapatid na babáye—lit., The my female brother); my son (ang aking anak na lalaki).

A few words indicate sex in themselves, but they are very limited in

number compared with those in Aryan languages.

VOCABULARY.

Aunt. Аli. Father. Amá. Girl, unmarried woman. Dalaga. Lalaki. Babáye. Used also as adjectives. Male; man. Female; woman. Miss; young lady. Binibiní. Mother. Iná. { Amain. { Mamà. Uncle. Principally heard in Ma-Binatà (from batà, boy, child). Bagongtáuo (lit., "new man"). Young man; bachelor; youth. Young man, unmarried.

THE "TIES."

The Tagalog ear dislikes the sequence of certain sounds, and for this reason three ties, "g," "ng," and "na," are much used, more especially when an adjective is prefixed to a noun or a noun in the genitive modifies another in the nominative.

The tie "g" is added to such an adjective or nominative if ending in "n," the genitive following the nominative modified. The adjective may precede the noun, as in English, or follow it, as is generally the case in Spanish. The tie is added to the noun in the latter case, if it ends in "n." Ex.: (1) Wisdom (karunungan); great (dakild); great wisdom (karunungan dakild). (2) Silver (pilak); mirror (salamin); silver mirror (salamin pilak).

(salaming pilak).

The tie "ng" is added to words ending in a vowel not preceded by another vowel. U, as in táuo, is considered as a consonant, as it sounds nearly like the English "w," and is written with this letter by many natives.

Ex.: A dutiful child (Batang mabaul); a bottle of wine (ising boteng álak); a beautiful woman (babáyeng magandá); a Manila man (isang táuong Maynilà).

The tie "na" is used when the first word ends in any consonant (except "n") or in a diphthong. Ex.: A dutiful child (Mabait na batà); a large house (báhay na malakt); clear water (túbig na malinao, or malinao na túbig).

NO INDEFINITE ARTICLE.

There is no special indefinite article (a or an) in Tagalog, although the numeral is (one) may be used.

THE VERB "TO BE."

The English verb "to be" may be sometimes represented in Tagalog by The English verb "to be" may be sometimes represented in Tagalog by the particle ay, changing to 'y for euphony after a preceding vowel. Ex. is your horse white? (¿Ang cabayo mo'y maputi!) The bird is singing (Ang ibon ay hungmuhuni). Generally in questions the verb "to be" is understood, as: ¿Anó ang sabi mo! (What did you say?—lit., What the said your?). The verb is understood also when a predicate adjective is used; as, My father is good (Mahuti ang áking amá). Ay also connects two clauses of equal force; as, If John comes, go away (Kun dumáting si Juan, ay umalle ka) umal**is k**a).

FUTURE AND PAST OF "AY."

The particle ay is invariable as to tense, the idea of past or future being expressed by the answer or an adverb of time. Ex.: Beautiful then, she is is ugly now (Magandá siyá noón, ngayón ay pángit). You will be sick to-morrow (Búkas ikáo ay masakit).

Some Tagalog writers use ai in place of ay, especially in newspaper work.

THE CONJUNCTION "AND."

At, changing to 't, under the same circumstances in which ay changes to 'y, represents the conjunction "and." It may also stand for "because" in compound sentences when a cause is expressed; as, I can not read, because I have no spectacles (Hindi akó makababasa sa pagka 't wald akong

When ay and at are followed by a monocyllable, as sa, the vowel is not dropped.

SECTION TWO.

The principal interrogative pronouns and adverbs are as follows:

What?	¿Anó?	When?	¿Kailán?
Who?	1Sino?	How?	i Papa-anó!
Which?	7Alin?	How much (value)?	Magkano?
Where?	¿Saán?	How many?`	¡Ilan!

Anó, "what," is declined as follows:

	SINGULAR	•	PLURAL.
Gen. Dat. Acc. Abl.	What? Of what? To, for what? What? (Loc.) In, at what? (Ins.) By, with what?	¡Anó? ¡Sa anó? ¡Nang anó? ¡Sa anó? ¡Sa anó? ¡Sa anó? ¡Nang anó?	No change. No change. No change. No change. No change. No change.

This pronoun is used only in speaking of things, never of persons. The expression [Anh ka! means "What do you want?" [Sino!, "who," is declined as follows:

SINGULAR.		PLURAL.
Nom. Who?	¿Sino?	¿Sino-sino!
Gen. Whose, of who	om. /Kanino? /Nino?a	↓Kanikani n o? b
Other cases.	¿Sa kanino?	¡Sa kanikanino!

a Used only when the question is not heard or understood.

b Not kanino-kanino, as the first form is a trisyllable, and in Tagalog repetitions stop at at the second syllable (or letter, as the case may be). Kaninong manga and sa kaninong are also used.

Example: ¡Kaninong bùkid iyán! (Whose field is that?); Sa capitán (Of the mayor or presidente); ¡Nino! (Whose!); Sa capitán sa bayan (Of

the mayor of the town).

From early times the title of the mayor of a town or "pueblo" was "gobernadorcillo" (little governor). This name was changed in 1893 to "capitan municipal," and in 1898 to "presidente," a name retained under American administration. Natives ignorant of Spanish generally speak of the "capitán."

While and is used for things and sino for persons, the pronoun alin,

"which," is used for both. It is declined:

SINGULAR.		ik.	PLUKAL.
Nom.	Which?	<i>₄Alin?</i>	¿Alin-alin?
Gen.	Of which?	¡Sa alin? ¡Nang alin?	¡Sa alin-alin!
Dat.	To, for what?	¡Sa alin?	¡Sa alin-alin!
Acc.	What?	Sa alin! Nang alin!	¡Sa alin-alin?
Loc.	In, at which?	sSa alini	¿Sa alin-alin?
Ins.	By, with, etc., which?	¡Nang alín?	¡Nang alin-alin?

Sa with the genitive is preferable in answering a question. ¿Aling mangá? may also be used for the plural. The form Manya alint is rather inelegant. Thus the English "Which men?" may be expressed by "Alinaling tauot" "Alin manya tauot" or "Manya aling tauot"

THE INTERROGATIVE ADVERBS.

These adverbs present no peculiarities and are used as in English. **!Ilan*! (How many*!) obviates the use of the pluralizing particle manga; as, **!Ilang tauo*! (How many men*!) In inquiring the price of an article in the market the restrictive form magkakano is generally used; as, "!Magkakano ang manga itlog!" (How much for eggs?) But in speaking of purchasing the entire quantity magkano is right.

THE DEMONSTRATIVE PRONOUNS.

These are four in Tagalog, two being translated by "this," another by "that," and the fourth by the poetic form "yon."

The first is yari, and means "this." Strictly speaking, it should be used only to indicate an object nearer to the speaker than to the person addressed but precipielly this propose is desprised on the person. addressed, but practically this pronoun is dropping out of use. For example, Yaring aking puso (This heart of mine), while more exact, is little heard, the following word ito (this) being used: itong aking puso. Yeri is a dialectical form.

Yari is declined as follows:

SINGULAR.

PLURAL.

Nom.	This.	Yarî.	These.	Yaring mañgá.
Gen.	Of this.	Nirí; dini sa.	Of these.	Niring mañgá.
Dat.	To, for this.	Dini sa.	To, for these.	Dini sa mañgá.
Acc.	This.	Nirî; dini sa.	These.	Niring manyá, etc.
	At, in this.	Dinisa.	At, in these.	Dini sa mañgá.
Ins.	By, with this.	Nirî.	By, with these.	Niring mañgá.

The ordinary word meaning "this" is $it\delta$, and strictly denotes objects or persons equidistant from both speaker and the person spoken to. It is declined as follows:

SINGULAR.

PLUBAL.

This. Of this. To, for this.	Itó. Nitó; ditó sa. Dito sa.	These. Of these. To, for these.	Itong mañgá. Nitong mañgá, etc. Dito sa mañgá.
 		,	

6855--06----3

Acc. This. Dito sa. These. Dito sa manga.

Loc. At, in this. Dito sa. At, in these. Dito sa manga.

Ins. By, with this. Nitó. By, with these. Nitong manga.

"That" is expressed in Tagalog by the word iyán, especially when applied to persons or objects nearer to the person spoken to than to the speaker. It is declined as follows:

SINGULAR.

Nom. That. Those. Iyán. Iyang mañgá. Gen. Of that. Niyán; di**y**án sa. Of those. Niyang mañgá, etc. To, for that. To, for those. Diyán sa mañgá. Dat. Diyán sa. Niyang mañga, etc. Acc. That. Niyán; diyán sa. Those. Niyán sa. At, in that. Niyán sa mañgá. Loc. At, in those. Niyang mañga. Ins. By, with that. Niyan. By, with those.

The fourth demonstrative pronoun, yaón, means "yon," although at present generally translated "that." Yoón is a dialectical form. It is declined:

BINGULAR.

PLURAL.

PLUBAL.

Nom.	Yon (that).	Yaón.	Yon (those)	Yaóng, mañgá.
Gen.	Of yon.	Niyaón; dóon sa.	Of yon.	Niyaong mangá, etc.
Dat.	To, for yon.		To, for yon.	Doon sa mañgá.
Acc.	Yon.	Niyaón; dóon sa.	Yon.	Niyaong mañgá.
Loc.	At, in yon.	Dóon sa.	At, in yon.	Doon sa mañga.
Ins.	By, with yon.	Niyaón.	By, with yon.	Niyaong mañgá.

The particle sa follows the pronoun in each case as given, but it, as well as the pluralizing particle manya, belongs to the person or object pointed out, and not to the pronoun.

These four demonstratives have a peculiar idiomatic use in that they are repeated in the nominative after the person or object modified as well as preceding the same, in the latter case agreeing in number and case. Examples: This man (Itong tauong itô), both nominative singular. That boy's clothes (Ang damit niyang balang iyán); first, genitive singular; second, nominative singular. That man (has) much money (Maraming salapí niyang (niyaong) thuong yaón); lit., "much money of that man that." (Generally with nominative.) Itong bulaklak na itô'y diyán sa balang iyán (This flower is for that child). In the second clause, the first pronoun is in dative and second in nominative.

ADVERBS OF PLACE.

From the four demonstrative pronouns the following adverbs of place are derived:

Here (close to the speaker). Dini. Here. Dito. There (near addressee). Diyán. Yonder (there). Dóon.

With the particle na prefixed to this class of adverbs, the idea of "am," "is," "are" is expressed. It will be noted that the initial letter d is softened to r where the particle na is used alone.

Am, is or are here (close).
Am, is or are here (more distant).
Am, is or are there.
Am, is or are yonder.

Narini; nayeri; nandini.
Narito; naitó; nandito.
Nariyán; naiyán; nandiyán.
Naroón; nayaón; nandoón.

The particle di with the same class of adverbs expresses the past tense. For euphony the particle changes to do with $do\delta n$.

Was or were here (close).

Was or were here (more distant).

Was or were there.

Was or were yonder.

Dirini.

The particle pa with the same adverbs expresses the future.

Will be here (close).

Ex. Is the man there? (Nariyán bagá ang táuo?) He is not here, he is yonder (Wald rito, naróon). Where is Captain Tino (Faustino)? (¡Sino ang kaniyang katiwalat) The Chinaman Ong Laico on Calle Real (Ang insik Ong Laico sa Calle Real). Thank you (Salámat).

THE PERSONAL PRONOUNS.

The personal pronouns in Tagalog should receive careful study, as they exhibit several peculiarities of form and use not found in English.

All personal pronouns have two genitives, the first form being prefixed to the accompanying noun or verb, and the second form suffixed. The two forms are not used in the same clause, the second form being preferred with the definite form of the verb. However, if the sentence commences with an adverb or negative particle, or is a question, the suffixed forms are placed before the verb.

The first person plural, like nearly all Malayan and Melanesian languages, has two forms, the first corresponding to "we" in a general sense, and including those spoken to, while the second form, like the editorial "we," excludes the person or persons addressed. There are also two dual forms, which may be translated "thou and I." These dual forms have the same meaning, the first form, kitá, being more general and used in Manila, Rizal, Laguna, Batangas, and Tayabas, while the second form, katá, is found in Bulacan, Nueva Ecija, and the Tagalog-speaking parts of Pampanga and Tarlac. Bataan probably follows Bulacan in style, while in Cavite the usage is like that of Manila, etc.

In the use of the personal pronouns together, a very different order is observed from English. The Tagalog order is "I (we), thou (you), and he, she (they)," ignoring the European custom of mentioning the listener first, the absent or third person next, and the speaker last. The Tagalog says "I and you, "I and John," and with the further peculiarity that he literally pluralizes the first pronoun and gives the pronoun or noun following its genitive form in the correct number. The examples will explain the matter more clearly.

explain the matter more clearly.

The use of the word "it" is avoided by speakers of Tagalog. It is only used when objects are personified, as in stories, etc. See example.

The singular forms are still used in Tagalog, and when respect is intended, instead of using the plural, as in English, or the third person singular, as in Spanish, the particle $p\hat{a}$ is suffixed. The plural, also with $p\hat{a}$, is used in Manila in many cases, but may be said to be an imitation of the Spanish tusutres (ye).

Kayó nilá.
Kami ninyó.

illa and large towns these forms are dying out of use, the Spanish ig used; as, John and I (Si Juan at akb). Id the use of siyā, "it," to indicate an inanimate object, the word epeated, or in answering a question a particle like niga (certainly) Ex.: Mabuti bagā ang lakatān [a species of banana]? (Is the cood?) Mabuti nīga (Certainly [it is] good). Ird person plural is used to indicate great respect for a person, with pō, and for still greater respect the word kamahalan (exis used. Your excellency (Ang inyong kamahalan).

THE AFFIRMATIVE PARTICLES.

ame is applied to several adverbs, and also to some words which selves have no signification, which, added to pronouns, give them ive or indefinite meaning. The following are the ones most gened. None begin a sentence except kayá.

Din. (Rin after preceding vowel.) Bagá. (Generally with indef. verb. es. (Generally with indef. verb.) for that. Kayá. (May begin sentence.) Man. Man din. (Southern Tagalog only.) Na. (No meaning alone.) Ñga. Ñgani. (Southern Tagalog; Bicol, gňani.) Ρά. ! Is that so! (Idea of wonder inherent.) Palá. Sa. (Greatly used word.) o; for, etc. Sarili. now; plenty. Siya na.

lkó rin; akó man (I myself). Siyá nga(he, certainly). Ikáo man

n). Ang sarili kong cabayo (my own horse). Oó nga (yes, cer-Hindi nya (no, indeed).

rticle man attached to an interrogative pronoun converts the latan indefinite pronoun. Ex.: Anoman (anything; something). (whichever; whatever). Sinoman (whoever). Sinoman tauo whomsoever).

particles follow the monosyllabic pronouns, but precede the promore than one syllable, unless the latter begin the sentence, in se the particle follows, as with a monosyllabic pronoun.

INDEFINITE PRONOUNS.

Besides anoman, alinman, and sinoman, there are several words which may be used at times as indefinite pronouns, and at other times with adverbial force. One of these is bálang, which can be used for "some, any, and each." Ex.: Bálang árao (some day). Ang bálang táuo (any man). Sa bálang isá (for each one).

The numeral isá (one), prefixed to words like árao (day), and táuo (man) gives the idea of "one day; a certain man," etc. It is also used with demonstrative pronouns as follows: Itong isá (this one); diyán sa isá (to that other); doón sa isá (to that other yonder). Isá may be sai to mean "other" among a few persons or objects, and the word ibá to designate "other" among many. Ibang táuo (another man completely); ibang bágay (another thing entirely).

Tanan, dilan, and paua mean everyone, "all" (persons). "All" (the

adjective) is lahat.

RELATIVE PRONOUNS.

These pronouns, which in English are expressed by "which," "that," "who," etc., are expressed very obscurely in Tagalog by means of the article ang, and the ties g, ng, and na. The Tagalog also has a negative relative pronoun di, translated by "who not," "which not," "that not." Ex.:

He who is well behaved is esteemed by all.

Ang mabuting ásal ay minamahal nang lahat.

The book which you are reading is mine. I did not receive the letter that you sent to me.

Ang librong binabasa mo'y ákin. Di ko tinangap ang súlat na ipinadalá mo sa ákin.

The man who does not disobey the laws will be protected in his rights.

Ang táuong di sumasalansang ipagtatangol nang katuiran.

The phrase "each other" is expressed by the particle nagka or magka, together with the appropriate noun or pronoun. Ex.: Do they understand each other? Nagkakaalam silá (from alam)?.

The principal difficulty the student of Tagalog will experience here will be in the use of the exclusive and inclusive forms of the first person plural. The dual forms are little used in the nominative, but are quite frequently heard in the oblique and accusative cases. As has been remarked, these exclusive and inclusive forms are to be found in nearly all the Malayan languages, while in some of the allied Melanesian tongues, such as that of Fiji, the second and third persons have not only a dual, but a triple form, in addition to the ordinary plural. The Fijian first person has also the dual and triple forms, each of which are divided into an inclusive and exclusive form.

SECTION THREE.

As has been previously explained, Tagalog root words may be used as nouns, verbs, adjectives, and adverbs in many cases, either by the context or particles affixed or suffixed. Naturally the noun is generally the simplest form, especially the concrete noun, but secondary or derivative nouns may be quite complicated in their construction. The noun is invariable in form, number being expressed by the word many, or such words as "all," "many," etc., for the plural. Cases are expressed by the article or prepositions, and no gender is known. A great many common nouns in Tagalog are derived from the Spanish, a few from Chinese, and some from Arabic and Sanskrit sources. All Tagalog nouns may be used with the article.

SECTION FOUR.

THE ADJECTIVE.

adjective is a word used in a grammatical sense to qualify, limit, or a noun, or a word or phrase which has the value of a noun, and it sees quality or condition as belonging to something: Thus, "black is the name of a quality and is a noun; "black" means possessing less and so is an adjective. The adjective is used (1) attributively, positively, and (3) predicatively. Examples, (1) "A good man," A man good and great, (3) "The man is good." ally in Tagalog as in English, this is the meaning of the adjective, when the greater flowibility of the former the construction of such wing to the greater flexibility of the former the construction of such is much more clearly to be seen. Like English, some root words ljectives by intrinsic signification and may be called "simple adject". Among the simple adjectives are bago (new), mahal (dear, precious, i, hamak (vile), hunghan (foolish), tahimik (quiet, tranquil), and true). But the greater number of adjectives in Tagalog, as in Engre compounds formed from roots, which may be sometimes nouns, ans of prefixes, infixes, and suffixes like the English suffixes "ly," "able," etc., as in "friendly," "childlike," "remarkable," etc. rdinary particle in Tagalog used in the formation of adjectives is the ma, undoubtedly a contraction of may, to have or possess, as there uns with which may is still retained with the noun to form an adjec-Among such ma adjectives may be mentioned magandá (beautiful), gandá, the root expressing the idea of beauty or good appearance, artinong (wise), from dinong, the root expressing the idea of wisdom. be observed that ma, like some other particles softens d to r when mences a word. en prefixed to nouns denoting things which may be had or possessed, enotes an abundance of whatever may be signified by the noun. ples: Si Juan ay maginto (John has much gold); masilid ang bahay

particle ma has at least nine other functions, which will be explained appropriate places.

May is used really as the verb "to have" in the phrase Ako'y may sakit (I am sick [ill], literally, "I have sickness or pain"). In asking if a person is ill or in pain the verb is sometimes reduplicated; e. g., May maysakit ka? (Are you ill [or in pain]?).

Ma adjectives may be conjugated with the definite infix in to express opinion; e. g., minamarúnong ko itó (I think this is wise). Ma is reduplicated to express the present tense; minarunong ko ito would mean thought this was wise."

Conjugated with the indefinite particle mag (nag in present tense), the adjective assumes a verbal form, with the implied idea of boasting or pretending what may be signified by the root; as, nagmamaránong si Felipe (Philip boasts of being wise); nagmamagandá si Loleng (Dolores [Lola] pretends to be beautiful). The idea may also be conveyed by "believes himself" (or "herself"), what may be denoted by the root; e. g., "Lola believes havelf to be beautiful." believes herself to be beautiful."

The particle na also forms some adjectives, in which the first syllable of the root is generally repeated. These na adjectives also have an indefinite verbal meaning. Ex.: Nauuhao (thirsty, to be thirsty), from uhao; napagal (tired, to be tired); pagalin (a tired person): namatay (dead, to be dead, from patay). P is here changed to m for euphony.

Some adjectives are also formed from roots by the prefix mapag, as

mapagumgayao (abusive, insulting [words or acts implied]).
Others are formed by the prefix mapa; as, mapamanag (boastful, vain-

glorious, ostentatious), from bansag, ostentation. B is softened to m. The indefinite particles mag and nag, when prefixed to some roots, generally with reduplication of the first syllable of the same, form adjectives

in some cases. Ex.: Magdaraya (fraudulent, cheating), from daya, the initial d being softened to r; and nagita's (sole unique, only), from ta'd, one. The particle maka, in its signification of cause, forms adjectives similar in meaning to those in English ending in "able," "ing," etc., when prefixed to roots capable of such significations. The first syllable of the root is generally reduplicated, but not always. Ex.: Makatotom (agreeable, pleasure and the present of the profixed to the root is generally reduplicated, but not always. causing), from toua; makatatána (laughable, comic), from taua, and makasáua (disgusting), from sáua, etc.

A few adjectives are formed by the prefixed particles mala and pala, as malahininga (lukewarm, applied to water), malakoko (quite warm), and palaauáy (quarrelsome), from auáy (quarrel, enmity).

Some adjectives are formed by the reduplication of a root when the root has no more than two syllables. If there are more than two syllables the first two only are reduplicated. This rule is general in Tagalog. Ex.: Hálohálo (mixed), from hálo, root of the idea "to mix;" sunodsunod (consecutive), from sunod, root expressing the idea of following, etc. restrictive particle ka is sometimes prefixed to these reduplicated roots, implying a lesser degree than with ma or may; as, kasakitsakit (painful), from sakit, root expressing the idea of illness or pain. An example of how far a polysyllable is reduplicated is furnished by the word kaginhaginhaua (wholesome, salubrious), from ginhaua, idea of relief, betterment, rest.

There are a very few adjectives formed by the union of two words of opposite meaning, of which urong-sulong (neutral, indecisive), from urong

(to go back), and sulong (to go ahead), may be taken as the type.

The particle in (hin atter an acutely accented vowel) suffixed to many adjectives gives the idea of a person or object having the quality denoted by the root. Ex.: Masintahin (a loving person), from sintá, love; tamohin (a useful [or available] article), from tamó, use, utility, and babasagin (a broken or trail thing), from basag, idea of breaking, fracturing, etc., anything like glass, a plate, the head, etc. The first syllable of the root is here reduplicated.

An (han), which is generally a place suffix, is sometimes added to adjectives in which the idea of place or location is inherent, and occasionally with those which do not admit the suffix in for euphonic or other reasons. Ex.: Di madaanan (impassable or impenetrable), from di (not),

and dáan (road), and matiisan (patient person), in denoting what may be suffered when suffixed to matiis; as, matiisin (what suffered or endured). This, however, belongs more properly under the particles, where the difference in the use of in and $a\hat{n}$ is set forth at length.

In when inserted after the first consonant of some nouns gives the idea of like, and one at least is sometimes used as an adjective. It is binata (youth), from bata (child), and is sometimes used to mean "young," although bago (new) is sometimes used with the same idea, as in the words bagong tauo (uninarried man or bachelor, literally "new person"

The English nouns and phrases which are used as adjectives are expressed in Tagalog by means of the ties g, ng, or na, the word which is modified preceding the modifier, the opposite to what is done in English. The tie is attached to the modified word and answers somewhat to the English "of." Ex.: Salaming pilak (a mirror of silver, a silver lookingglass) (g); tinterong bubog (an inkstand of glass, a glass inkstand) (ng); singsing na ginto (a ring of gold, a gold ring); bahay na bato (a stone house, a house of stone), the last two examples showing the use of the tie na. Sometimes the tie is omitted if the modified word ends in a consonant

other than n, but it is not considered elegant to do so.

Adjectives like the English "golden," "silvery," "wooden," etc., are expressed in different ways in Tagalog, generally by means of the ties or by different particles indicating "likeness," which will be explained

hereafter.

Negative adjectives like those formed in English by the prefixes un (Anglo-Saxon), in (before b and p softening to m for euphony), in (Latin), a, an (Greek), are formed in Tagalog by the particles di (not), unid (without), and sometimes hindi (no). Ex.: Di malapilan (unapproachable), from lapit, idea of approaching; di mabilang (innumerable), from bilang (to number); di madaanan (impassable or impenetrable), from bilang (valang bahalu (apathetic, indifferent, careless); valang hangán (without end. lasting, eternal, infinite), and hindi namunungan (unfruitful). (without end, lasting, eternal, infinite), and hindt namumunga (unfruitful), from bunga (fruit), with na and reduplicated first syllable of root (softened to m from b) to indicate present tense (literally, "not fruit-bearing"). The use of dt and wald is illustrated by dt makabayad and wulang maybayad, the first meaning "not able to pay" and the second "without means of payment," both being about equal to "insolvent."

As in English, there is no variation in the adjective for gender and case, but the adjective may be pluralized. For the plural (the modified word being understood in some cases) the word maniga is used with simple adjectives as, ang mañgá hunghang (the foolish [persons])—and the first syllable of the root is repeated if it consists of one or two letters for compound adjectives. If the first syllable of the root contains more than two letters, the first two letters only are reduplicated. Mangá is also used by many with the plural compound adjective. Ex.: Ang marurunong, or ang mangá marurunong

(the wise [people]).

The adjective may precede or follow the noun modified, and it would seem that the latter form is to be preferred, as it agrees with Malay (as with Spanish) construction. However, with the spread of English it is not unlikely that the custom of using the adjective before the noun may become the usual construction, as it is equally as correct as the other way. Ex.: Ang mangá babayeng magandá; ang mangá magandang babaye; ang babayeng magaganda; ang magagandang babaye; ang mangá babayeng magaganda, and ang manga magugandang babaye. All six of the foregoing phrases mean simply "the beautiful women," the first four being preferable.

The following list of adjectives will give the principal ones in ordinary The plan has been followed of giving adjectives with certain meanings, followed by those of opposite significations, or at least in well-defined groups. Words having substantially the same meaning are called synonyms; those of opposite meaning, antonyms. Words with the same sound but different meanings are called homonyms. Some Tagalog adjectives require several different words in English to express their varying meaning, just as occurs in translating English into Tagalog or any other language. Practice alone will fully instruct the student, owing to the localisms and provincialisms of the language. As many examples will be given as space justifies.

COMPARISON OF ADJECTIVES.

The Tagalog adjective, like adjectives of other languages, has the three degrees of quality to be indicated—the simple form (which is generally called the positive), the comparative, and the superlative. Of course, as in English, some adjectives are excluded from comparison by their meaning, such as those for "dead," "alive," "entire," and some others.

The positive adjective is that form discussed in the preceding pages, and the comparative will now be taken up. Of this there may be said to exist three varieties, the comparative of equality, that of superiority, and that of inferiority. In English the first form is expressed by "as (adjective) as (noun)," the second by "er" or "more," and the third by "er" or "less."

In Tagalog there are three ways by which the comparative of equality may be expressed. The first is by using the adverb para (variation paris), meaning "as," "so," etc. In some cases "like" expresses the Tagalog idea has "with adjectives or common pages ("usis) takes the time."

In Tagalog there are three ways by which the comparative of equality may be expressed. The first is by using the adverb para (variation paris), meaning "as," "so," etc. In some cases "like" expresses the Tagalog idea best. With adjectives or common nouns para (paris) takes the tie "a, but with names of persons, etc., and pronouns is followed by what is compared, which takes the genitive case. Ex.: Parang mabuti (how good), maputi parang getas (as white as milk), maitim parang iling (as black as charcoal), parang patag (like a dead person), parang hånog (like a beast); Akôy para ma' (Am I like vou?) siya'y paris ko (he [she] is like me), maliit paris ko (as small as I am [small like me]), siya mabait para ni ham (he is as prudent as Juan), ang ilog sa Naga'y malonang para nang Pasig (the river at Naga [Nueva Caceres] is as wide as the Pasig). With the particle ka denoting likeness, para indicates equality, the particle being prefixed to the adjective in such cases. Ex.: Para niyong manifa tino, kahubuti (equally good as these people). This word para, which as a root denotes "equality," "close resemblance," etc., should not be confused with the Spanish word para, meaning "to," "for," etc., as the resemblance is purely accidental. The Tagalog word is Malavan, the Javanese word pad'a having substantially the same signification.

The second way of expressing equality with an adjective is by means of the particle sing, which denotes this idea precisely. Ex.: Itô y singhabà niyôn (this is as long as that), siyô y singhabi ko (he is as large as I am), singhabi si Pedro ni Juan (Pedro is as large as Juan). It will be seen by the examples that the object or person compared takes the genitive case and the subject the nominative.

The third way of indicating equality with the adjective is by means of the consolidated particles ka and sing, i. e., kasing, the syntax being the same as with sing only. Ex.: Itô'y kasinghabà niyan (this is as long as that), si Pedro'y kasinghaba ni Juan (Pedro is as tall as Juan).

When equality is to be indicated for more than two objects it may be expressed in two ways. The first is by prefixing sing to the root, of which the first syllable is reduplicated. Ex.: Singhahabà (equally long [things]). singhababà (equally good [persons or objects]), singtatais ang magina ni Bangoy (Maria) (Maria and her mother are the same in height). The

second is by prefixing kasing to the root, the particle mag being prefixed to kasing, forming magkasing. Ex.: Magkasingdúnong (equally wise [learned]), magkasingyaman (equally wealthy [rich]), ang maginá ni Bangoy (Maria) ay magkasingtaás (Maria and her mother are the same in height [equally tall]), ang mañgá cabayout ang mañgá kalabao ay magkasingdami sa bayan itó (there are as many horses as the carabao in this town), magráon kang bagá kicát ng kasingdami sang nglaya. (Haye yon this town), mayroon kang baga bigas na kasingdami nang palay? (Have you as much hulled rice as you have of the unhulled?).

Equality in quantity may also be expressed by magkapara, magkapara, or magkapantay, the two objects compared taking the nominative, and the root denoting quantity having ka prefixed to it. Ex.: Ang bigds ko at ang bigds niya magkaparis karami (he and I have the same quantity of rice). Literally "my rice and his rice is the same in quantity." Those influenced by Spanish are liable to say "his rice and my rice," but the other

order is that of the Malayan languages generally.

The comparative by decrease is formed by the use of the adverb kúlang, (less), preferably with the negative particles di or hindi, as kulang alone has many times the force of "not," "without," "un-" etc., but, as in every language, the context serves as the best guide. Ex.: Itong bigás na itó'y kúlang sa ákin binilí (this rice is less than the amount I bought), ang halagá itong cabayo itô'y kulang sa halagu nang ibá (the value of this horse is less than the value of the other), ang manga kalabao kulang nang dami sa manga cabayo sa bayan ito (there are fewer carabao than horses in this town), ang manga Tagalog ay kulang nang taas sa manga Americano (Tagalogs are not as tall [literally, "less in stature"] than Americans), ong kakulangan (the difference in price, the balance, the difference in amount, etc.).

Alangan (lacking, insufficient, etc.) is sometimes used in place of kúlang. Ex.: Ang kayamanan ni Capitan Tino'y alangan sa kayamanan ni Capitan Luis (the wealth of Captian Faustino is less than the wealth of Captain Luis), alangan pa itong bath ito (this child is not old enough yet).

There are three ways in which the comparative by increase may be expressed. The first is by the position of the words only, what exceeds taking the nominative and what is exceeded the ablative with kay or sa, these two particles expressing "than." The particle ay is sometimes used with the nominative word.

The second method is by prefixing the adverb laló (more) to the adjective, with the same construction as the foregoing.

The third way, which is only used correctly for comparing qualities, is tine third way, which is only used correctly for comparing qualities, is formed by suffixing pa (yet, still to the adjective) either alone or in conjunction with laló. Ex.: (1) Mataás akó sa iyó, or akó'y mataás sa iyó; (2) akó'y lalong mataás sa iyó; (3) mataás pa akó sa iyó, or lalong mataás pa akó sa iyó. All the foregoing may be translated by "I am taller than you are." (1) Payat ka sa dati (you are thinner than you were before), sa Padro' un masinga kay luga (Padro is more industrious than luga). Pedro'y maripag kay Juan (Pedro is more industrious than Juan), alin ang maliksi, kay Pedro ni Juan! (Which is the more alert, Pedro or Juan?); si Juan (Juan); si Juan ay mabait sa kaniyá; (2) si Juan ay lalong mabait sa kaniyá; (3) si Juan ay mabait pa sa kaniyá (Juan is more prudent than he [or she] is). (1) Ang kabanala'y mahal sa kayamanan; (2) lalong mahal sa kayamanan; (2) lalong mahal sa kayamanan; (3) lalong mahal sa kayamanan; (4) lalong mahal sa kayamanan; (5) lalong mahal sa kayamanan; (6) lalong mahal sa kayamanan; (7) lalong mahal sa kayamanan; (8) lalong mahal sa kayamanan; (8) lalong mahal sa kayamanan; (8) lalong mahal sa kayamanan; (9) lalong mahal sa kayamanan; (1) lalong mahal sa kayamanan; (1) lalong mahal sa kayamanan; (2) lalong mahal sa kayamanan; (2) lalong mahal sa kayamanan; (2) lalong mahal sa kayamanan; (3) lalong mahal sa kayamanan; (4) lalong mahal sa kayamanan; (5) lalong mahal sa kayamanan; (6) lalong mahal sa kayamanan; (8) lalong mahal sa kayamanan; (8) lalong mahal sa kayamanan; (8) lalong mahal sa kayamanan; (9) lalong mahal sa kayamanan; (1) lalong mahal sa kayamanan; (1) lalong mahal sa kayamanan; (1) lalong mahal sa kayamanan; (2) lalong mahal sa kayamanan; (2) lalong mahal sa kayamanan; (2) lalong mahal sa kayamanan; (3) lalong mahal sa kayamanan; (4) l ang kabanalan sa kayamanan (worth is more precious than wealth), itô'y lalong magaling sa diyan (this is better than that), iyan ay lalong mapuli sa dito (that is whiter than this), lalong marami ang mangá cabayo sa mungá kalabao sa bayan itó, nguni't ang mangá taga búkid mayróon lalong kalabao sa ang manga taga bayan; (3) there are more horses than carabao in this town, but the farmers have more carabao than the town people, si Ciriaca ay bath pa sa akin, nguni't ang kapatid kong babaye'y marikit pa sa kaniya (Cirisca is younger [literally, "more of a child yet"] than I am, but my sister is prettier than she is), siya'y laló pang kayumangi sa kaniyang ind't makit pa siya sa akin (she is still darker [more brunette] than her mother and is shorter yet than I am).

A laconic but correct form of comparison is expressed by using pa after a pronoun, especially in asking a question. Ex.: Hindi mo naabut, ako par (It was not reached by you; shall I?). Hindi ko naaalaman; ikao paf (I do

not know it; do you?).

For the negative form of the comparative, as in such phrases expressed in English by "without comparison," "there is nothing like it," "there is nothing resembling it," etc., Tagalog has several expressions almost alike in meaning, which are formed by prefixing ka to various roots; the negative wald, (there is no [t]) with the tie ng preceding the root and its prefix. An is sometimes found as a suffix with these expressions. Ex.:

Walang kahalimbaua, without comparison;

Walang kahalintúlad, without similarity (generally in speaking of objects); Walang katúlad, without similarity; unlike; both the foregoing from túlad;

Walang kahambing, without resemblance; synonym;

Walang kawangis, without resemblance;

Walang kaholilip, without likeness (this phrase is rare);
Walang kamukhd, without facial resemblance, from muk-hd, face; Walang kapantay, without an equal; referring mainly to height, length,

Walang katalamitan, without resemblance (a rare expression); Walang kawangki, without resemblance (also a rare phrase).

To ask questions as to comparative equality, inferiority, or superiority is done in Tagalog with ga (how) prefixed to alin (which), or ano (what), in conjunction with ka prefixed to the root of the quality. With many adjectival roots ga and ka thus serve to show that the degree of the quality is the subject of inquiry. Ex.: Gaalin kalayof (About how far is it?); Gaanong kalakif (About how large is it?); Gaanong kahabaf (About how long is it?); Gaalin kaputif (How white is it?). The answer may be given with the same construction, prefixing ga to a demonstrative pronoun or a noun, as the case may be, but if an adjectival root be used, it should be prefixed by ka. Ex.: Gaitó; ganitó (like this); ganiyán (like that); gagatas kaputí (as white as milk); ganitong kalakí (about as large as this); ganóong kahabà (about as long as that). Gaya is a variation. Ganga, another form, is generally used to indicate plurality. Ex.: Ganga nito kalaki (about as large as these); ganga nigán kahaba (about as long as those). The noun, pronoun, or adjective compared sometimes takes the nominative and sometimes the genitive in these answers. Ga and its variations may be said to express likeness, and is but an offshoot of ka. In many cases na is also inserted in the sentence. Ex.: Gaaling na gaith kaonii? (How small is it, like this?). The letter n instead of ng is used in some phrases. Ex.: Ganan ákin (that which belongs to or affects me); ganan inyó (that which affects you), etc.

THE SUPERLATIVE.

The superlative degree of the adjective may be divided into the simple and the absolute forms. The first, usually expressed in English by the use of the adverbs "very," "extremely," "excessively," "exceedingly," "surpassingly," etc., is expressed in Tagalog by the following adverbs:

Lubhā, very, very much, exceedingly.

(2) Masákit, extremely, exceedingly, hard (as in the phrase, "to rain hard"). Distinguished by difference in accent from masakit, (ill). This adverb is used more with verbs than with adjectives. In some places sadyá has the sense of "very;" ex., sadyang linis very clean.

(3) Di sapala, extremely, exceedingly, from di, not, and sapala, humble,

unworthy, the idea of the adverb being that of plenty or sufficiency.

(4) Di hámak, extremely, from di, not, and hámak, vile, worthless, mean, the whole idea being "not paltry," "not mean."

(5) Di palak, far, widely.

- (6) Labis, too, too much. This adverb has sometimes a slight idea of craft, cunning, or slyness.
- (7) Totoo, truly, exactly, precisely.

The adverbs formed with dt always follow the adjective in the sentence, but the simple adverbs may either follow or precede the adjective. Ex.:

He (she) is very old (extremely, etc.):
$$\begin{cases} \textit{Matandâ siyâ} & \textit{dî sapala.} \\ \textit{di hâmak.} \\ \textit{dt pulak.} \\ \textit{lubhâ.} \\ \textit{labis.} \\ \textit{totôo.} \end{cases}$$

or

Lubha | siyá matandá: He (she) is very old (too, truly, etc.).
Totoó

The following phrases will illustrate the various idiomatic uses of the adverbs with the adjective: (1) Lubhá ang pagkapagal ko (I am very tired; lit., "very great is my fatigue"); (2) ngani, lalong masákit ang kay Pedro (That's so, but Pedro is still more tired; lit., "but more excessive is [that] of Pedro"); Inibig kalang masákit (We like you very much); Pinagsisisihan silang masákit (They are repenting deeply); (3) Mayaman di sapala siyá (He is exceedingly wealthy [very rich]); (5) Ungmulán nang labis (It rained too much); (verbalized) Napakalabis ang kabutihan mo (You are entirely too good [honest]); Linabisan ang utos ko sa inyó (You exceeded your orders; you did more than I told you to do); (6) Tinototóo niyá ang wiká (He is complying with his word [verbalized form of totóo]).

The absolute superlative degree of the adjective (in the singular number) which is made in English by the suffix "est" and by the adverb "most" is generally expressed in Tagalog by repeating the entire adjective, whether it be simple or compound, by means of the proper tie, which is determined by the ending of the adjective. Ex.: Mabuting mabuti (best); masamang masamá (worst); banal na banal (most virtuous); masipag na masipag (most diligent); mahal na mahal (dearest, most precious); maputing manui (whitest, very white): maitim na maitim (blacket, very black).

mapuli (whitest, very white); mailim na mailim (blackest, very black). The plural of such superlatives as the foregoing is formed by using the particle manya with those formed from simple adjectives, and either with manya or the reduplication of the first syllable of the root with those compounded with ma, the superlatives thus formed, either in the singular or plural, generally being printed as two words in order to avoid unnecessary length and also to distinguish more clearly from some diminutives. Ex:

The dearest [persons or objects understood] (any manya mahal na mahal).

The best [persons or objects understood] (any manya mabuting mabuti;

many mabubuting mabubuti).

The worst (persons or things understood), ang manyá masamany masama;

In masasamang musasama.
The bravest men (ang mangá matápang na matápang na lalaki; ang matatá
Pang na matatápang na lalaki).

The ugliest animals (ang mangá pangit na pangit na háyop).

What may be called the relative superlative degree, made in English by adding the expression "of all" or a similar phrase to the superlative, is formed in Tagalog by adding the words sa lahat (of all), sa kanila, (among them), etc. Ex.: Sino sa kanila'y ang lalong matapang? (Which of those two is the braver?); Sino sa kanila'y ang matatapang na matatapang? (Which of them is the bravest?); Ang maliit sa lahat, siya'y matapang sa lahat (The smallest of all; he is the bravest of all).

Superlatives are also formed by prefixing ka and suffixing an (han) to reduplicated bisyllabic words, and in the same manner with polysyllabic words, in the latter case only the first two syllables being reduplicated.

Ex.: Katamistamisan (sweetest), from tumis; kabanalbanalan (most virtuous), from banal; kaginhaginhawahan (most wholesome), from ginhawa. The first two roots have two syllables and the last has three. This form may also be applied to abstracts formed with ka and an (han), and intensifies them. Ex.: Katamisan (sweetness); katamistamisan (sweetness itself); kabanalın (virtue); kabanalbanalan (virtue itself); kalamaran (laziness); katamartamaran (laziness, laziness itself).

Verbs have a certain superlative form, which may be mentioned here for the sake of association. It is made by repeating the verbal root united by nang. Ex.: Hingi nang hingi (ask and ask over again); lakad nang lakad (walk and walk); "yes" nang "yes" ang wikain mo (say yes over and over). This form is also found with nouns, etc.

SECTION FIVE.

THE NUMERALS.

The numerals form a small noun-group by themselves, having the threefold character of substantive, adjective, and adverb. While the distinction between adjective and noun is not so sharp as with some other words, yet it is clear that the cardinals in Tagalog are nouns, as they show by always preceding the noun affected that "of" must be understood. Thus limang kalabao literally means "five (head) of cattle," and this holds good in all cases.

In Tagalog there are four classes of numerals—cardinals, ordinals, adverbials, and distributives.

The cardinals are:

One. Tsá Seven. Pitó. Dalawá. Two. Eight. Waló. Three. Tatló. Nine. Siyam.

Four. Apat (accent on first sylla-Ten. Sangpouó (contr. of isang pouó, "one ten"). ble).

Five. Limá.

Anim (accent on first sylla-Six. ble).

As in English, decimal numeration, by tens, is that used in Tagalog and throughout the Malayan family of languages. But Tagalog uses a peculiar form in the numerals from eleven to nineteen, inclusive, which differs from the method followed in every other language of Luzon. Labi, meaning "adding," and a variation of labis, is prefixed to the digits by means of the euphonic tie \widetilde{ng} ; pouó, ten, being understood.

Labina isá. Eleven. Sixteen. Labing ánim. Labing dalawá. Twelve. Seventeen. Labing pitó. Labing tatló. Thirteen. Eighteen. Labina waló. Fourteen. Labing ápat. Nineteen. Labing siyam. Labing limá.

The multiples of ten below one hundred are formed by prefixing the digit used as the multiplier to the word pouô, united by the proper tie.

Sixty. Twenty. Dalarrang pouó. Anim na pouó. Thirty. Tatlong pouó. Seventy. Pitong pouó. Forty. Apat na pouó. Eighty. Walong pouó. Fifty. Limang poub. Ninety. Siyam na pouó.

The intermediate digits, when used with the foregoing, are joined b= means of 't, a contraction of at (and).

Dalawang ponó't isá. Fifty-five. Limang pouô't limá. Twenty-one. Tatlong pouó't tatló. Thirty-three. Sixty-six. Anim na pouô't ánim Forty-four. Apat na pouó't ápat.

The word for "hundred" is dáan, which has a homonym meaning "road." It is always preceded by the appropriate multiplier, to which it is connected by the proper tie, d softening to r before na.

Isang dáan; sang-Five hundred. One hundred. Limang dáan. dúan. Six hundred. Anim na ráan. Dalawang dá**a**n. Pitong dáan. Two hundred. Seven hundred. Walong dáan. Three hundred. Tutlong dáan. Eight hundred. Nine hundred. Four hundred. Apat na ráan. Siyam na ráan.

Numbers below twenty added to hundreds are united with 't, the n of dáan being dropped.

One hundred and one. Two hundred and eighteen. Sangdúa't isá. Dalawang dáa't labing waló.

The n is retained with multiples of ten.

Two hundred and fifty-three. Six hundred and sixty-six. Eight hundred and eighty-eight. Nine hundred and ninety-nine.

Dalawang dáan limang pouô't tatló. Anim na ráan ánim na poub't ánim. Walong dáan walong pouó't waló. Siyam na ráan siyam na poub't siyam.

The word for "thousand" is libo, which is found as ribo and ribu in other Philippine languages.

It is governed, like dáan, by multipliers and suffixed numbers. purely Malayan numerals end with libo, those for higher numbers being of foreign origin. Some higher numbers are said to have Malayan names, but it is doubtful as to whether their values are definite or not. They are noted, however.

One thousand. One thousand and eight. Nineteen hundred and five. Two thousand. Six thousand.

Sanglibo. Sanglibo't waló. Sanglibo siyam na ráa't limá. Dalawang libo. Anim na libo.

For "ten thousand" the term laksa is used. This is from the Sanskrit laksha (one hundred thousand), through the Malay sa-laksa (ten thousand) sand), the latter people mistaking its value. Rakh, with the original value of "one hundred thousand," is used by Anglo-Indians, as in the phrase "a lakh of rupees."

For "one hundred thousand" another Sanskrit term is used, also with

altered value. This is yuta, from the Sanskrit ayuta (ten thousand).
"One million" is now expressed by sangpoung yuta, or "ten one hundred thousands." Gates and añyuo-añyuo are given in old dictionaries as equivalent to "million," but the former is the word used for "hundred"

in most Philippine dialects, and the latter seems to have more the idea of "uncountable," "infinite," etc.

In expressing numbers Tagalogs sometimes give a round number, less the few taken off, as "three hundred and sixty less two" for "three hundred and sixty less two "three hundr dred and fifty-eight;" e. g., kúlang nang dalawá sa tatlong dáan ánim na pouó.

Cardinals may be preceded by ang (the), when a concrete noun is modified, as in the phrase Ang dalawang pisos na ibinigay mo sa ákin (the two dollars which you gave me).

Mangá preceding a numeral indicates the idea of "about," "some," etc., as in the phrase mangá pitong táuo (about seven men). When the exact number is indicated mangá is omitted as a sign of plurality. Ex.: Mañgá táno (men, people); pitong túno (seven men, persons).

By reduplicating the first syllable of the cardinal the idea of "only" is brought in. Ex.: Isá (only one, alone, etc.); dadalawá (two only, only two), etc. For greater emphasis upon the idea of limitation the number may be repeated with the initial syllable reduplicated. Ex.: *lisăisă* (one only); *dadaladalawá* (only two). The adverb *lámang* (only) may also be

used for this same idea, the adverb following the cardinal affected. Ex: Let limming (only one); dalawá lámang (only two), etc. It will be observed that the first two syllables only of polysyllabic numerals like dalawá are repeated, following the general rule in Tagalog.

The question "How many?" is expressed in Tagalog by ilán?

Tagalog has no abstracts like "a dozen," "a score," etc., these phrases requiring roundabout means of expression. "A dozen" may be translated by isang kaniganga pana dalawá, which literally means "a join-

by isang kapisanan nang tabing dalawa, which literally means "a joining of twelve." The same is true of English abstracts like "monad,"

"decade," etc.
"More," with a cardinal following, is expressed by labis or high, which precede the numeral and are united with it by sa, which expresses "than."

Ex.: Labis sa limá, or hight sa limá (more than five). Labis is the more correct, as high has an idea of excess in weight rather than in number.

Kálang (less) is used in the same way.

The indeterminate numeral "some," "a few," is expressed in Tagalog by idin. With the first syllable reduplicated or with lámang the idea of "only" is expressed; as, idin or idin lámang (only a few).

"Much," "many," and similar words are expressed by marami (from dami), and "a great many" may be translated by maraming marami. By making an abstract of dami and prefixing the definite article of common nouns is expressed "the most," "the majority," etc. Ex.: Ang haramihan.

For the meaning of the numerals, see the work by T. H. Pardo de Tavera, entitled "Consideraciones sobre el Origen del Nombre de los

Números en Tagalog," published at Manila in 1889.

ORDINALS.

The ordinals, which are the numerals designating the place or position of the object in some particular series, have more of the character of adjectives than have the cardinals. They answer the question Ikailan? (In what order?) and are formed in a very simple manner in Tagalog for all numbers except "first," which is quite irregular, ika being prefixed to the cardinal. It should also be noted that the first syllable of dalawá (two) is omitted, as well as the initial letter of tatló (three) and apat (four) when preceded by ika. "Twentieth," however, is formed with ika and the entire cardinal.

The ordinals up to "tenth" are:

The first. Ang naóna. The second. Ang ikalawa. The third. Ang ikatló. Ang ikápat. The fourth. The fifth. Ang ikalimá. Ang ikánim (initial letter dropped). The sixth. Ang ikapité. The seventh. Ang ikawaló. The eighth. Ang ikasiyam. The ninth. The tenth. Ang ikapouó; ang ikasangpouó.

In the southern provinces ang ikapoló is sometimes heard, due to Bicol and Visayan influence. Polo and pol-lo is also to be found in the dialects spoken to the north of the Tagalog region, and this form may be found in the north, but should be regarded as extraneous to the language.

The following synopsis of the ordinals above "tenth" will give an accurate idea of their formation:

The eleventh. Ang ikalabing isá. The twenty-fifth. Ang ikadalawang pouo't limá. The thirtieth. Ang ikatlong poub. Ang ikápat na pouó. The fortieth. Ang ikápat na pouó't limá. The forty-fifth.

iftieth. ixtieth. eventieth. ightieth. inetieth. ne hundredth. ne thousandth. ne ten-thousandth. Ang ikalimang poub. Ang ikánim na pouó. Ang ikapitong pouó. Ang ikawalong pouó. Ang ikasiyam na pouó. Ang ikasangdáan. Ang ikasanglibo. Ang ikasanglaksá.

uns following ordinals are tied to them according to the ending of umeral. Ex.: Ang ikalimang tauo (the fifth person); ang ikaliong arao

Tagalog, contrary to what obtains in Spanish, the ordinals are used l days of the month, and thus agreeing with English. Ex.: Ikailán īgayón nang buang itó? (What day of the month [is] this?); ang ikada-

r̄gayón nang buang itô? (What day of the month [is] this?); ang ikadag pouô't pitô (the twenty-seventh). Anong árao kayá r̄gayón sa sang(What day of the week is to-day?); Ngayo'y viernes (to-day is FriAnong taôn? (What year?); sanglibo, siyam na ráa't limá (nineteen
red and five). Anong buan r̄gayón nang taôn? (What month is
); ang buan nang enero, pô (the month of January, sir). Anó ang
ulan mo? (What is your name?); Glicerio, pô (Glicerio, sir). Ang ikag parīgalan (The second name [surname]?); Manalo, pô (Manalo, sir).
saán ka? (Where are you from?); Batangas, pô (Batangas, sir).
ka nang taôn? (How old are you?); Mayroón akong dalawang pouô't
(I am twenty-five years old). Saán naroon ang presidente? (Where is
residente [mayor]?); Nariyán sa ikalawang báhay (There in the second
≥). ₽).

actions are expressed by the use of ang (the) if the numerator is one, enominator being the ordinal desired, and bahagi (a part) following enominator either expressed or understood. Numerals may replace Ex.: Ang ikalawang bahagi (the second part); ang ikapat (the h), etc. Also isang bahagi (one part); tatlong bahagi (three parts). re the numerator is greater than one it is placed in the nominative the denominator in the genitive, the two being connected by nang and phrase followed by bahagi. Ex.: Tatló nang ápat na bahagi (three-

ters); dalawa nang tallong bahagi (two-thirds).

Iali'' is expressed by kalahati, as kalahating tinapay (half a loaf of i). The noun "a half" is expressed by kahati, meaning generally a

f-salapi or 25 centavos.

should be mentioned that unauna means "in the first place," and nade an abstract and preceded by the definite article of common s, as in the phrase ang kaunaunahan, means "the very first." In like ner, huli (last), when made an abstract in the same way, as ang kahulian means "the very last."

ADVERBIAL NUMERALS.

verbial numerals, expressed in English by "once," "twice," etc., and ering the question Nakailáni (past tense) and Makailán (present future tenses), "How often?", "How many times?" are formed like rdinals except that maka is prefixed instead of ika to the cardinals. word for "once" is wholly irregular. In some districts these adver-numerals also express the idea of "fold," as "twofold," "threefold." ith the cardinals the sense of "only" may be imparted by reduplig either the first syllable of the prefixed particle or following the rbial numeral with lámang.

Minsan, var. ninsan Nine times. (rare). Ten times. Fourteen times. e: Makalawá.

Makasiyam. Makasangpouó. Makalabing ápat. Thrice. Makatatló. Twenty times. Makadalawang Makaápat, var. mapouó. Four times. Makadalawang kaipat (rare). Twenty-five times. pouó't limá. Five times. Makalimá. One hundred times. Makasangdáan. Six times. Makaánim. Seven times. Makapitó. A thousand times. Makasanglibo; Eight times. Makawaló. makalibo.

Naturally, as in all languages, the restrictive form is not used for very high numbers.

Only once. Miminsan. Only three times. Mamakatatló. Mamakatatló.

In this connection it should be remembered that kailán? means "when?" used interrogatively.

DISTRIBUTIVE NUMERALS.

These numerals, expressed in English with "by" between the numerals, as "one by one," "two by two," etc., answer the question Ilán ilán! (How many at a time?) and are formed in Tagalog by the simple repetition of the cardinal if bisyllabic, or the first two syllables thereof if longer, no tie being used.

One by one. Isáisá. Two by two. Daladalavá. Three by three. Tatlótatló. Four by four. Aputápat. Five by five. Limálimá. Animánim. Six by six. Seven by seven. Pitópitó. Eight by eight. Walówaló. Nine by nine. Siyamsiyam. Ten by ten. Sangposangpouó. Labilabing isá. Eleven by eleven. Twelve by twelve. Labilabing dalawá. Twenty by twenty. Daladalawang pou6. Sangdasangdáan. One hundred by one hundred. One thousand by one thousand. Sanglisanglibo.

Nouns repeated in this manner acquire the idea of "every."

Every day; daily. Weekly (also every Sunday). Yearly; annually. Hourly.

Lingo-lingo. Taón-taón. Ocas-oras (from Sp., hora).

Arao-árao.

The Tagalog word for "every" is turi, which may also be used. Distributives, answering the question Tagitlant (How many to each one?) are formed by prefixing the particle tig to the cardinals, the first syllable of the latter being reduplicated in those greater than "four". The first syllable is dropped from dalawá and the initial t from tatló.

One to each one. Tigisá. Six to each one. Tigaúnim. Two to each one. Tigalawá, Seven to each one. Tigpipitó. Tigatló.Tigwawaló. Three to each one. Eight to each one. Tigʻipat. Four to each one. Nine to each one. Tigsisiyam. Ten to each one. Tiglilimá. Five to each one. Tigsasangpouó.

These may be also translated by "one apiece," etc.

Tig prefixed to cardinals may also express the stamped, coined, or fixed value of money, stamps, etc. In this case the initial syllable of those numerals above four is not reduplicated. Na is now more generally used

than tig for this purpose. Ex.: Seyong tigalawang centaros (a two-cent stamp); salaping tigdimang pisos (a five-peso bill or gold piece); tigalawang poutong pisos (a twenty-peso bill or gold piece). It must be borne in mind that the Philippine peso is equal to a half dollar United States currency, and that it is the legal currency in the islands. Hence the old debates over "gold" and "mex." should be relegated to the past.

In the southern dialect tig is sometimes used to express the time at which something may be done or has been done, as in tigaga (to do something in the morning); tighapon (to do something in the afternoon).

The particle man, prefixed to nouns denoting money, weights, and measures, imparts the idea of "each," "apiece," etc. This particle causes cuphonic changes with some initial letters of roots, as follows: b and p change to m, the final n dropping from the particle; initial c(k), and q drop out, modifying n to ny; s and t drop out; d drops out in most cases; initial m, n, and ng also drop out, and an initial vowel (a, i, o, and u) modifies the final n of the particle to $n\tilde{y}$.

The former monetary system was founded upon the salapi, or half peso, nominally worth 25 cents at a gold basis, and now restored to that value. idapt also means money in general. The peso of one hundred centavos is worth two salapt. In the old system the salapt was divided into 80 cuartos, and upon these the people reckoned their market and other minor transactions. As these values and terms will linger for some time to come, especially in districts where Tagalog only is spoken, the following examples

will prove of use:

A pero each or apiece. half peso each or apiece.

half (salapi) each or apiece. A real (12) centavos) each, etc.

half real (6] centavos) each, etc.

A cuartillo (5 cuartos or \$0.03125, or 🖚 ().()()(25) each, etc.

A Cuarto (\$0.00625, or \$0.0125) each,

Mamison. Manalapí.

Mangahati (from kahati, 25 centavos). Manikápat (from sikápat, a contraction of sa ikúpat, to the fourth of a salapi)

Manikoló (from sikoló, a contraction of sa ikawalo, to the eighth of a salapi). Mangaliu (from aliu).

Mangualta (from cualta, a corruption of cuarto).

The only measure of weight incorporated into Tagalog appears to be the tikil (from the Chinese tael, which was a very uncertain standard). By treaty the haikwan tael or customs tael of China is now 33 ounces avoirdupos. As a monetary unit the haikwan tael varies from 55 to 60 cents, but is only quoted in banking operations and is not used by Tagalogs.

The Philippine táhil may be regarded as elightly heavier than a troy ounce, weighing 509.75 grains, the troy and apothecaries' ounce weighing 480 grains, and the avoirdupois ounce 437½ grains.

One táhil each. One pound Spanish each.

Rice and grain is sold by the caván and its fractions, which are as follows:

One "apatán" each. One "chupa" each.

One "ganta" each.

One "caván" each.

Mangapatán (0.1981 of a pint, dry). Mangatang (4 apatán or 0.7925 of a pint). Manalop (8 chupas or 3.1701 United

States quarts) (from salop). Mangabán (25 gantas or 19.81 gal-

There are 8 gallons to the United States bushel. United States dry To reduce United measure is slightly different from British imperial. States to British divide same named measures by 1.031516, and to reduce British to United States multiply by same. For common purposes use 1.032, which is close enough. Trautwine.

A "caván" of rice weighs 133 "libros."

One "picul" each.

Mamikul (137.9 United States pound Two piculs constitute a "bale" hemp, abaká).

The metric system is now official in the Philippines, and its use is gradually spreading total sections.

Among the native measures of length used with men are the following:

One inch each.

Mananal (from sungdal, which in turn is contracted from sung-"one," and daliri, "inch").

The Spanish inch is 0.91 of an inch. Daliri also means finger or digit, and the length of a Tagalog "inch" almost exactly corresponds to the "digit" of the early Hebrews, which was 0.912 of an inch. Daliri also means finger or digit,

One "span" each.

Manangcal (from dangcal, a "palm").

The American "span" is 9 inches, while the Tagalog dangeal is one-fourth of a vara, hence 8.25 United States inches.

One "vara" each.

One "braza" each.

Mamara (from vara, a Spanish yard, equal to 33 United States inches, approximately, and actually 0.914117 of a yard).

Mandipá (from dipa, a braza, equal

to 5 feet 5.8 inches United States, approximately 51 feet).

To express the idea of "at such a price apiece" the former monetary units were used with in (hin) suffixed to the unit, of which the initial syllable was reduplicated. The article or object of which the price was to be denoted preceded the unit of value, the two words being linked with the appropriate tie, according to the ending of the first word. Ex.: Pipisohin (at a peso each), librong sasalapiin (books at a half peso each), tiná-

pay na sisicapatin (bread at a real a loaf), tabacong aaliuhin (cigars at a cuartillo" apiece). These terms will now only be found used with those people still unfa-

miliar with the new currency, but as these people speak only Tagalog as a rule they will naturally retain the old terms the longest.

The following dialogue fairly represents what may be said in making a purchase in the market:

A. Magkano bagá ang halaga nitó! (What is the price of this?)

B. Isang pisos, pô (a peso, sir).
A. Mahal na totóo iyán (that is too dear).

B. Hindi pô't mura (no, sir; cheap). A. Anong mura? (How [is it] cheap?)

B. Kayó na'y tumauad (you set a price, sir).

A. Tatlong pesetas ang idioigay ku (1 will give a pasetas, p6 (1 can not do it; 4 pesetas, p6 (1 can not do it; 4 pesetas, Tatlong pesetas ang ibibigay ko (I will give 3 pesetas [60 centavos]).

sir).

Mabuti (very well [offers a peso]).

B. Wald akong sukli, po (I have no change, sir).

A. Dald mo nga sa aming báhay, doón babayaran kitá (bring it [them] to our house, we will pay [you] there).

B. Malayo yatáf (Is it far?)

A. Hindi, at doon lamang sa may cuartel (no, it is there close to the bar-

racks [quarters]).

It should be borne in mind that "magkakano" is used when pricing objects of which a part only is desired, such as eggs, bananas, etc. "Magkano" indicates that the entire quantity is priced.

The verbalized forms of the numerals will be given under the respective

particles, as too lengthy explanations would be required in this place.

SECTION SIX.

THE ADVERB.

By the name of adverb is distinguished that class of words used to modify the sense of a verb, adjective, participle, or other adverb, and usually placed a car what is modified, as he writes well, I readily admit, you speak correctly, repy cold, naturally brave, very generally acknowledged, much more clearly.

All but one of the foregoing are from the Century Dictionary.)

Adverbs may be classified, according to the same authority, as follows:

(1) Adverbs of place and motion, as here, there, up, out, etc. (2) Of time and succession, as now, then, often, ever, etc. (3) Of manner and quality, as, thus, well, truly, faithfully, etc. (4) Of measure and degree, as much, re ore, very, enough, etc. (5) Of modality, as surely, not, perhaps, therefore, etc.

According to Earle, one of the most distinguished authorities on English,

there are three kinds of adverbs, the flat, flexional, and phrasal.

(1) The flat adverb, which is a noun or adjective used in an adverbial resition, is not considered as correct in books and papers, but is to be heard daily in conversation, as in walk fast, walk slow, speak loud, speak low, etc. In German, this form of the adverb is also literary, as ein ganz schones Hereus (a wholly beautiful house); er schreibt gut (he writes well [lit., good]). Adjectives of certain classes may be used this way in Tagalog, and especially those of manner or degree, such as magaling (well); masamd (badly); medult (quickly, briefly), etc., which are also adjectives. There are also flat adjectives by signification, which are explained under the section to which they belong by meaning.

(2) The flexional adverb, which is that distinguished by a termination in English and allied languages like ward, ling, long, meal, and ly, as in backward, darkling, headlong, piecemeal, and the great number in ly, such quickly, quietly, rapidly, etc. Tagalog has no particle which thus marks

out an adverb from other parts of speech.

(3) The phrasal adverb, which is also called an adverbial phrase, is greatly used in English, and is to be found in abundance in Tagalog. Among English examples may be cited at best, at length, by all means, for

good and all, on every side, etc.

There are also both in English and Tagalog what may be styled the adverbial pronouns, such as yes and no, together with the negatives not, nor,

and neither.

Unlike English adverbs nearly every Tagalog abverb may be made into a verb if the proper particle is used, and the border between adverbs and prepositions is very indefinite in some cases and must be determined by the aid of the context.

As the form and composition of a word is subordinate to its meaning, the Tagalog adverbs hereafter considered will be classified according to mean-

ing, irrespective of form.

I. Adverbs of place and motion which answer the question shan! "where?" are usually expressed in Tagalog by sa followed by a root. This root sometimes has the expulsive particle i prefixed.

Sáan.

Where. Where? Where indeed? Anywhere, wherever, somewhere. Everywhere. Nowhere. From all parts, may also mean to or

Sáan! Sáan ñga. Sáan man. Sáansáan man. Sáan reduplicated. Sáan ma'y walû. Sa sáan man.

in all parts. Where are you from?

Taga sáan ka? Siyá "he" and silá they" may be used in place of ka.

Sáan may be verbalized with um inserted, forming sumáan (to be some where permanently), and also with ma (na), in the latter case taking the idea of to be somewhere either temporarily or permanently, as the case may be. Ex.: Nasáan ang mababao na ilog? (Where is the ford of the river?); Masasáan siyá bagá? (Where will he be?).

Sian may be further verbalized by pa, in which case "to go" is inherent in the meaning. Ex.: Napasian siyat (Where did he go?); Napasusian

siyá? (Where is he going?); Pasasáan siyá? (Where will he go?).

Súan has been corrupted to húan in some districts, owing to Bicol and

Visayan influence, the former using haen and the latter hain.

Sáan has an entirely different meaning with pa following or even alone in some cases, expressing a negative idea similar to "not yet," etc. Ir

Ilocano saan is also the negative participle "no."

Saan par also means "where then?" in rather a sarcastic manner. With di added to sian pa an affirmative interrogative meaning is expressed, as Saan pa di totoo! (How can it not be true?).

It must also be noted that in Manila and places where Spanish is largely spoken that some particles are used in a different manner than is the custom in rural districts. Thus, "Where are you going?" is expressed in the country by saan ka paroroon, but in Manila by saan ka paparoon. Other expressions of like nature are Sian any paroroonan mot in which the definite is used, and sian ka nagmulat (Where did you start from?). Another similar question is S_0 and ka na $\tilde{n}qaq d ling?$ (Where are you coming from?). The answer is generally given with sa in the sense of from: SaMalabón (from Malabón); sa Imus (from Imus); sa báhay ko (from my house), etc.

There are four simple adverbs of place, which have heretofore been explained at length, and here only some idiomatic uses will be set forth.

These adverbs are dini, ditó, diyán, and dóon.

Dini, meaning "here" (toward the speaker), is verbalized by um, in the sense of taking a place near the speaker, etc. Ex.: Dumini ka (take your place here); dunquidini akó (I am taking my place here); dunquini akó (I took my place here); dirini akó (I will take my place here).

With mag (nag) it is verbalized in the transitive sense, requiring an object.

pject. Ex.: Magrini ka niyang tinépay (put some bread here by me). With pa the idea of motion toward the speaker is expressed. Ex.: Parini ka (come here toward me). This last form may be further compounded with the particle pa, definite, corresponding to magpa, indefinite, to express the idea of commanding, requesting, etc. Ex.: Paparinihin mo si Carlos (tell Carlos to come over here). "Over there" is expressed by

Dito, meaning "here" (equally close to both speaker and person addressed), is verbalized in the same way as dini. Ex.: Dumitó ka (take your place here); paritó ka (come here); paparitohin mo si Carlos (tell Carlos to come here); Pinaparitó mo siyá? (Did you tell him to come here?). The four adverbs under discussion admit the definites of i and an. That in i is compounded with ka, forming ika, ikina; and in may be used when united with pa, the definite of magpa, as may be seen in the last two examples. The future is Papariritohin mo siyá? (Will you tell him to come here?) and the present Pinaparirito mo siyá? (Are you telling him to come here?). Reason or cause is expressed by ika, ikina prefixed to the adverb as a rule, although "why?" can also be expressed by ano; as in Aanó ka rith! (Why although "why?" can also be expressed by ano? as in Aanó ka ritô! (Why are you here?). The more idiomatic way, however, is with ikina, as Anó any ikinaparitô mo? (What was the reason you came here?). Han is used if the idea of place is to be made emphatic, as Sino bagá ang pinaritohan mo? (Who did you come here to see?). "Time" is generally expressed by panahón, which also means "weather," as Anô! t di ka naparitô sa kapanahonan! (Why didn't you come here in time?). "What" is expressed by anó, as Nagananó ka ditô! (What is your business here?); Magaanó siyû ditô! (What is he going to do here?); Anhín bagá! (What of that?) or (What is there to do?): Inaganó ka! (What is heing done to you?): Inaganó ka! (What there to do?); Inaanó kaf (What is being done to you?); Inanó kaf (What was done to you?); Hindí ka maaanó (nothing can be done to you). Dumitó, with the particle magka and its variations, significs "to come here for a particular reason or cause." Ex: Ay at nagkadumitó ka! (For what particular reason did you come here?); Ang ipinagkakadumitó ko'y si Cabesang Tomás (the "cabeza" Tomás is particularly responsible for my being here).

The first of these two sentences is indefinite, grammatically speaking, and the last definite. For their grammatical construction see the particle magka, which is used with this signification with all four of the simple activers of place under discussion. For a tabular conjugation of dito see the tables of verbs. To express simply the time or reason for "coming re," i with pa may also be used, although ikina is more correct. 1726 ang ipinarité mo? (Why did you come here?). The indefinite is more LEGUAL with kailán, "when." Ex.: Kailán ka naparité? (When did you

Dene here?); Kahapon (yesterday).

Diyán, "there" (near at hand), has the same construction as the fore-Ding adverbe. Ex.: Magdiyán ku nang tübig (put some water over there).

Doon, there, yonder, is perhaps more commonly used in its various

difications than the other three simple adverbs of place. It may be Pand magka modify the d to r.

Ex.: Irumoon ka (station yourself there). Parson ka (go there). Paparin mo si (arlos (tell Carlos to go there). Pinaparson mo siyá? (Did Ou tell him to go there?) Sáan ka parorson? (Where are you going?) Inne localities, notably Manila, repeat the particle pa with the present that I ture of the adverbe of place; but this is irregular and incorrect. It is unknown to the early writers. Alina banan anaparorson manifest (When Inknown to the early writers. Aling bayan any paroroonan mo? (What are you going to? Lit. "Which town will be your going place?") Aling bayan ang paroroonan mo? (What Are's ang ikinaparoroon mo sa Maynild! (Why are you going to Manila? Lit. "What the cause of going there your to Manila?") Ay at magkadecembon ka? (For what particular reason are you going there?) Ang ikiparoroon ko'y dalauin ang áking kapatid na babaye (I am going there to visit my sister).

Magka prefixed to doon alone means "to have."

Ex.: Kung magkaróon saná akó nang maraming pilak, ay hindi akó magker kenganito (If I had plenty of money, I would not be in this fix). pirogkakaroonan niya ang Bulacan (He has considerable property in Bula-(she] has plenty on account of the inheritance to him [her] from his [her]

The foregoing illustrates the indefinite idea of the third singular personal pronoun, which may mean either "he" or "she." In English this is confined to the plural, "they" indicating either sex, as Tagalog silú, while spanish distinguishes by ellos, "ellas." Man gives the idea with dóon, "to be there," "to have there," magka indicating really "to have plenty."

Ext. Picture magical mandiam (take one of those over there), isang Ex.: Bigyán mo silá nang mandóon (take one of those over there), isang mandóm (sangdóm) (one out of many things over there); sandóm glamitang subà (a small bottle of vinegar); isang madoróm (a person who has plenty). The word may prefixed to doon forms the well-known and muchused indefinite mayroon, to have. Ex.: Mayroon kang baga nang tinapay? (Have you any bread?) Mayroon kang paroroonan? (Do you have
to go there?) Oo siga, mayroon akong paroroonan (Yes, indeed, I have to
to go there?). Mayroon ka nang ilang taon? (How old are you? Lit. Have
you of how many years?) Mayroon akong dalawang pout (I am twenty;
lit. Have I twenty.) With some suffixed particles doon is modified as
follows: Doon din (in the same place there); doon so ibd, doon doo (in another place): at doon (over there): at doon man (anywhere over there)

other place); sa dons (over there); sa dons man (anywhere over there).

Many phrasal adverbs are made by the particle sa which means among other things at and in when placed before a root. Among the most important phrasal adverbs of place with sa are:

In front; facing.

In the presence of; before; opposite; to the front. Behind; back of.

Joined to. At the edge or side of. On the other side of; beyond.

Outside. Inside; within.

Above; up.

Below; down.

Sa tapat; tapat sa. Ex.: Itong báhay ay tapat sa silangan (this house faces the east). Tapat has also the idea of setting out in rows, regular order, etc., such as trees, plants,

Sa hárap. Sa hárap nang capitán (before the captain).

Sa likod. Ex.: Ang mangá báhay sa likod nang cuartel (the houses back of the barracks). Ang liked (the back).

Sa piling.

Sa tabl; synonym sa stoing.
Sa kabild. With mag the idea of "both" is brought in. Ex.: Sa magkabila (on both sides); and by the reduplication of the first two syllables of the root the idea of "all" is expressed. Ex.: Sa mag-kabikabila (on all sides). Napa-roón silá sa kabila nang ilog (they went over there beyond the river). Sa magkabild nang katauan (on both sides of the body). Kabild has also the idea of "partly" and is used idiomatically when speaking of rice. Ex.: Itong kanin ay kabilan (this rice is but half cooked). In speaking of anything else, with the same idea in mind, the usage is quite different. Ex.: Rong sisiu ang kabild'y luid't ang kabild'y hindi (this chicken is partly cook and partly not).

Sa Inbás. Sa loob. This phrase is much used to express the idea of the heart, speaking in a moral sense. Ex.: Sa tanang 160b (whole-heartedly; with all the heart).

Sa itáas (from táas and expulsive

particle i).

Sa ibaba (from baba, idea of low, humble, with expulsive particle i). This word should not be confused with the following.

Upon; on; above.

Under; beneath; at the bottom of.

Halfway (between two points).

In the middle.

Around; about; close to.

As far as; up to.

To the right. To the left. Forward. Backward.

At home; in, to, or from the house. In, to, or from town.

In, to, or from the country.

In, to, or from the country.

These adverbial phrases can be indefinitely increased by the use of sa with the proper root.

Toward.

- proaching.

Sa ibabao (from babao and i). Ex.: Sa ibabao nang bundok (upon the mountain [mountains]). Babáo, with accent upon the last syllable, means past, as babáo sa hating gab-i (past or after midnight). It also means "near" in some places. Ex.: Babáo bagá ang bayan sa atin! (Are we perchance near the town?) Malápit is now the ordinary word used for "near."

Sa ilálim (from lálim, root of idea of depth and expulsive particle i).

Sa gitud. Ex.: Nasagitud tayo sa paglakad (we are halfway in the march [trip or journey]).

march [trip or journey]).
Sa pagitan (from gitn4). Sa pagitan
nang lansañgan (in the middle of
the street). Also means "term."
Ex.: Walong buan ang pagitan
(a term [period] of eight months).
Sa may. Ex.: Sa may cuartel (close

Sa may. Ex.: Sa may cuartel (close to the barracks).

Hangán. Ex.: Sáun ang tungo mo? (Where is your trip to?) Hangán Maynilà. Hangán ditó (up to here). Also has the meaning of "until." Ex.: Hangán búkas (until to-morrow).

Sa kanan. Sa kaliwa. Pahárap. Patalikod. Sa báhay. Sa bayan. Sa búkid. Sa bundok.

Dako. Ex.: Dako sáan ang tuñgo ni Juan! (Toward where is John's trip?) Dakong Maynilà (toward Manila). Dako sáan ang tuñgo mot Toward where is your trip?) Dakong bayan ko'y ang tuñgo ko (my trip is toward my town). Taga sáan ka! (Where are you from)? Bosoboso, pô (Bosoboso, sir). Dakong kanan (toward the right). Dakong kalind (toward the left). Dápit. Ex.: Dápit Maynilà (approaching Manila). Dápit ibabó (approaching the lower country).

Dápit. Ex.: Dápit Magnilà (approaching Manila). Dápit ibabá (approaching the lower country). Dápit sa iyó (approaching you). Dápit has also an idea of "beyond," "on the other side of."

I. Adverbs of time and succession, which generally answer the questions kailán? (when?), are quite numerous in Tagalog, showing that the ception of time was well developed for a primitive people, only the language, except as developed its subdivisions being unknown to the language, except as de-

rived from Spanish. However, the day was quite minutely subdivided according to the position or absence of the sun, and while now generally out of use these terms are also given.

Kailán man (always). With negative, translated by never. Ex.: Kailan man-hindi-(always not or never). Kailan man siyay hindi ungmiinum nang capé (he [she] neverdrinks coffee). Kailin pa man (no more), also kaikailan ma'yhindi. Di mamakailan (many times).

Kailán f Ex.: Kailán silá naparitó! (When did they come here?)

When (used relatively).

(1) Kun. Commonly used only with present and future tenses, but may be used with past indefinite if action is represented as customary-Ex.: Kun daráting ang capitán = alamin mo akó (when the captair comes, let me know [future])-Kun akô y naroroon sa Maynila napasasaluneta akong (when I was in Manila I often went to the Luneta [past time with

customary action]). Kun tuwe (whenever). Kung minsan (sometimes). Kun is also used as a preposition, "if". See under "if". (2) Nang. Used with both definite and indefinite past tenses. Ex.:

Nang silá' y dinálao niyá kagabi, walá ritó silá, (when he came to visit them last night, they were not here). Nang dumating siyá naka-kain na akó (when he came I was

through eating).

(3) Noon, niyón, niyóon. These words mean really "in those days," "at that time," etc. Ex.: Noon isang árao ay nangyari ang pagbabaká sa Imus (on that day he fight at Imus took place). Noon, narito pa sa Maunità ang mangá Castila (while the Spaniards were yet here in Manila). Perhaps "then" in some cases would be the best translation.

Doon. Ex.: Kun kumain ka, doon maaalaman mo, kun anó ang kanin (when you eat then you will know what you are to have). With pa following doon has an idiomatic use. Ex.: Bath pa'y gumagand nang ganito, doon pa kun lumaki? (A boy yet, and doing so, what will be be then when grown up?)

Tuwi. Ex.: Tuwing tuwi (tuwi nang tuwi) mayróon kang gawd (you have something to do always). Tuwing sumúlat ka——(whenever you

Then.

Always; constantly (sometimes "whenever").

write—). As adjective tuwi means "every." Ex.: tuwing arao (every day). In some cases it means "as long as." Ex.: Tuwing di mapoul ang pagkatauo (as long as manhood is not extinct).

Among other expressions may be mentioned walang humpay, without end; walang likat, without fail; walang tahan, without stop, incessantly; walang togot, without rest.

There are two expressions used for "eternally," formed with the prefix magpa to a root which is followed by man sáan. Ex.: Magpatúloy man sáan; and magparáting (dáting) man sáan. Another phrase is magpakailán man, or magpasakailan man, both of which signify always.

Kailán man--hındi.

Kung minsan. Maminsanminsan, (from time to time; now and then). Misandouá (rarely). Ex.: Misandoua lámang ang pagparitó mo (your coming here is rare).

Bihira. Ex.: Bihirang tungmatangis itong batang itó (this child seldom cries).

Malimit. Ex.: Malimit akong sung-

musulat (I write often).
Tambay. Ex.: Tambay kang nalis

(ungmalis) (since you left).

Mulá. Ex.: Mulá kahapon (since yesterday). The particle pagka sometimes denotes "since," as in the phrase pagkabatà ko (since my childhood). "From" would be an equally correct translation.

Kamaka (from ka and maka). Kamakailang árao (some days ago). Before a cardinal followed by árao, "day," kamaka indicates the number of days which have elapsed. Ex.: Kamakalawá (day before yesterday), lit., "two days ago;" kamakalimang árao (five days ago). Ka prefixed with pa following a root also indicates "since." Ex.: Kahapon pa (since yesterday). Ka alone indicates past time, with some roots. Ex.: Kahapon (yesterday), from hapon (afternoon). Kagabi (last night), from ka and gabí (night)

Sa, used adverbially, denotes immediate action, usually beginning a subordinate clause, which refers to a principal clause. Ex.: Sa pagkamálay niyá nang lindol niyá y tungmakbó sa labás (as soon as he

a. This particle is in constant use and is always placed last. E≤ Na. Naparôon na siyá (he has go116 already). There are many other uses of na in Tagalog, which w be set forth as they occur in the examples.

This particle, as an adverb, i like na, always placed after the word modified. Ex.: Isa pa (or yet); may rian pas (Is there any thing there yet)? It is also use speaking ironically. Ex.: Akô p ang paroroon! (Will I have to g there yet?). Indt pa (not yet).

ago. Ex.: Bago kang bumasa,

Bago. walisan mo ang silid (before you read, sweep the room).—L. Bago pa (a while ago). Bago, as an adverb of time, always precedes the

verb it modifies.

Kangina, variation kanina. Kañginang tanghali (before noon); kanginang umaga (this morning a while ago). Balanain mo yaong sinabi kangina (go back to what you were talking about before). [Return to the thread of your story.] Kañgikangina pa (a little while ago, a short time ago). Ex.: Kangikangina naritó silá (they were here a short time ago).

Sa una. Sa una pang sa una (very anciently). Ex.: Sa unang árao (in the days of old). Muna, which always follows its verb, means "first" either in time or place. Ex.: Mások ka muna (you enter first [polite expression]). Bago kumain ka, manhinao ka muna (before you eat, wash first [i. e., your hands]).—L. Gawin mo muna (do it first [def.]). Hintay ka muna

work or duties).

Mamayd. Ex.: Susulat ako mamayd (I shall write by and by).—L. Mamayang hapon (later in the afternoon). Mamayamayd (one time or another, little by little). Ex.: Itô'y minamayumayd ko (I did this little by little). Magmayd (to do anything little by little). Magpa imparts the idea of waiting to this root and its combinations. Ex.: Nagpapamayamayd ako (I am going to wait a little while).

Tambing. This word is out of use in Manila. Ex.: Kumain ka tambing [indef.]; tambingin mo kumain [def.] (eat at once). Tambingin mong kunin (take it at once); itambing mong ibigay (give it at once).

Agad. Ex.: Agarin mong gawin (do it at once). Commonly used in Manila.

Alipala. Ex.: Alipala nagálit siyá (he became angry at once). Also means "one by one" in some places. Ex.: Alipala'táking kunin (I will take them one by one).

Kagiat. Ex.: Kagiat nagtagibulag siyá sa aking matá (like a flash he disappeared from my view; he was out of sight instantly). Tagibulag, idea of disappearing or becoming invisible.

Kaginsaginsa (from ginsa, repetition of root and prefix ka). Variation kahinsahinsa. Kaalamalam sometimes means suddenly (from alam reduplicated, and prefix ka). Karakaraka.

Magumaga na.

Kapagka —. Kapagkapagáral ko (after I had finished studying).— L. Kapagkaraka (from the beginning; since time eternal).

Hangán. Ex.: Hangán búkas (until to-morrow). Hangán nabubúhay niya (while he [she] is living). Bagkus also means "until".

Sa mantala.

Maaga (from aga, morning). Ex.: Magtipon kang maaga, kung dumb-ting ang arao, houag kang ngumopangapa (get ready early, so when day breaks you will not be grop-ing around looking for anything). Ngapa, root of "to look around

in haste for something".—T. P., 3-Huli. Ex.: Nahuli siya (he was late). Ang huling arao (the las day).

Kahapon. Kahapon sa hapon (yes-terday afternoon). Kagabi.

Ngayón árao

Bukas. Búkas sa aga (to-morrow morning).

Tanghalt (evidently from Malay, tanga ari, with the same meaning).

Ex.: Anong horas ang idinding niyá! (What time [hour] did he [she] come [arrive]?) Ang idinating niya ang tanghali (he came [arrived] at midday [noon]). Magpakatanghali (to wait until noon). Ang ipinagpakatanghali (the cause of having been delayed until noon). Mananghali (to work or eat at noon). Ang pananghalian (what done or eaten at noon). But mananghali, with acute accent, means to travel at midday

Búkas. Ang kabukasan (the follow-ing day). Walang bubukasin (without care for the morrow). Ex.: Búkas kung makalipas, salingo kung makalampas (to-morrow when passed, on Sunday when gone).— T. P., 160. Really means "to-morrow and to-morrow and to-morrow," Shak., when there is no reason to believe that it is intended to do anything. Bukás is the root

of the verb "to open," and is only distinguished by the accent. Hating gabî.

Lungmubug na. Another expression is lungmunod na (lit., "drowned now").

Masilim na. Also takip silim.

Gabi na.

Kaboong gabi. The usual word at present is hating gabi.

Oras-oras (from Sp., hora, "hour"). Arao-árao. Lingo-lingo (from lingo, "week," which also means "Sunday," and is derived from Sp., Domingo, "Sunday"). Buan-buan (from buan, "month and moon"). Taón-taón (from taón, "year"). Parati. Verbalized, this word has the idea of "perseverance," and in the phrase magnerating man súan means "eternally." A synonym for parati, in the sense of "continually," is palági.

Some day.

The particle make, in addition to its meanings as a verbal particle, signifying power, ability, cause, etc., indicates completed verbal action with bof doing, saying, etc., translated by the word "after" with the verb.

Balang árao.

Ex.: Makayari nitô y paróon ka (atter you do this, go there).

III. Adverbs of manner and quality, which generally answer the question magno? "how?" are numerous in Tagalog, many adverbs of manner being the corresponding adjectives used adverbially, especially those compounded with ma. Not all ma adjectives can, however, be so used, and neither can adjectives which are roots by themselves be used as adverbs. Thus adjectives like maranony (wise), makeit (prudent, etc.), ulul (crazy) are not used as adverbs in Tagalog.

How?

Maanó? Ex.: Maanó kayó? (How are you?) Magaling (well). Maanó ang amá ninyb! (How is your father?)

So; thus; in this way.

Ganito (from diti).

So; thus; in that way.

So; thus; in that way. Like (requires genitive); thus.

Like; as; so. How large; how much in extent? Ganiyan (from diyan). Gumanya (to act in that manner). Ganoon (from doon).

Guyón (from yaón). Gumayón (to act in that way). Ex.: Gayón m Pedro si Juan (Juan is like Pedro).

Gaya.
Gaalinf Ex.: Gaalin kalayof (How far? [about]). Isang horas, po (one hour, sir.)

Ga has been quite fully explained under the comparative of adjectives to which the reader is referred. Among some examples may be quoted ga bató ang lóob mo (your heart is like stone), and gaitohin mo (make is like this). "Both alike" is expressed by kapouá, as may be seen by the examples: sauain mo kapouá silang dalawá (prohibit them both alike); ang kapouá mo táuo (like you, a person [fig., your "neighbor"]); alike wari kapouá mo, walang batt! (Am I perhaps, like you, without judsment?)

Intentionally; purposely.

Voluntarily; willingly.

By force.

Especially; only.

As well as, etc. As well as; conjointly.

Hurriedly or more quickly (said to be applied only to whipping).

Paked. Ex.: Pinaked nild (they did it intentionally). Syn., andiged Another word is tikis. Ex. Tinikis nild (they did it purposely). Kusd. Ex.: Kinusd bagd niyda (Did he [she] do it willingly). Kinusd niya (He [she] did it willingly). With verbs kusd followed the same construction as to the particles as do the verbs. Ex.: Kusain mong tauagin siyd (call him purposely, i. e., do not for get to call him). Ikusd mong idapon itó (throw this out purposely, i. e., you should have thrown this out yourself). Pagkusaan mong biguán si Juan (give it to John voluntarily). Kusd is intensified by reduplication. Ex.: Wald kang kusakusang gumawd nang anoman (you do not do anything with the least willingness).

least willingness).

Sa pilitan (from pilit). Ex.: Pilit na akć'y paróon (I am going perforce).

Bukod. Ex.: Bukod siyang natáwag (he was [has been] summoned especially). Bukod ka sa lahat (you are the only one among all). Marami man ang ginto'y bukod mayaman si Capitan Luis (there are many "principales," but the only rich one is Captain Luis). Tangt is sometimes used in this sense.

Akbay, var. agbay; agabay; agapay. Sabay. Ex.: Anglalaki kasabay nang bayabe (the man as well as the woman, or the male as well as the female).—L.

ibang makaparoróon (except you, there is no other person who can go there). Libán sa iyó ang muha, ay dili ko ibibigay (except that you are to be the one taking it, I should

not give it).

Tabi. Ex.: Tabi po, ako'y daráan (excuse me [for going before you, for leaving first, etc.].) This is the shout "cocheros" use, Tabi! It literally means thus: "Aside."

Tabi is also used for a polite correction or controlition. Singleth rection or contradiction: Singtabl sa iyo, hindi gayon (you will pardon me, but it is not just like that). Tabihan, refuse heap, rubbish heap, etc.

Bahagyd, var. bahagid. Ex.: Bahagid na makasiya (it is hardly sufficient).—L. A synonym is bulinyá.

Datha kong inabutan (I scarcely reached it). Bihirà also means "seldom." Ex., as "hardly:" Binibihirà ko na ang nagsiparité (I think scarcely anyone has come here yet). Bihirang di naparoon (scarcely anyone was not there); i. e., nearly everyone was there). Mahina pa siyá'y bihirang makalá-kad (she [he] is weak yet, and can hardly walk [is hardly able to walk]). Bihird is verbalized with mag and magka. Ex.: Pagbihirain mo ang kanin (change the food). Nagkakabihira siki nang pagdaramit (they differ in their manner of dressing)

Hálos. Ex.: Hálos namatay siy á (he [she] almost died). Ayon.

Alineanod (from sanod, to follow, obey)

Baliktad. Ex.: Baliktad ka niyán (indef.); baliktarin mo iyan (turn that inside out).

Touarik (from touad). Syn. touandik. Ex.: Touarik na bantá (light-

headed; injudicious).

Marahan (from dahan). Marahan dahan or dahan dahan, very slowly. Dumahan, to go away slowly. Magdahan, to go slowly. Magpakarahan, to go very slowly. Ex.: Well.

Carefully; in an orderly manner.

Badly.

Hard; roughly; vigorously.

Briefly; quickly.

Strongly.

Magpakarahan kang lumakad (go very slowly [indef.]). Pakarahanin mo ang paghila (throw it deliberately [def.]). Mapakarahan, to go very smoothly; slowly, etc. Ex.: Napakarahan na (it has slowed up already; it has quieted down already, etc.). There is also a definite with m. Ex.: Dahanan mo iyang gaud ma (do that work quietly, etc.). Met. adject. Ex.: Marahan ang lobo niya (he has a magnanimous heart). Inot inot, very slowly; "little by little" is not much in use. Louay louay, little by little, is about equal to whoa, etc., and is used generally calling to animals. Mabutin. Mabuting mabuti, very well. Syn. Maigi.

Syn. Manys.

Mahúsay. Mahúsay na mahúsay,
very carefully; in a very orderly
manner. Ex.: Itô'y gawin ningang
mahúsay (do this carefully).
Balotin mong mahúsay (wrap it up
carefully). Humúsay, to put in
order; to arrange; to disentangle.
Magpakahúsay, to arrange well;
settle things with care. Adj.
"well kept," etc. Ex.: Húsay
buhok (well kept hair). Ang hais
say (what disentangled or set
order). Husay na úsap (a car
ful conversation).

Masama. Masamang masama, verbadly. Ex.: Natúlogakong masam kagabí (I slept badly last night) Malakás. Ex.: Houag mo akong la

kasan nang pangungúsap (do notalk to me so much in such srough manner). Kalalakás kanglunákad (walk with vigor). Itnolak niyá nang malakás ang bangka (he pushed the banca [canoe] vigorously).

Madali, var. marali. Combined with both um and mag, an anomalous verb is formed, magdumali, to make haste, and in turn this is used with a noun to indicate time. Ex.: Magdumaling árao (a short while, or time). Examples as an adverb of madali are: Gavin mong madali (do it quickly); subin mong madali (to it quickly); subin mong madali (to it quickly);

hin mong madalt (tell it quickly).

Matibay. Ex.: Talian mong matibay (tie it strongly). Walang uunang tibay pagkasirà'y halinhan (there is no repairing stronger than to replace what is destroyed).—T. P.,

822. Manibay, to prop up; to support; to sustain. Ex.: Iyang batong ang pinaninibayan nang bahay (that stone is the prop of the house).

Magaling. Magaling na magaling, very finely. Ex.: Kungmain akong magaling (I ate finely). Ang nagagaling, person improving (as from an illness). Gumaling, to grow better (as a sick person). Maggaling, to prepare. Gatingin, what prepared. Mangaling, to improve greatly. Makagaling, to do good. Ex.: Ang manga gamot any siyang ikinagagaling nang manga mang ikinagagaling nang manga mang sakit (medicines are what cause the sick to recover). Magpagaling, to prosper. Magpakagaling, to improve; reform, or correct one's self. Ex.: Magpakagaling kayó nang manga ásal ninyó (improve yourselves in manners). Kagalingan, goodness. Ang pinagagaling, thing bettered (present tense)

tense).

Malimit. Ex.: Malimit akong naliligò
(I bathe often). Also name of a
close-woven basket made around
Bosoboso, Rizal Province.

Not expressed by a single word, but by phrases, the adjective maránong, wise, being expressed with the subject in the nominative, and the verb in the infinitive. Ex.: Maránong siyang umáral (he teaches wisely), not ungmaáral siyang maránong, which would be a proper construction if maránong were an adverb.

Matulin. Tumulin, to do anything swiftly. Magtulin, to go swiftly. Ang ipagtulin, the cause of going swiftly. Ex.: Papagtulinin mo ang bangká (make the banca [canoe] go swiftly). Matuling tumakbó to run swiftly). Katulinan [abst.)] swiftness).

This is found in Greek: "He is a fool to let slip a bird in the hand for a bird in the bush."

Sampun. When followed by nang, nito, naman, etc., the final n is

dropped. Syn., pati. Gagaunti (from unti, idea of a little). Ex.: Munting tubig (a little water). Kaunti, a little, as in speaking a

language, etc.
Sa sandali. Ex.: Houag kang mabalam doon, sumandali man lamang (do not delay there more than an instant). Sa isang kisap matá (in the twinkling of an eye).

Sáan pa dít var. Sa dít Sáan pa dí gayon? (Why not that way?)
At ano? Ay ano? (Who doubts it?)
At or ay joined with certain particles means "why?" Ex.: At differently Ex.: At de

(Why not?)

Mahanığa. Si mahanığa (better). Kon hanığahanığa (admirable). Kun danığan. Pakundanığan (for the sake of).

Verbalized tanto means t undertstand. Ex.: Natatanto mo (Do you understand it?) Dili ko p natatanto (I don't understand i

Totóo mandin. Also totóo din; totó nga; totoong totoo (very truly). Totoo manding totoo (very truly, indeed).

nga, var. nganit. Ex.: Siyá nga ang nagnakao (he is certainly the thief)

Din. (Changes to rin after some words.)

IV. Nearly all the adverbs of measure and degree have been fully explained under the comparative and superlative of the adjective. It may be noted here that the adverb is made superlative by the reduplication of the adverb, with the proper tie, in the same manner as the adjective. Many examples have been given on the foregoing pages. The only adverbs noted here will be lâmang, "only;" siyâ na; and sukat na, "enough."

.dverbs of modality, such as "surely," not, "perhaps," etc., have eated under other adverbs or will be included with the adverbial ns and expressions of affirmation, negation, and doubt. mative adverbs are fairly numerous in Tagalog. The principal are:

> o. Opó (yes, sir [or madam]). Oo nga and oo nganit (yes, indeed). Paóo (to say yes). Ang ipaóo (what said). Ang pinaoohan (person to whom yes has been said).

l: without doubt.

likewise; as well.

Pala. Siya pala (it is he, indeed). This word is used in asserting when a thing is certain. Ex.: Indt pala si Pedro ang nagnakao? (Is Pedro the thief without doubt?) Siya pala (he is, indeed). Kapala pa (it is clear). Ex.:
Kapala pa'y paroróon akó (it is clear that I am going there).
Kapala pa'y dt paroróon akó (it is clear [of course] that I am not going there).

Namán. Man (even). Disin. Ex.: Kun siyá'y susúlat disin, ay paroroon sana ako (if he should write, I would go there). Sana. Ex.: Ibig ko sana'y sumulat, ngunt't wald akong kapanahonan (I would like to write, but I have no time). Akó ang paróon sana, bago ikan'y naparitó (I had to go there, before you came here).

l; should; could (idea of com-

ion).

principal negative adverbs are as follows:

't want to.

Hindî. Indi pa (not yet). Indi man; Indî. indirin (neither; not either). Indi na (not now). Indi lámang (not only, solely). Indiiyan (not that).

Aayao ako. A' [pronounced abruptly] (I don't like it). Kaayauan [abst.] (dislike). Ang inaayauan (what disliked or refused).

Dî. Ex.: Dî isa man; dî man nauh (in no way). Di man; di pa (not yet). Dt anhin? (What matter?) Di anhin dao na (for it is said that —). Di umanó (it is said). Di anó par (How can it be?) Di nga salamat (may it be thus). Iló'y di maigi (this is not good). Di sino (to who else). Ex.: Di sino ang daingan mo, kundi ang capitani (To who else should your complaint be made except the captain?)

Dili, varia. diri. Mapadiri, to say no. Ang pinadiririan, person to whom no is said (present tense). Magpadiri, to say "no" repeatedly. Ang pinagdirian, the person to No (forbidding).

whom "no" has been said many times (past tense). Padili is, may no. Dilt rin, no indeed. At the end of a sentence dilt sometimes means "or not." Ex.: Babiyad silá, dilt? (Will they pay or not?)

Houag. Ex.: Houag na (do not do it now [presupposes previous command]). Houagi iyan (leave that! drop that!) Houagan mon iyan list that alone). Houagan mong kinii (do not take it). Houagan mong kinigan (do not look at it). Houag kang parlon (do not go there). Pahouagan mo iyang tau niyan (tell that man not to do that). Pahouagan mo iyan sa bata (forbid that to that child).

There are a few adverbs of doubt in Tagalog, as well as some phrases meaning the same. They are:

Perhaps. Possibly.

Why? For what reason?

Perhaps.

I don't know.

If it could be thus.

Bagá.
Kayá. Kayá nya (just because, just for that reason). Used with affirmative sentences. Kayá nyani (as soon as). Kayá nyani (aince). Used with negative sentences. Makakayá, to be able (in a physical sense). Kayá is also any hunting or fishing utensil or instrument.

Wari. Ex.: At aké wari paréon!
(Why do I have to go there?)
With neg., At di wari aké paréon!
(Why don't I have to go there?)

Upan. It is never put last in sentence.

Auán. Do not confuse with add (I don't want to).

Nauá. Siyá nauá (it may be tway). Used for "amen."

THE PREPOSITION.

The preposition, which serves to connect a noun to the sentence, in tsame manner that the conjunction introduces or attaches sentences, is not as highly developed in Tagalog as in English, and for this reason the sampreposition means what it would take several different ones to express English. The principal Tagalog prepositions are:

In; to; from; against; at; by; on; Sa. per; between; with; of; among; sc for; across.

Sa. Ex.: (in) Sa bayan (in town sc báhay (in the house); (to) ali ko (to my aunt); sa amain (to my uncle); sa amá ko (to my father); sa iná ko (to my mother these also mean "for" my aunetc.; sa báhay (to the house); sa báhay (from the house)

(against) laban sa knauay (against the enemy); (at) sa báhay (at the house); (per) talló sa sangdá (8 per cent); (between) sa magaling at masamd (between good and bed); (with) sama sa kaniyáng ának (she is going with her child); (of, rare); (among, unusual); (for) patungo ko sa America (I am leaving for America); (across, rare). Sa is verbalized, the verbs thus formed being explained later.

wat.

formed being explained later.
Wald. Ex.: Wald along salapi (I am without money). Magnald, to run away; to get rid of. Manald, to lose; to miss. Ex.: Navalán akó nang lakás (I lost the strength). Makawald, to be able to run away. Ex.: Hindi makawald nguyón (it is not possible to run away now). Magpawald, to pardon, forgive. Wald with in also means to remit or cancel. Ex.: Walin mo na ang útang ko sa iyó (cancel the debt I owe you). Magkawald, to go apart, to break away. Ex.: Papagkawalin mo kami (let us quit [as partners]) (excl.). Sinong wald? (Who is absent?) Wald ka kahapon (you were absent yesterday). May ikinawawald ka nang balang na! (Is there anything you lack?) Walang wald (absolutely nothing). Nawald sa kamay ko (it escaped from my hand). Mawald man isang anuang kalakian, houag ang isang salitaan (better to lose a carabao bull than a moment of conversation.—T. P., 869. Ibá ang may ay-ay sa wald (it is better to have a scarecrow than to be without one).—T. P., 866. Nagmamayróo'y wald (they pretend to have some-thing, but are destitute).—T. P., 867. Mapipilit ang marámot, ang wald'y hindt (the miser may be forced [to give something]. but he who has nothing, no).—T. P., 868. Walang masamang kaniya, walang maigi sa ibá (faultless what is his, good for nothing what is of another).—T. P., 870. Wald also means "the open sea, a gulf," etc.

Magpawald (to put to sea). Ex.: Nagpawald ang Moro nang kani-yang samsamin (the Moro put to sea with his booty).

— (and family or associates).

Kand. Ang bukid kand ali ko (the field of my aunt and her family). Paka nd sa Juan kand (go to Juan and his family).

Of (genitive of si).

Of (gentitive of ang).

To (dative, etc. of si).

Against.

From.

From.

Ni. Ex.: Ang niogan ni Luis (Louis' cocoanut palm grove). Ang báhay ni Tomas (Thomas' house).

Nang. Ex.: Ang báhay nang amá ko (my father's house). Kay. Ex.: Itong tungkód ay kay

Juan (this cane is John's [is to John])

Lában; lában sa. Ex.: Ikao'y lában sa ákin (you against me). Isang hokbo lában namán sa ibá (one army against another). Maglaban (to resist or struggle against).

Búhat. Ex.: Sáan ha nagbúhat!
(Where did you come from?)
Muld. Ex.: Muld ngayón (from now
on). Sa muld (from the beginning). Ex.: Muld sa lúnes hangán sa riernes (from Monday until Friday). Muld sa Maynila hangan sa Santa Mesa (from Manila as far as Santa Mesa). Magmulá (to start; to commence).

THE CONJUNCTION.

Genuine conjunctions are rather scarce in Tagalog, but many other words may be used as a conjunction would be in English to join sentences together. The principal ones are:

And.

Together with. Not only-but. Unless. Even; as well as. Or.

Or not. Either-or.

Or.

The foregoing are called binding conjunctions as to the first four and alterative conjunctions as to the last four. The following are called adversative conjunctions. They are:

But.

At. This loses the vowel in many cases, being pronounced with the word preceding as a final t, and in such cases is written 't. Kasamà (from ka and samà). Hindi lámang-kundi bagkús. Houag lámang.

Sabáy. Kayà, Dili. Also man. Magin—magin. O (Sp.)

 $\hat{N}guni;\;kundi;\;datapoua;\;subali;\;alin$ tana. Nguni never begins a principal clause, but always a subordinate one, and generally in an answer. Ex.: Ibig kosanang kumain, nguni't hindi akó mangyayari (1 would like to eat, but I am not able to).—L. 't, from at, is almost invariably joined to nguni. Kundi is used for subordinate clauses, generally when the principal one has a negative meaning. Ex.: Hindi lalaki, kundî babayê ang ibon (the bird is not a male, but a female). Datapona, which generally take'h means "but" still stronger than rather.

her-nor.

ough; though.

ough (more formal than above).

so much, although (giving a seon or making an excuse).

ough.

e; whereas.

natter if; even if.

it; because —...

me conjunctions may be styled "causative." alog are:

y?

ause (giving reason).

kundí, denoting a sharper contrast, as between rich but miserable, etc. Subali means "but for," etc., as conditional. Alintana, which takes 't in beginning a clause means "but for all that," etc. Verbalized the two foregoing words mean "to except." Bago is sometimes used in the sense of "but." Ex.: Tanghali na, bago'y wala pa siyá (noon already, but he is absent yet).

Kundi bogkús. These words may be used alone in this sense, and may also be joined together.

Man — man. Man — manhindi rin. Ex.: Walá kami bigás man, itlog man (we have nothing, neither

rice nor eggs.

Bagamán. Ex.: Bagamán dukhá si
Juan, sa puri nama'y mayáman siyá
(though Juan is poor, he is rich in
a good name).

Bistá't. Bistá't napopoot siyá sa akin, ay hibigyán din akó (although he is angry at me, it will be given to me). Mataymán. Ex.: Mataymán akóynaa kaibig paritó, ay di ko makayanan, (although I wished to come, I was not able to [I had no strength]).

Kahi, var. kahimal, kahinya, kahinya man, kahi't. Ex.: Kahima't at mayag sila, paroroon din ako, (although they do not consent, I shall go there).

shall go there). Palibhasa (from Sanskrit, paribhasha, sentence, reprimand, etc.). It is followed by 'y in sentences. As an adverb it is equal to kayá nga; kayá pala, as well as to "since" and "whereas." As a noun it means "irony." Magpalibhasa (to speak ironically).

Sukdán. Ex.: Magpapakabusog muna siyá, sukdán siyá'y magkasakit (he will gorge himself first, even if he makes himself sick).

Mayapá, var. mayapá'í, little heard. Bago. Ex.: Silá'y ang may sala, bago akó ang pinarusahan (they are the ones at fault, but I am the one who has been punished).

"causative." The principal ones in

Bakin? var. bákit. Bákit dí? (Why not?) Bákit also means "as," "how," etc., in sentences. As a noun bákit means an old monkey with developed teeth. Anó't? also means "why?"

Sa pagka't.

A fifth group of conjunctions is generally that called "conditional." The significations of the members of this group are self-explanatory.

If; rather. Unless.

As if it were. Were it not for. Provided. Lest.

Kun. Kun diri lámang; kun di lámang; liban na.

Kun sana sa. Kun dañgan; dañgan. Kun lámang; houag lámang.

Baka, var. maká.

The sixth and last group of conjunctions is that of the class called "conclusives" in some grammars and "illatives" in others. In Tagalog the principal ones of this class are:

That (relative).

That.

Consequently; that is to say. Therefore (consequently).

In order that.

Inasmuch; in so far as.

Nang. Ex.: Magpagamot ka, nang ikao ay gumaling (allow yourself to be treated, so that you may be better).-L.

Na. Ex.: Nagsabi siyá na akôy natúlog (he said that I was asleep). Di yata.

Sa makatouid (lit. "in other words" Ex.: Nakita ko silá kagab-i, sa mo katouid hindi silá sungmakay (1 saw them last night, therefore

they did not embark). Upan. It is never put last in clause.

Yamang, var. yayamang; yaya yaya hayamang; hamang. Ex.: Mar yayaring gawin niya yayaman siy gobernador-general (he is able do it, inasmuch as he is governo general).

THE EXCLAMATION.

The exclamation, or interjection, can hardly be regarded as a part speech, compared with verbs, nouns, adjectives, etc., but for want of better classification they may be treated here. They are generally selexplaining, and many seem to be roots used as imperatives of the verb The most characteristic Tagalog interjections are:

Dear me! Alas! Ouch! Wow! (Always follows.) Oh how -

Oh how --(Always follows.) Aroy! Aray! Ayaa! (mostly used by women). May be used together bapáa preceding. Bapáa is mor in use by men. Buti ñga!

Good! Fine! Poor thing! Would that it may be so! Oh

that -Quick!

Be silent (to one)! No talk! Silence! Lightning! (Oh, hell!)

My mother!

What a pity! Move on! Go ahead!

Kaanáaná! Kahimanuari! Nauá! Maanó!

Dalî! Houag kang magingay! Houag kayong magingay! $oldsymbol{L}$ inti $oldsymbol{k}!$

Nakó! Nakú! (Contraction from iná ko.)

Sayang! Sulong!

Look out! Aside! Take care! Stand back!
Look! Behold! Here it is!

Tabi! Ilag! Urong! Manaá!

Tagalog cursing is rather peculiar. It has evidently been derived from native sources and not from contact with the Spaniards. Among the most usual expressions are:

May a crocodile eat you!
May the earthquake swallow you up!
May a snake bite you!

May a snake bite you!
May the lightning strike him!

Kanin ka nang buaya! Lamunin ka nang lindol! Tukain ka nang ahas! Tinamaán siyá nang lintik!

SECTION SEVEN.

THE VERB.

I. "The verb is distinguished from all other words by marked characteristics and a peculiar organization."—Earle. The eminent philologist speaks hus of the English tongue, but his remarks apply equally to Tagalog. He urther defines a verb as "the instrument by which the mind expresses is judgments," a definition which was first enunciated by the Danish philologist Madvig, in his Latin grammar (Copenhagen, 1841, 8th ed., 1889). Madvig calls a verb udsagnsord, literally "out-saying-word." Other characteristics of the verb have been noted and have given names to the class, such as the German Zeitwort (time-word), and Ewald's Thatwort (deed-word). But in Tagalog the line between nouns and verbs is much less than in English, where it is still less than in Latin, Freek, and other languages of southern Europe.

ireek, and other languages of southern Europe.

II. The simplest verbal form is the imperative, which consists of the coot, followed by ka (thou) or kayó (you; ye). An adverb of time is some imes added to the phrase for emphasis. Ex.: Lákad ka na! (walk on, now!) Isip ka! (Think!) Aral ka! (Teach!) Dalá mo dóon (take it here). Dalá mo dió (bring it here). As in English, many of the roots ised as imperatives may be used as nouns also. Aral, as a noun, means doctrine" or "teaching." Ex.: Ang áral ni Monroe' y ang áral nang américa niagón (the Monroe doctrine is now the doctrine of America).

III. By prefixing ka to the imperative, and reduplicating the first syllable of the root at the same time (sign of the present tense) the idea of fuickness, intensity, care, etc., is imparted to the command. Ex.: Kalalákad ka! (Go quickly! [to one]). Kalalákad kay! (Go quickly! [to one]). Kalalákad kay! (Go quickly! [ye]). Kaiisip ka! (Consider it well!) Kadadalá mo dóon (take it there careully). As a general thing the agent takes the indefinite form, as will be seen by the examples, but the definite is used when necessary. Kaiith the reduplicated first syllable of the root has a very different meaning with any other person than the second. With the first and third persons it has the idea of "time just past," when followed by pa, as will be seen by the following examples. Sometimes pa may be omitted. Din may lso take the place of pa, as may also lámang. In English the time may be x pressed by "has" or "had," according to the contex. Kararáting ko pa (I ave [had] just arrived). Kararáting ni Gat Tomás (Don Tomás has just rrived). Ibig mong makakain sa ámin? (Do you wish to eat with us?) Alámat, aydoakó tkákákain ko pa (thanks, Ido not care to, I have just eaten). Kagagáling nang kapatid na babaye ko sa bayan (my sister has just come rom town). Kahihigà ko din (I had just lain down). Kapapanaog ko din t hapapanhik lámang nilá (I had just gone down and they had just gone up i. e., the house ladder]). Kapapások lámang niyá sa báhay (he had just ntered the house). Kapapások lámang niyá sa báhay (he had just ntered the house). Kapapások lámang niyá sa báhay (he had just ntered the house). Kapapások lámang niyá sa báhay (he had just ntered the house). Kapapások lámang niyá sa báhay (he had just ntered the house). Kapapások din ñāgayón ni Esteban sa basahan (Esteban) Kausúlal ko (I had just written it). Kalatapus ko (I had already finished it). Kalatagpí ko (I had just mended it).

it). Kaaalis lámang niyá (he has just gone away). Kaaalis pa nang áling amá (my father has just gone away). Kaaalis din nyoyén nang capita (the captain just now left). With roots like áral, which have several distinct meanings according to the verbal particle prefixed, he does not require the first syllable to be repeated. Ex.: Kapanyanyáral din nyok nang paré (the priest has just finished preaching). In this case the prefix is reduplicated, mangáral meaning "to preach." Kapagalis din ni Benigno nang damit (Benigno just took the clothes away). Magalis means "to nang damit (Benigno just took the clothes away). take away."

IV. Ka has many other functions, which will be taken up later. It is a most important particle and should be carefully studied. It should be noted that the pronouns with the imperative are mostly in the nominative, while with the first and third persons they are in the genitive.

V. All such sentences are in the definite or so-called "passive," which is the contraction of
strange many times if translated by the English passive, visual strange many times if translated by the English passive.

VI. The foregoing form is also used to express opposites, the word being linked by ay. It may be expressed in English by "now, or "now, then." Ex.:

Now he sleeps, then he wakes. He comes in and goes out.

Katutúlog ay kagigising niyû Kapapások ay kalalabás niyê He is coming and going. Sometimes he walks, then he rests a Karartáing ay kasalis niya. Kalalákad ay kahihintókintó niya. little.

Katataua ay kaiiyak. Now she laughs and then she cries.

VII. When a prefix changes the meaning of a word, it is retained in Ex.: Aral ka (teach); pagaral ka (study); pasiparal imperative.

(preach).
VIII. With the exception of the forms already cited, the verb is always and its always are made to the continuous modify the root itself forms. accompanied by particles, which sometimes modify the root itself euphonic reasons. Nearly every word in the language can be made a vest of some kind or another by the use of these particles, which are the strilling peculiarity of the Malayo-Polynesian languages, but have been retained in the primitive tongues of the Philippines much more than in the Malay, Javanese, or other cognate dialects. There are some twenty these verbalizing particles, of which seventeen are used as prefixes troots, and three are the definite auxiliary particles in, i, and an. Of thee particles, which are tabled at the end of the handbook, the most important are in, i, an, um, mag, and ma, the last three being indefinite particles Pag, corresponding as a definite to mag, is also important. The mastery of these particles is the mastery not only of Tagalog, but of every other. Philippine dialect, as well as a valuable aid in learning Malay or any simi-

lar tongue of the family.

IX. The root with any one of the indefinite particles prefixed may be translated as the infinitive, provided the particle is merely attached to give the meaning of the root so modified, but whenever a tense is expressed the particle or the root is modified, and sometimes both. Besides the imperative and infinitive, Tagalog has really but one other mode, the indicative, as the subjunctive, including those modifications known in various European languages as the optative, conditional, dubitative, potential, etc., is expressed by certain words corresponding to the English "could, should, would, may," etc.

X. Strictly speaking, there are but three tenses in Tagalog, the past, present, and future; but it is possible to render the imperfect, pluperfect, and future perfect tenses by means of auxiliary particles. The first three, however, are those in common use. The participle is also in use, corresponding literally to the English participle in some cases, and in others must be rendered by a phrase. The same remark may be made of the gerund in English, which is variously rendered in Tagalog. One tense is sometimes used for another, when the context clearly indicates the time of the event, as happens in English.

XI. As in English, Tagalog verbs may be transitive, requiring an object to complete the meaning; or intransitive, in which the meaning is complete within the verb. These do not always correspond in the two languages, and a Tagalog root may sometimes be intransitive with one prefix and transitive with another, which may reverse or modify the meaning.

ber, and requires a noun or a pronoun to indicate the same.

XIII. The eminent Indo-Tibetan philologist Bryan H. Hodgson (1800–1894), in his Monographs upon the Tribes of Northern Tibet, reprinted in Part II, pages 73–76, of "The Languages, Literature, and Religion of Nepal and Tibet" (London, 1874), gives it as his opinion that the Gramma distributions of the control of the con and Tibet" (London, 1874), gives it as his opinion that the Gyarung dialect of Eastern Tibet has a very similar structure to that of Tagalog, quoting Leyden and W. von Humboldt (the latter at secondhand) in support of his Rockhill, the Tibetan scholar, now United States minister to China, who has a wide acquaintance with Tibetan, says that Gyarung is merely a variation of ordinary Tibetan, and this being the case there can be no possible affinity between the two languages. As Hodgson's error has been given wide publicity by its incorporation as a footnote to the article by de Lacouperie upon Tibet in the Encyclopedia Britannica, it should be corrected as far as possible by any student of Tagalog.

XIV. As quoted and corrected by Hodgson, the remarks of Leyden, as

taken from the Researches of the Bengal Asiatic Society, Vol. X, page 209, upon Tagalog are as follows: "Few languages present a greater appearance of originality than the Tagala. Though a multitude of its terms agree precisely with those of the languages just enumerated (western Polynesian), yet the simple terms are so metamorphosed by a variety of the most simple contrivances that it becomes impossible (difficult—B. H. H.) for a person who understands all the original words in a sentence to recognize them individually or to comprehend the meaning of the whole. The artifices which it employs are chiefly the prefixing or postfixing (or infixing-B. H. H.) to the simple vocables (roots) of certain particles (serviles), which are again (may be) combined with others, and the complete or partial repetition of terms in this reduplication may be again combined with other particles."

XV. Hodgson notes upon the foregoing as follows: "I may add, with reference to the disputed primitiveness of Tagala, owing to its use of the 'artifices' above cited, that throughout the Himalaya and Tibet it is precisely the rudest or most primitive tongues that are distinguished by useless intricacies, such as the interminable pronouns, and all the perplexity caused by conjugation by means of them, with their duals and plurals, and inclusive and exclusive forms of the first person of both. * * * The more advanced tribes, whether of the continent or of the islands, have, generally speaking, long since cast away all or most of these 'artifices.'" As has already been noted, the Tagalog pronouns do not modify the verbs, which have the same form within the tense for all persons and numbers. As compared to tongues like Fijian and other Melanesian dialects, Tagalog has made long strides toward becoming a vehicle of a much higher culture

Lhan it now enjoys.

XVI. W. von Humboldt says in his Kawi Sprache, Vol. II, page 347: * 'The construction of the Malayan verb (to speak of the entire linguistic **≥tock) can be fully recognized from the Tagalog verb alone.** The Malagasy and true Malay contain but fragments thereof, while the Polynesian lansuages have a more primitive scheme of the verb—fewer in forms.

- herefore seems appropriate to present:

First, the Tagalog verb complete without any regard to the other

Second, the Malagasy (verb), which has in itself very much of the same **⇒onstruction**;

Third, to show what the Malay language in its discarding and grinding ≥ 1 grammatical forms has still retained; and

Fourth, to make a research as to how the simple but uncultivated Polynesian verbal construction stands in relation to the partially cultivated Tagalog.

THE DEFINITE.

I. As has been stated before, the definite form of the verb, which is really a verbal noun with tense-indicating particles, is more common than the indefinite form, which is more of a true verb in construction. One of the great difficulties to be overcome by speakers of non-Malayan tongues is the improper use of the definite and indefinite. It is as easy to begin right as wrong, and if attention is paid to the conditions existing, an idiomatic

mastery of Tagalog may readily be required.

II. The true definite particles, in (hin after the final vowel with acute accent, and nin in a few cases for euphony), i, and an (han after a final vowel with acute accent), are used either alone or in combination when emphasis is to be placed upon the object or there is a special idea implied. These three particles are further combined with pag, the definite verbalizing particle corresponding to the indefinite mag; i, in, and pag many times commencing a definite verb with the combinations ipag and ipinag. The root begins after these combinations, subject to tense reduplications, as will be seen by the table at the end. The subject takes the genitive with the definite, the object taking the nominative case. Ex.: Root gava (idea of making or doing). Gumawa (to make or do). And ang gawa mo! (What is your work?; i. e., What are you doing or making?). This is an indefinite question, with the verbal idea almost absent, the verb "to be" being understood. With an adverb of time, such as kahapon (yesterday), ngayôns (now), or būkas (to-morrow) the verb could be "was," "is," or "will be." But the more usual form is with the definite particle in and the proper tense. Ano ang ginaved mo? (What did you do? [or make?]). For the past tense in is inserted with consonant roots between the initial consonant and the root of the past. sonant and the rest of the root. And any ginagawa mo ditô! (What are you doing here?) As will be seen, the present tense is formed by the reduplication of the first syllable of the root, in which in is infixed. And any gagawin mo? (What are you going to do? [or make?]; what will you do?; what will you make?) The future of this verb is formed by reduplicating the first syllable of the root and suffixing in. And ang gagawin nang amain mo niyang káhoy na iyán? (What is your uncle going to do with that lumber?) Amain, from amá, father, with in as a suffix, also means "stepfather," as well as "uncle." Káhoy also means "tree." Isang báhay ang gagawin niyá (He is going to put up a house). The imperative is formed by suffixing in to the root. Ex: Itô'y gawin ninyong mahúsay (Do this carefully [in an orderly manner]).

III. In is the principal definite particle in Tagalog, corresponding to the same particle in Ilocano and to on in Bicol and Visaya, the two last men-

tioned also using in in combination with other particles.

WHICH DEFINITE.

IV. While it is not so very hard to lay down fairly clear rules as to when the definite and indefinite should be used (the former laying stress upon the object and the latter upon the subject or the action), it is extremely difficult in some cases to say which one of the several definite particles should be. As a general rule, in signifies motion toward the agent, or something by which the agent obtains control of something; i indicates motion away from agent, or an action by which the agent loses control of something, and an generally has either the idea of place or of person connected I joined with ka, resulting in ika, and further combined with inwith its use. to produce ikina, denotes cause, etc., with roots when joined to them, either alone or with verbalizing particles. For this reason the proper definite to be used in sentences having a definite object without other modifying circumstance is determined by the nature of the action, subject to some exceptions, mainly for euphonic reasons. Such words, however, as require an, for example, in place of in are not numerous. I can not be replaced by in or an, and an only replaces in as a suffix, never as a prefix or infix. The following examples will show the different use of the same verb: Root, panhik. Panhik ka! (Go up! Come up!). Panhikin mo akó sa hagdan (come up [to me] by the ladder). Ipanhik mo sa báhay itong mangá saging (Put these bananas up into the house). Panhikan mo ako nitong manga saging (Put these bananas up there for me). Punnihkan mo ako nitong manga saging (Put these bananas up there for me). Punanhik (to ascend). Magpanhik (to hoist, or put something upstairs [or up a ladder]). Ang panhikin (the person upstairs). Ang ipappanhik (what hoisted or taken up).

Ang punhikan (the ladder [stairs or place] ascended).

V. With sentences containing but one direct object which is directly connected with the action, the prevalence of cause, instrument, or time requires i, and place an. Ex.: Ihánap ninyó akó isang cabayong mabuti (look out for a good horse for me). Ang bayan ang hahanapan mo nang cabayo mo (You will have to look around town for your horse). With in a proper use would be: Hanapin mo any cabayong nawald (Look for the horse which has disappeared). Ang pinaghanapan ko ang corral nang cabayo, po (Where I did look for the horse was at the corral, sir). Hinanap ko ang aking cabayo sa bayan ay nahánap ko (I looked for my horse in town and found him). Humánap, (1, to look for) (2, to claim). Manhánap (to scout, to reconnoiter). Ang panhanapin (what scouted for). Ang paghánap (the act of seeking). Ang paghanapan (the place of seeking). Ang panhanapan (place scouted or reconnoitered over). Ang hinanap (what sought for [past tense]). Ang hinahanap (what is being sought for). Ang hanapin (what is to be sought or looked for). Ang hanapan (person from whom Ang ihánap (the means for something to something is claimed or sought). be looked for). Ang ihindnap (the means with which something was sought). The foregoing illustrate the ease with which verbal nouns can be formed from verbs and vice versa.

VI. When a sentence has more than one indirect object, and stress is to be laid upon one or the other object, the nature of the action determines be laid upon one or the other object, the nature of the action determines the particle to be used. The following examples, taken from Lendoyro, show this excellently: Sulatin mo itong sulat sa lamesa nang kúmay mo ("Write this letter" yourself at the table [i. e., with your own hand]). Isulat mo nitong sulat ang iyong kúmay sa itong lamesa (Write this letter "with your own hand" at this table). Su lamesa ang sulatan mo nitong sulat mang iyong kúmay (write this letter with your own hand, using the table as a writing desk). It will be seen from the foregoing that many of the definite works are verbal noung with and (the) left off. Bearing this in mind mite verbs are verbal nouns with ang (the) left off. Bearing this in mind the use of the definite is made much easier.

VII. Circumstantial members connected with the action should be care**fully distinguished** when using the definite from adverbe or adverbial expressions. Some examples of the definite with adverbs or adverbial expressions are: Sadiyang ginawa niya ito (He did this willfully). Dina-cohong nila siya nang boong bagsik (They assaulted him [her] with great

barbarity).

VIII. Ipag, ipinag, and ipina, the two first being combinations with pag and the last of i with pa, the definite verbal particle corresponding to magpa, confuse the student at first, but are simple when analyzed. Ipina, ipa, when followed by a root commencing with g, should not be confused with Fpag and ipinag, as the idea of pa is "to order to do" what is signified by Ehe root. Combinations with other particles, like magka, are also found, Forming pagka (imp.), ipagkaka (fut.), ipinagka (past), and ipinagkaka present). It will be noticed that the last syllable of the particle is reduplicated with pagka for the future and present tenses. Ex.: Ipagabutan vinyó iyang mañgá libro (Pass those books from hand to hand). Any abuthe person reached for or overtaken). Sino ang ipinagluluto mo! (Who Exre you cooking it for?) Anó kayá ang ipinagutos mo sa kaniyá! (What were your orders to him?) Ipaghuhayás sana kitá nang itang damit üyuni't. would along sabon (I would wash your clothes, but I have no soap). Kith is really "we two," but here means "1." Ipaglagh me nang sa itong off-

cial itó (Make some tea for this officer). Ang inilagà (what boiled or made [as tea, coffee, etc.]). Ang ipaglayà (the person for whom boiled, made, etc.). Ang lagaán (the teapot, coffeepot, etc.). In the foregoing examples pag is used because the sentence expresses the person for whom an act is performed. Pag is also used with m and an combined in like cases. Ex.: Rong bahay na ita'y ang pinagawayan nila (This house is where they

quarreled). Root, áuay.

IX. Pag must also be used with the definite whenever the sentence expresses plurality of acts or agents, or of feigning or reciprocal actions. The article being generally used, the idea of a verbal noun is most prominent. Ex.: Ang ipinagsakitsakitan niyô'y ang hindt dusahin (He was malingering so as to escape punishment). Root, sakit (illness). (Diminutives made by repeating a bisyllabic root or the first two of a polysyllabic one, add an to impart a scornful or contemptuous meaning). Ang cuartel one, and an to impart a scornar or contemptious heading). Any came any pinagmurahan milá (They insulted each other in the barracks). Pinagsirà nang mangá lulisán iyang mangá báhay (The ladrones have destroyed many of those houses). Maraming báhay ang pinagsirà milá (Many houses have been destroyed by them).

X. With verbal roots which have different meanings with um and mag,

the definite is accompanied by pag when the verb formed by mag is used. Ex.: Root, bili (idea of trade, barter, etc.) Bumili, (to buy). Magbili (to sell). Itong báhay ang ipinagbili ko, or Ipinagbili ko itong báhay (I have sold this house). Itong báhay ang binili ko, or Binili ko itong báhay (I have bought this house). Pag (pinag) prefixed to bili with han suffixed have bought this house). Pag (pinag) prefixed to bit with ham suffixed indicates the purchaser; the place or the price (past tense). For the present tense the first syllable of the root is reduplicated. Ex.: Ang pinagbilihan (past); ang pagbibilihan (pr.). Ang åking kapatid na lalaki ang pinagbilihan ko nitong båhay (I sold [have sold] this house to my brother [lit., "my brother was the purchaser from me of this house"]). Root, útang (debt). Imútang (to borrow). Magútang (to lend). Magpaútang (to lend willingly). Magkaútang (to owe). Ex.: Pinagútang ko iyang salapí sa kaniyá (I lent him that money).

XI. The use of the particles gives a great freedom in Tagalog for the variation of sentences, which, however, have the same idea. Thus the English "Didn't I order (or tell) you to do this?" may be rendered by the following with equal accuracy: Hindt ko ipinagútos sa iyó na gawin mo itô? (def.). Hindt akó nagútos su iyong gumawû nitó? (indef., stress on action). Hindt akó nagpagawû sa iyó nitó? (indef., stress on action). Hindt ko pinagawû nitó (def.). Hindt ko ipinagawû sa iyó itó? (def.). Di ipinagawû

ko sa iyó itó! (def.).

XII. In and t are combined with each other also. Ex.: And ang ilinuluto mo? (What are you cooking?) For euphony the verb with this combination is much varied, there being also found the forms inaluluto, iniluluto,

and even nilulutò.

XIII. The verbs mayroon and may (to have) and wald (not to have) require the definite form of a verb following them in a sentence which expresses what is had or done, or vice versa. Both subject and object, however, take the nominative in such cases. Ex.: Mayroon kang gagavin! (Have you anything to do?) Wald pô, wald akong gagawin (No, sir; I have nothing). May silang ginawd? (Have they done anything?) Wald pô, wald silang ginawd (No, sir; they have not done anything).

XIV. The definite is also used in sentences having a person for the object, or in which the object is modified by an attribute or attributive adjunct. Ex.: Tauagin mo si Pedro (Call Pedro). Dalhin mo ritó iyang librong binasa kong kagab-i (Bring me that book I was reading last night). Houng mong wikain iyan (Don't say that). Lutoin mo itong manuk (Cook

this chicken). Dalhin mo iyang tubig (Bring that water).

XV. Further discussion of the definite particles is reserved until the indefinite has been explained.

THE INDEFINITE.

I. The indefinite particles most in use are um, mag (nag), and ma (na), nich will be explained in detail hereafter. These are called active parles by the Spanish grammarians, but indefinite seems to be more approiate and correct.

II. Sentences in which the subject is emphasized have this in the nomiative, the verb being expressed with the proper indefinite particle which sometimes preceded by the article of common nouns. The imperative definite does not require the article of common nouns. The imperative definite does not require the article in any case. Ex.: Siyá'y babasa itong libro (He is going to read this book). Ikao nga nagaabi niyán (You uid that yourself). The object, it will be noted, takes the genitive. Siyá ng magpapasial (He is going for a walk [lit., "He will be the walker]). káo ang tumáuag kay Juan (Call Juan [be you the caller to Juan]). Si uan ay ang nagnákao (Juan was the thief).

III. The indefinite is generally used in an intransitive sentence, where n object is not required to complete the meaning. Ex.: Sungmusulat akó I am writing). Sungmulat ako (I wrote). Susulat ako (I shall write). Tagaáral kayó (You are learning). Magaáral kayó (You will learn). Tungmakain siyá (He is eating). Kungmain kami (We were eating [but ot you]). Kakain tayo (We will go eat [all of us]).

An object may be called indefinite when the idea of "a, an, some, any" inherent, or an undetermined part of the whole is indicated, provided ntherent, or an undetermined part of the whole is indicated, provided hat there are no modifying circumstances of time, cause, purpose, instruent, or place in conjunction with the action. Ex.: (1) Maránong ka ang vikang castila! (Do you understand any of the Spanish language?) faránong akó lámang nang wikang tagálog, hindi maránong akó mañgusap sa ikang castila, pó (I understand the Tagalog language only; I do not know ow to talk in Spanish). Magsalitá ka ñga sa wikang tagálog (Then speak Tagalog). (2) Maglabas ka nang mañga silla (Bring out some chairs). fagdalá ka dito nang fosforos (Bring some matches here). Magdalá ka dito nang tagálog (Bring some cigars here). Magdalá ka dito nang tábia (Bring some cigars here).

ang tabacos (Bring some cigars here). Magdalá ka dito nang tábig (Bring ome water here). Maglalá ka nang isang manuk (Cook a chicken).

IV. The indefinite is also used with sentences having a definite object if part and not all of the object is meant. In some cases the place-particle and is also used for this purpose, as it does not indicate an object. In or i would a need if all the definite object were to be indicated. Example of the control of the c e used if all the definite object were to be indicated. Ex.: Akô'y kungmain a nilong lamangkati (I have already eaten some of this meat). Uminum kayó ilong túbig na malindo (Drink some of this clear water). (1) Magbigay ka a dkin niyang tubig (indef.) (1, Give me some of that water). (2) Bigyan to ako iyang tubig (def.) (2, Give me that water). Ibig ninyong magbili

itong bigást (Do you wish to sell some of this rice?)

V. Actions expressed by intransitive verbs which do not require an bject take the indefinite unless there are modifying circumstances of wuse, purpose, means, instrument, or time in conjunction with the action.

X.: Natisod akó (I stumbled). Anó't hindi ka lungmalákad nang matulinf
Why don't you walk quicker?) Tungmatauá siyá (He is laughing).

VII. A sentence commencing with an interrogative pronoun takes the definite if the subject of the inquiry is an agent, and the definite if a terminate object is asked about. Ex.: Sino any nagdalá nitong mañyá koy? (Who brought [was the bringer] of this lumber [timber]?) Akó ang magdalá, pó (I brought it, sir [was the bringer]). Anó't di ka nañyuñyúsap? Why don't you talk?) Nahihiyá ka bagú? (Are you ashamed to?) Sino ag nagsalitá nang sinabi mo sa ákin? (Who related to you what you have told said nida? (Which horse did they buy?) Anong is a contraction for anó ag (def.).

VII. The indefinite is also used with complex sentences in which the bject is amplified by an adjectival clause. Ex.: Any time gangmagana right abanala'y magkakamit nang kapalaran (The person who does right

'ili obtain happiness [be happy]).

VIII. It must be noted that maka in the sense of cause, used with roots denoting conditions, wrongs (torts) and betterments, has a different construction from all other particles, even maka with other meanings. In the definite, which only exists with i, combined with in in the past and present tenses, the agent takes the nominative and the object the genitive, like indefinites of other particles. In the indefinite the agent remains in the nominative, but the object takes the accusative, which is always preceded by sa (not by nang). Some other verbs have this use of sa also. Roots conjugated by mag and man retain the definite forms pag and pan with maka.

IX. The Tagalog verb demands that the subject of a sentence shall be expressed, the tense being indicated by the verb or verbal noun. The subject may be omitted, however, when a number of verbs depend upon the same subject, except in the first clause, where the verb must have a subject. As will be seen by the examples, the syntax of Tagalog is very simple, but care must be taken to use the right particles and tenses. If not, some annoying errors are liable to be made in conversation.

simple, but care must be taken to use the right particles and tenses. If not, some annoying errors are liable to be made in conversation.

V. For any common verb see the vocabulary (English-Tagalog). It must be borne in mind that Tagalog has many words expressing variations and modifications of the general verb as well as other languages. These

will be noted in the proper place.

THE DEFINITE PARTICLE "IN."

I. The plain root, if capable of being verbalized, is sometimes used without a definite particle if an adverb of time or the context makes the tense clear. The definite particle may also be used with an adverb of time, but as a rule, if the tense is to be emphasized or the context is not clear, tense particles, according to the rules of the language, are used in the verbal forms. And ang sabi mo kahapon? (What did you say yesterday?) And ang sabi mo nigayon? (What do you say now?) And ang sabi mo bakad (What will you say?) And ang sabi mo? (What did you say?) And ang sinasi mo? (What are you saying?) And ang sasabihin mo? (What will you say?) Ang sabihin (the person or thing mentioned). And bagá ang sasabihin ko kay Ignacio? (What shall I say to Ignacio?) Sabihin mo sa kaniyá nu tináuag ko siyá (You say to him that I have been calling him). Ang sabihan (the conversation).

II. In (hin after acute final yowel, and nin in some cases) is the true definite particle. In is prefixed, infixed, or suffixed, as the case may be:

II. In (hin after acute final vowel, and nin in some cases) is the true definite particle. In is prefixed, infixed, or suffixed, as the case may be; hin and nin are suffixes only. In is prefixed to a vowel root and infixed between the initial letter and the first vowel of a consonant root for the past (perfect) and present tenses. It is suffixed for the imperative and future tenses. The first syllable of the root is reduplicated in the present and future tenses. The tenses called the pluperfect and future perfect may be expressed in Tagalog in two ways. The first pluperfect is formed by adding na to the past tense, and the second pluperfect by prefixing na to the root. The first future perfect is formed by adding na to the future tense, and the second future perfect by prefixing ma to the root. These tenses are little used in conversation. Na and ma correspond to the indefinite verbalizing particles naka and maka respectively.

III. The subject of a verb conjugated with a definite particle takes the genitive, except in the cases already noted. If the subject is a pronoun, it may either precede or follow the verb, the latter usage being much more common than the former. If the subject is a noun or phrase it always

follows the verb.

IV. For the conjugation of a root with in, whether a vowel verb, or a consonant one see the type-scheme folder at the end of this handbook.

V. In prefixed to or infixed with roots of the following classes forms words denoting a showing of the properties of the root or a resemblance thereto, as the word "like" does as a suffix in English. (1) Roots denoting flowers, fruits, or other objects imitated in gems or precious metals by jewelers,

denote ornaments or jewels of the shape or pattern of the object named, when in is used as above explained. Ex.: Bulingbing, an octagonal berry; when in is used as above explained. Ex.: Balingbing, an ortagonal berry; binalingbing, a jewel with eight sides like the berry. Sampaga, Arabian jasmine; sinampaga, a jewel imitating the sampaga flower. (2) With roots of colored objects in denotes the color. Ex.: Dumero (Sp. romero), rosemary; dinumero, rosemary-colored. Gálay, verdure, vegetables; ginálay, greenish. (3) With some objects in denotes rice which resembles the object in the shape, taste, or smell. Ex.: Kandá, a lily-like flower; kinandí, rice, with an odor like the kandá. Karáyon, needle; kinaráyom, needle-shaped rice. Kamálig, warehouse; Lalauigan Kamaligan, Ambos Camarines (province); kinamálig, Camarines rice. Kantuli, musk (fromSanskrit kastúri, through Malay); kinastuli, rice with musky odor. Ang kató, the carabao tick: kinató, rice of a varievated appearance, resembling the kuló. the carabao tick; kinato, rice of a variegated appearance, resembling the kato. Kastila (Sp.), white person: kinastila, a white class of rice. Alangilan, a tree with fragrant flowers (lananga odorata), the ilangilang; inalangilan, rice with this odor. Bambang, an herb; binumbang, a class of rice which resembles the bambang when growing. Ang dulong, a very small fish; dinulong, rice shaped like the dulong. Batad, a kind of pea-like vegetable; binatad, rice so shaped. Bulaklak, flower; binulaklak, rice which opens like a flower when heated, or like pop corn. Porak, the flower of the pangdan or subutan; pinorak, rice resembling this flower. Sanki, the Chinese anise; sinangki, rice resembling anise. Sumbilang, a species of sea fish without scales; sinumbilang, rice of this shape. Tuma, body louse, grayback; tinuma, rice shaped like a tuma. Tumbaga, copper; tinumbiga, rice with a metallic luster. Tumbaga is copper alloyed with a small amount of gold; it is from Sanskrit tamraka (copper), through Malay tambaga; tembaga Talihib, common reed grass; tinalahib, rice which resembles talahib when growing. There are many other names for different classes of rice, but the foregoing are the principal terms derived with in following the rule cited. (4) With names denoting relationship in expresses the idea of persons occupying the place of such relative to some degree. As this condition is regarded as permanent, the first syllable of the root is reduplicated to express present tense. Other nouns also follow this rule, with some exceptions. Ex.: Ali, aunt; inaali, uncle's wife. Amá, father; inaamá, godfather. Amain, uncle; stepfather; inanmain, aunt's husband. Anak, child (son or daughter); inaquak, stepson or step-laughter, also godson or goddaughter. Asina, spouse (husband or wife); inassina, lover or mistress concubine). Bayao, brother-in-law; binabayao, husband of sister-in-law. Bianin, father-in-law or mother-in-law; binibianin, wife or husband of father-in-law or mother-in-law (not parent of wife or husband). Manufgang, son-in-law or daughter-in-law; minamanaigang, one regarded as such. Kapatid, brother orsister; kinakapatid, half brother or half sister, or foster brother or foster sister. Hipog, sister-in-law; himihipog, wife of brother-in-law. Bilás is the equivalent for binakapano or himihipog. Nano, grandparent; grandchild; inaaph, descendant. Aph in thhod, great-grandchild; aph in tellampakan, great-great-grandchild. Panangkin, nephew or niece: pinates mangkin, one regarded as such. Pinain, consin; pinipinain, one regarded as a cousin. Pinsing bob, first cousin: pinning makedaw's, second cousin, etc. (5) With verbal roots denoting the preparing of food, etc., in denotes the food so prepared, provided the root is conjugated in the infinitive indefinite with um, although there are some exceptions. Ex.: Maglaga, cook with a spit; such as camotes, etc.; Linagi, vegetables so cooked. Magaigang, to cook meat or fish with a spit; rangen, weather so conven. Magaigang, to cook meat or fish with a spit; rangeng, meat or fish so cooked. Lumuyno, to stew, to fell meal; any language, the much or stew. Magaing is more usual. Summing, to bell rice; any ranging is also more usual. Magainhang, to cook fish entire; any transfers, the fish so cookel. Tunnipage magippage, to kneed; any timestands have been also so with vertex or magippage. Pagewhat kneaded; bread. 16. With verbal roots conjugated by and the product of such action is denoted by in, prefixed to a vowel root or infixed

with a consonant root. Ex.: Sumúlid, to spin; sinúlid, thread, anything spun. Some mag roots also have the product denoted by in. Ex.: Magpipig, to press, to crack rice, etc.; pinipig, roasted and cracked rice. (7) With some roots in forms adjectival nouns, the first syllable of the root being reduplicatd. Ex.: Kuan, known; ang kinukuan, the person known. Mahal, dear; ang minamahal, the esteemed (person). Sintá, love (from Sanskrit, chintá, thought, through Malay); ang sinisintá, the beloved (who loves in return). Ang nasintá indicates a person loved without being aware of the fact.

VI. As in has the idea of attraction inherent within it, there are many classes of verbs, conjugated in the indefinite infinitive by um, which take in to form the direct object. (1) According to this rule verbal roots of taking, asking, and appropriating something take in. There are some

verbs conjugated with mag which also admit in. Ex.:

To buy (general term).

To take (general term), bring or take.

To carry; bear, etc. (bring or send).

To scoop out, or take anything out of a hole, or insert the hand into a hole.

To use.

I. Verbs of calling, whether by voice or signs, also follow this mode jugation. Ex.:

1.

Tumáuag. Ang tináuag, who or what called. Ang itauag, the call, instrument, or cause. Ang tauagan, the person called in order to be given something. Ex.: Sino ang tinatauag mot (Who are you calling to?). Tinauag ko si Pedro, po (I was calling to Pedro, sir). Tanagan mo siya nang isda (Call him to come and get some fish).

Kumaón. Ang kinaón, what called, or brought, etc.

Kumauay. Ang kanayin, what mo-tioned for. Ang ikanay, what mo-tioned with, or the cause. Ang kauayán the person motioned to.

ll; also to bring; to fetch.

ake signs for; to motion to.

IX. Verbs of "searching for" also take in for the direct object. Ex.:

To look for.

To search about,

To look in every corner for.

To go in search of another,

To grope for (as in the dark or like a blind person).

X. Verbs of moving, when not due to turning away of what is moved, also take in for the direct object. Ex.:

To move.

To move restlessly.

To shake (like objects badly packed) or to move (like loose teeth). To move anything.

To shake (as something in a sieve); also to rock or dandle (as a child). To shake a basket or measure so it will hold more.

will hold more.

To shake the head in negation.

To shake anything, as a tree to gather the fruit.

To wave the hands while dancing.

XI. In is also used to express the result of the action of verbs which signify carrying, cutting, measuring, or weighing, when the result is considered on the side of the agent or ended therein. Um is generally the indefinite, but mag and other verbalizing particles are to be found. When the result of a verb necessarily falls upon a person, in is used to signify the person. Ex.:

To carry (general idea).

To drag along.

To carry on the shoulder.

To carry a child on or suspended from the shoulder.

Humánap. Ang hinánap, thing sought for.

Humalihao. Ang hinalihao, what searched for.

THE PARTICLE I.

I. The definite particle i, which is almost invariably a prefix and found as an infix with a very few words for strictly euphonic reasons, is used with sentences or phrases by which the subject is represented as losing control of something, expulsion, cause, means, instrument, time (not tense), and verbs of adjusting, copying into, transferring, translating, transplanting, etc., in the latter case indicating the object of the verb.

II. Sentences or phrases including a verb with i have the agent in the

II. Sentences or phrases including a verb with i have the agent in the genitive, the direct object in the accusative (if there is a direct object), and the word denoting the instrument, time, or cause in the nominative. The nominative word is emphasized by being placed at the beginning of

the sentence or phrase.

To pinion; to tie the hands.

Gumápos. Ang igapos, the means—
i. e., the rope. Ex.: Igapos mo so bilangoin itong pantalt (Pinion the prisoner with this rope). Emphatic: Itong pantalt igapos mo so bilangoin (with this rope pinion the prisoner).

VIII. In the majority of cases i expresses the means or instrument by which an action is brought about. It is prefixed directly to the root for those conjugated with um in any manner, and to the verbalizing particle in the other conjugations. This applies to all tenses. The first syllable of the particle, as the case may be redunliof the root or the last syllable of the particle, as the case may be, reduplicate in the present and future tenses. In the second pluperfect and second future perfect tenses the particle i is inserted between the particle na or mand the root, whether the latter be simple or compound. (See tables.)

IX. The root denoting an instrument, if capable of conjugation, may denote the indirect object, if there is no nominal direct object in the sentence. Ex.: Anó ang ipinatay niyá! (What was he killed with?) Ibináril niyá (he was killed with a gun). With in the sentence would be: pinatay niyá nang báril (he was killed with a gun). In the last example the nominal subject báril is expressed. (See tables for the conjugation of an instrument with it and with means for accomplishment of an action) ment with i, and with means for accomplishment of an action.)

I is also used, as has been stated, to express the means for the accomplishment of an action. Ex.: Wald siyang ibili nitong báhay (he is without the means to buy this house). Mayroon ako ibabayad sa iyo (I have

the means to pay you).

XI. I combined with in may express the direct object (accusative) of actions performed for the benefit of others, which may also be expressed by in alone; an expresses place in general with such verbs; and i combirned with pag and pinag according to the tense, expresses the person who is, was, has been, or will be the beneficiary of the action.

THE PARTICLE AN (HAN).

I. An (han after acute final vowel), sometimes nan, is suffixed with all tenses of the verb. The particle in, either alone or in combination with pag (pinag), etc., is retained in the past and present tenses. For the con-

jugation of roots with an and han see the tables at end of book.

II. An usually represents place, or expresses the case called locative in many European languages, replacing an advert of place or the preposition which would be employed with another form of conjugation. Thus, if a sentence with a verb other than those which admit a person or place as the direct object, or those requiring an for euphonic reasons, includes an indirect complement of place relating to the action, the use of an with the verb expresses the relation of case expressed in English by a preposition.

CONSTRUCTION.

XII. With an the direct object takes the accusative and the agent the senitive. Ex.: Hinahagkán nang anak (agt.) ang kaniyang iná (dir. object) (the child is kissing his [her] mother). Lit., "Is being kissed by the shild the his [her] mother." Tukuran mo iyang káhoy (prop up that tree). Lit., "Let be propped up by you that tree." XIII. If an indirect object expressing place is included in a sentence,

XIII. If an indirect object expressing place is included in a sentence, however, it takes the accusative case, and the direct object the genitive or other oblique case, the agent remaining in the genitive, as explained in the preceding paragraph. Ex.: Tinatamnán ni amá nang sarisaring káhoy ang halamanan (Father is planting different kinds of trees in the orchard [garden])—lit., "The garden (acc.) is being planted with different kinds (abl.) of trees (gen.) by father (ins.)." Pinaghanapan mo bagá sa cabayo itong daang itô! (Did you look for the horse on this road?)—lit., "Waslooking-place your perhaps (gen.) for horse (dat.) this road? (nom. as trans., same form as acc.)."

trans., same form as acc.)."

XIV. If an is used modifying a place or person in which to, for, from, by, on, in, etc., precedes the place or person when translated into English, the place or person should be expressed. In these cases the agent, as usual, takes the genitive and the direct object the accusative. The indirect object may either precede or follow the verb, except interrogative pronouns or adverbe of place, which always precede. The person or place is emphasized by being placed before the verb in the sentence. Ex.: Isinilat niyà ang áking súlat (He wrote my letter for me)—lit., "Was written by him (her) the my letter." Sinusulatan ko itong papel (I am writing on this paper)—lit., "Is-the-writing-place my this paper." Pagsusulatan ko itong papel itó (I will write on this paper). Same construction as foregoing, with future tense; Sino ang pinagbilhún mo nitong cabayo? (To whom have you sold this horse?)—lit., "Who (was) the purchaser your of this horse?" Ang anak nang kapidbáhay ko (To the son of my neighbor) "The son of the neighbor my."

THE INDEFINITE PARTICLE "UM."

I. Um is called the first verbalizing particle by the Spanish writers on Tagalog, and is generally used to verbalize roots when the action is primary or expressed as the act of the subject without special reference to the object. Um also has the idea of action toward another person. Some roots differ

radically in their meaning with um and mag, or rather in opposite ways from a neutral point. With other roots mag expresses intensity of what is expressed primarily with um. Um, which is found in the so-called indefinite, changes to ungm in the past and present tenses, and drops out in the future tense. There are also pluperfect and future-perfect tenses, but they are not generally used. For the conjugation of a root with um see the tables. There are some irregularities with some roots which are noted in the proper place. In the mechanical structure of the language um is prefixed to roots beginning with a vowel and infixed between the first letter and the following vowel of a consonant root.

II. The philologist Keane gave G. W. Parker, author of the Grammat of the Malagasy Language (London, 1883), the following information as

the use and origin of infixes, which applies to Tagalog as well:

"The infix syllable om (um, am, om) is a feature which Malagasy has common with Khmer (Cambojan), Javanese, Malay, Tagala (sic) (Philippine Archipelago), and no doubt other members of the Malayo-Polynesianily.

"Khmer: Slap, dead; samlap, to kill. Javanese: Hurub, flame; hurub, to inflame. Malay: Pilih, to choose; pamilihan, choice. Taga Basa, to read (idea of reading); bumasa, to make use of reading (to rea "Originally a prefix, as it still is in Samoan (Ex.: Moto, unripe; momo

"Originally a prefix, as it still is in Samoan (Ex.: Moto, unripe; momo to die young), this particle seems to have worked its way into the body the word by a process of metathesis analogous to the transposition comm to most languages (compare Anglo-Saxon thridda with third)."

III. As has been stated, um is generally used to express the simple unreciprocated act of the agent, either toward himself or others, provided the action is not modified by conditions of time (not tense), manner, instrument, number (plurality), or otherwise carried away from its simple sense. Many roots admit both um and mag with little difference in meaning, and hence it is often difficult to decide upon a choice between them but it is generally safe to use um. Again, many roots differ widely with the two particles. Um refers more to subject and his action, mag to the object and the action of the verb upon it.

CLASSES OF "UM" ROOTS.

For convenience of reference the roots conjugated by um have been arraged into numbered paragraphs, those following the segular conjugation being given in Par. I-XVII, and those having irregularities coming under Par. XVIII-XXI. Diminutives are treated in Par. XXII.

Par. XVIII-XXI. Diminutives are treated in Far. AALL.

Um expresses voluntary acts of agents upon others when mutuality, ty, or plurality is not denoted. The latter are expressed by mag, an

generally suffixed for mutuality. Examples:

company.

Sumama. Magsama, to accompany each other (two or more). Ang kasama, the companion (servant). Ang kasamahan, the person accompanying another. Makisama, to thrust one's self into the company of another. Magkasama, togather, as a crowd. Sumamá is "to go into partnership," and Sumamā is "to become bad or evil." These examples show the great importance of accent in Tagalog.

Humiwalay. Ang hiwalayan, the person left. Maghiwalay, to separate mutually. Mahiwalay, to part accidentally or casually, etc. Syn. tiwalag, with the same combinations and meanings as above. Both probably from wali, without; not to have, etc. Tiwalag is often used in the sense of divide, but watak is better. Magkawatakwatak, to be divided into many parts.

Pumisan. Magpisan or magkapisan, to associate together. Ex.: Ang pinagkakapisanan nang mangú karunongan, the uniting place of the sciences (knowledge, dúnong), i. e., scientific society, university, etc. Pisan as an adjective means "merely; purely." There is a noun pisan meaning "sudden death." Makapisan, to kill another suddenly.

XV. Um used with sa, "at," "in," denotes permanency in any place. Ex.: Ang manya Americano sungmasa sangkapuluan (The Americans are settling permanently in the archipelago).

XVI. Um is also used in some places to express the idea that what may

XVI. Um is also used in some places to express the idea that what may be signified by the root is taking place here, there, and everywhere; the idea of confusion being inherent. Ex.: Umáuay (or auayan) doón (all is quarreling there). Umasáua (asauin) dito (everyone is getting married here).

Um is also used for the imperative in Manila, the tenses being distinguished by adverbs of time, but this is probably due to the fact that the speakers of Tagalog in Manila generally have some knowledge of Spanish, which confuses their grasp of the nice distinction of tense in pure Tagalog.

XVII. Um, used with some roots indicating certain actions means to be occupied in a matter, although perhaps not actually performing the act indicated. Ex.: Sumusilat si Juan (Juan is busy with writing).

IRREGULARITIES.

XVIII. In some parts of the Tagalog region the present tense of the indefinite with the primary idea (besides the regular formation with ungmand the reduplications of the first syllable of the root), is sometimes expressed by the particle na prefixed to the root. Ex.:

To read.

Bumasa, from Sansk. wachd "word," "discourse." There are three forms of the present indef. with primary idea. Ex.: Akô'y nabasa (I am [or was] reading). Akô'y

3.

Ex.: Nappapabasa ang mangaáral sa mangá batá (the teacher is ordering the children to read). Mabasahin; mamamasa or palubasa, reader. Tugabasa, reader by occupation. Basa is also applied to a gravestone. Bumasa (from basa), is "to wet, to moisten." This last is evidently a Malayan word; Malay, basahkun, to wet or moisten. Basa (from Sanek. wachd) means language, speech, in Malay, while bacha has been selected to represent the idea of reading.

Sumulat (from Arabic s'urat, a chapter of the Koran, through Malay). This root has been softened to sulat in Visayan and Tagalog, but in Bicol and Ilocano it is still surat. Ibanag uses the root turak. There is also a root titik in Tagalog, meaning "to write," "to record." There is also a word meaning "to print." It is magpalamán, with a primary meaning of being implanted in the heart. Ex.: Nasúlat siyá (he is writing). Sungmusúlat siyá (he is writing). Ang sulatin, what writ-ten. Ex.: Anó ang susulatin nang amá mo sa iyong kapatid na lalaki? (What will your father write to your brother?) Isúlat niyá itong panúlat (let him write with this pen) (means of writing). Isinulat na niya sa kaniya na parito siya pagdaka (he has written him already to come here at once). Ang sulatan, the paper written upon, or the writing desk, place, etc. Ex.: Sulatan mo itong papel (write on this paper). Anobaga ang sinu-latan mo nang manga pangalan? Pangálay. Ex.: Nangangálay ka na! (Are you tired already?) Hindi po (no, sir). The roots ngálay, hingálay, ngalo, and ngimi have about the same meaning.

Pangalirang (greater than yayat). Syn., pangatigang. Root, ngalirang

and pan.

Pañgalo (from ñgalo, "idea of pain from fatigue"). Syn., ñgimi.

Pañgalokipkip (from halokipkip, to angalokiphip (from halokiphip, to cross the arms). Var., panhalokiphip. Ult. root, kiphip. Ex.: Kumiphip, to lay the arm or leg upon anything. Bákit ka nangangalokiphip! (Why are you folding your arms?) Seiple shows that halo often prefixes roots composed of two identical syllables.

Pangalumbubà (from ngalumbabà and pan). Var., ngayumbabà. Tauong mapangalumbabà, a melancholy

person. Pangamba (less than panganib or takot). From gamba, "idea of dread," and pan.

Panganak (from anak, "child," and

Pangulugi (from ngulugi, a le business, and pan).

Pangusap (from usap and pan). Hindi ka makapangusapt (you talk?) (See usap, al partly explained).

DIMINUTIVES IN "UM."

Um verbs are made diminutive by the repetition of the root if bisyl or the first two syllables if longer. Ex.:

To run.

To rain.

Tumakbó, Tumakbo-takbó, tora to run a little.

Umulan-ulán, to dr Umulán. In ordinary composition the phens are generally omitted.

THE VERBALIZING PARTICLE "MAG."

The particle mag is used to verbalize roots, as a general rule, when a definite object is held in view or else when the verb doe require an object to express intensity (sometimes plurality) with which are verbalized in the simplest sense with um. Mag has also a rocal (mutual) idea, an (han) being usually suffixed.

Mag, which is always a prefix, changes to nag in the present and The first syllable of the root is reduplicated for the presen future tenses. Maka and naka, which are used to indicate the s future perfect and pluperfect, respectively, retain pag, the definite of with the root, as they are also independent particles when used a ln this respect, and also in the retention of the particle in front of reduplicated initial syllable of the root in the future tense, all par differ from um. (See the table for conjugation of mag roots.)

I. Mag, prefixed to roots which admit um and which do not chang meaning with mag, signifies plurality either of persons or acts, this the general meaning imparted by this particle. Mag (nag) some throws the accent upon the last syllable of a root. Ex.:

tch for.

Tumanod. Magtanod, to guard much or by many. Ang tanoran, what guarded. Ang pagtanoran, what guarded much or by many. Ang itanod, the cause of guarding Ang ipagtanod, the cause of guarding much or by many; also the person for whom guarded, if there be a person concerned.

Umupo. Magupo, tosit down (many).

ier verbs may be mentioned magbasá, to read much or by a); mugkain, to eat much, etc. (kumain); maggiik, to thresh ginum, to drink much, etc. (uminum); maglakad, to walk lumákad); magsulat, to write much or by many (sumálat); run much or by many (tumakbó); magtañgis, to weep much (tumañgis), and magtaksó, to weep much (tumuksó); all of have been heretofore explained.

oots which do not admit um as a verbalizing particle are not mag, but simply verbalized in the primary sense. Besides ots beginning with m fall in this class on account of caconness) with um.

grain).

Magbayó. Ang bayín, what ground. Ang bayohan, the grinding place. Magmahal. Ang minamahal, the esteemed, etc., person. Ex.: Ang banal na táuo ay minamahal (the just person is esteemed). Mamahal, to rise in value. Ex.: Namamahal ang lakó (the merchandise is rising in value). Macpakamahal, to esteem highly. Ex.: Pinagpapakamahal ko sa kaniyá (I do esteem him highly). Also with maka alone. Ex.: Pinakamamahal ko sa kaniyá. Makimahal, to ac liba a poble person.

ko sa kaniyá. Makimahal, to act like a noble person. Mapakimahal, to arrive at a state of being esteenned. Kamahalan, dearness; nobility, etc.

Magmahang.

Magmalas. To see well, casually, makamalas.

Magmana. Ang pagmanahin, what inherited. Ang magkamana, to leave property. Ang ipamana, the estate. Ang pamana, the inheritance (verbal noun). Ex.: Itô ang pamana sa ákin nang amá ko (This was my inheritance from my father). Ang pagmanahan, the heir. Makimana, to ask for an inheritance.

x perience.

ourposely).

ommence.

Magmasid. Ang mapagmasid, the person who notes or experiences.

Magmulá. Mulán mo itó, commence this. Used only thus in imperative and past indicative. As "proceed" it is used in past and present. To recall to memory.

To cheapen; insult; dishonor.

Ang pinagmumulán, the point from which proceeding. Mulá as prep. means "from; since."

Magmuli. Also means to open the eyes widely; and to look at well.

Magnura. Mamura, to lower in value. Ang murahin, what chespened, or who insulted, dishonored,

etc. Magpakamuramura, to despise intensely. Magmurahan, to insult mutually. Anghokomanang pinogmurahan nilá, they insulted each other in the court room.

There are comparatively few verbal roots beginning with m in the Tagalog. The foregoing are nearly all that are in common use. A few others

are to be found, which will be noted later, used with other particles.

III. Roots which change the meaning with um and mag are pluralized in two ways with mag. If the final syllable of the root is accented normally the first syllable of the root is added extra in all tenses, but if the accent is not normally upon the last syllable of the root, plurality is expressed by changing the accent to the final syllable. It should also be noted that the meaning changes back.

To buy.

To teach (as a doctrine).

Bumili. Magbili, to sell. Nagbibili akó, I am selling. Nagbibibili akó, I am buying much. This form is now rare, man (q. v.) being generally used. Ex.: Namimili aki

(I am buying much).

Umáral. Magáral, to learn; to study. Magaral, to teach much; to preach. Now generally replaced by man. Ex.: Mangaral, to preach.

The reduplication of a bisyllabic root or the first two syllables of a polysyllabic root intensifies plurality with mag roots. This same construction with um roots indicates diminutives. Mag roots add an (han) to express diminutives or reciprocal verbal actions, which have to be distinguished by the context, meaning, etc. Ex.:

To think.

To meditate.

To follow; to obey.

to think Magisip. Magisipisip, deeply; profoundly.

Magnilay. Magnilaynilay, to meditate profoundly. Manilay natawa a considerate person. Manilay, also means to fish. Paninilayan, a fishing canoe.
Sumunod. Magsunodsunod, to follow

in rapid sequence (many).

IV (a). Roots which may admit the idea of more or less take an additional repetition of the first syllable to signify intent or plurality. If the entire root be repeated the plurality is intensified. Roots of three or more syllables repeat only the two first, according to the general rule in Tagalog. Ex.: Nagsusumpá akó sa kapidbáhay ko (I have cursed my neighbor many times). Nagsusumpasumpá akó sa kapidbahay ko (I have cursed [slandered] my neighbor times without number).

(b) Mag and the doubled root in certain cases signify the performance of an act and its opposite. Verbs expressing an unsteady motion or quick change of position are also formed in a similar manner. (c) In the present nag may be dropped, being replaced by the reduplicated initial e of the primitive root. Some um verbs have this form also. Ex.(b):

umaan. Magdaan, to pass many times or by many. Magdaandaan, Dumaan. to pass and repass many times. Daanán, a made road. Di madaanan, impassible. Makaraan, to be able to pass. Magparaan, to allow Ex.: Paraanin mo akó to pass (let me pass). Hindi ko pararaanin hangan di mo akó bibigyán nang kaunting túbig (I will not let you pass until you give me a little water). Daan also means "hundred.

TAGALOG LANGUAGE.

To wabble (c).

Magkindaykinday, to Kuminday. wabble much. Syn. Magkinding-

V. Mag is also used to express personal actions which may be dual or plural in character, reciprocity or mutuality being implied. If the plurality is to be intensified, the root is repeated, subject to the general rule for polysyllabic roots. Ex.:

To quarrel; to fight.

To assemble (purposely.)

To assemble; to meet (purposely).

Magbabag. Ang pagbabag, the act of quarreling. Mapagbabag, quarrel-some person. Ang babagin, the person quarreled with.

Magpitong. Ex.: Nagpupilong and manya manya majinoo sa bayan (the "principales" of the town are assembling). And and pinagpulongan kanilat (Why have they Ang ipinagpúlong nilá'y nang pagusapan ang pagdáting nang gobernador-general (The purpose of their meeting was to talk over the coming of the governorgeneral).

Magtipon. Tumipon, to join (one). Magkatipon, to meet or assemble by

chance (as a street crowd). Ex: Naghatipon ang mariph time as bi-hay to (Some people have imprened to meet in my house). Ang kati-punan, the assembly. Also the popular name of the well-known revolutionary society, the K. K. K. Ex.: Ang pinagkakatipunan nang mangá marurúnong (The meeting-place of the learned people—i. e., of learned societies, etc). Houng kang sumama't hindt nababagay sa isang dalagang pumaroon sa pinagkakatipunan nang maraming lalaki (Do not accompany [him, her, or them] because it is not proper for a girl to go where there is a meeting of many men).

Other verbs of this nature, all of which have been mentioned before, are maghiwalay, to separate mutually; magpisan, to associate; magkità, to see each other; magsama, to accompany each other; magsalo, to argue; and

magusap, to converse; to litigate.

VI. The distinction between plurality, intensity, etc., and mutuality, reciprocity, etc., is sometimes made by a change of accent. Ex.:

To approach (one).

To look at.

Lumápit. Maglápit, to draw near. Maglapit, to approach mutually. Malápit, near. Malápit siyá sa ákin (He is a relative of mine).

Kumità. Magkità, to look at each other. Magkità, to look at many things; or to look at intently.

VII. Mag verbalizes reciprocal actions of a nature admitting competition or rivalry, provided that no special emphasis is placed upon the contention. Ex.:

ie reconciled (two).

Magbati (also to speak in a friendly way). Magpabati, to become reconciled (many).

ixing at same time; to shake.

Humald. Ang haloin, what shaken; Maghald, to mix two (or stirred. more) things together. Angihald, what mixed. Ang haloan, the mixing place, etc. Ang hinald, what shaken (past). Ang ihinald, what mixed (past).

Voluntary reciprocal actions of certain classes are also conjugated prefixed to the root and an (han) (nan) suffixed. Ex.:

; jeer at.

Magbiro. Magbiroan, to mock each other. Makipagbiroan, to mock greatly; to jeer at another viciously. Birobiro, mapagbiro, palabiro, all stand for degrees of being a jester, Magpalabiro, to jest with a good deal. Tauong biro, an inconsiderate person.

; to endure. Dumalit4. Magdalitaan, to suffer for

each other, or mutually. Magpa-kadalidalita, to suffer intensely. Mapagdalita, sufferer. Kadalitaan, suffering. Di madalita, intolerable; insufferable.

Sumikad. Magsikad, to kick much. Magrikaran, to kick each other. Manikad, to kick habitually. Also magsumikad, to work with rapidity. Synonyms for kicking: Tumadyak, magtadyak, magtadyakan, tumindak, magtindak, magtinda-

kan Sumumpd. Ang sumpain, who or what cursed. Ang isumpd, the reason or cause of cursing. Magsumpd, to curse much; also many at same time. Ang pagsumpain, who or what cursed thus. Ang ipagsumpd, the cause or reason for cursing thus. Magsumpaan, to curse each other. Manumpa, to curse habitually; also to take an oath. Ang palasumpa, the habitual curser; also the witness. Ang panunumpa, habitual cursing, or the oath taken. Ang panumpaan, the person administering the oath; also the place. Ang ipanumpá, the testimony given; also what sworn habitually.

Tumúlong. Magtulong, to help another much. Magtulongan, to help each other. Manulong, to help another often. Manulongan; magpanulonyan, to help each other much or often. Ang katúlong, the aid; assistant; helper.

to aid (another).

To use insulting or indecent language; to say such words. Magtungayao. Magtungayauan, to abuse each other thus. Manungayao, to abuse or insult thus continually or habitually. Mapagtungayao, abuser; insulter.

Among other verbs of this description may be cited magkagatan, to like each other; magintanan, to like each other; magnatanan, to cudgel each other; magnatanan, to love each other; magnatoran, to follow each other; and magnatanan, to laugh at each other. All of these have been mentioned before.

IX. In the use of may to verbalize actions admitting reciprocity, care is necessary in noting their nature and the intent and purpose for which the actions may be executed, as there are local differences in this respect. Reciprocal verbs require an object which returns the action. (A) Thus, may prefixed and an suffixed with a root which admits competition expresses rivalry. (B) If the action requires an object and rivalry is to be expressed, the suffix an should be repeated.

To jump.

To look.

To push; to shove off (as a boat).

Lumoksó. Magloksó, to jump much or by many. Magloksókan, to jump in competition. (This verb has already been explained.)

Transingin. Magtingin, to look at much or by many. Magtinginan, to look at each other. (Heretofore explained.)

Tumulak, Magtulak, to push hard or by many. Magtulakan, to push against each other. Magtulakanan, to push in rivalry or competition.

X. Mag and the reduplicated root form intensive reciprocal verbs which can only be distinguished from diminutives, verbs of feigning, mockety, imitation, etc., by the context. As usual, polysyllabic roots repeat the first two syllables only. Ex.:

To embrace.

Yumakap. Magyakap, to embrace each other; to tie up to a post. Magyakapyakapan, to embrace each other warmly; also means "to embrace a little, to pretend to embrace, to imitate embracing."

Other verbs already cited are magabutabutan, to reach many things; to pass many things from hand to hand, etc.; maghatidhatiran, to send to each other, etc., and magting inting inan, to look at each other closely; to pretend to look, etc.

XI. Nga may also be infixed with mag, forming mangag, the particle thus made imparting the idea of great plurality when prefixed to a root. Ex-

To converse

Magásap. Mañgagúsap, to converse (as a great crowd).

XII. Roots with may may be used both with and without an object the meaning varying more or less in such cases. Ex.:

To divide into equal parts.

Bumahági. Magbahági kayó! Disperse! Magbahági kayó nitong sulapi (divide this money).

XIII. Movement caused by an outside agency is expressed by mag. As will be remembered, self-movement is expressed by um (Par. XI, um). Humanyo, to pull out, take out, etc., is an exception to the rule. Ex.:

rom another; to go to a dis-

oluntarily, as a bird).

ees; to blow trees down (as Magbual. Angbualin, the tree felled. Ang ibual, the person felling, or wind. Angbualan, the place. Ang pamual, the instrument, i. e., ax. Lumayó. Lumayó, to remain left far

Sapin. Magsapin, to wear shoes; also to line.

Tapis. Magtapis, to put on or wear an apron.

 $XX.\ \textit{Mag}$ generally governs all Spanish, English, and other foreign words not incorporated into the language. Ex.:

To play baseball.

To gamble.

Magbesbol. Ex.: Nagbebesbol ang mangá batá (the boys [children] are playing baseball.)

Maghugal (from Span. jugar). Sugal is the usual term. Laró is the native word and means, like the Spanish, either to play or to gamble.

XXI. Roots denoting officials may take mag to express the discharge of duties pertaining to the office named. Ex.:

To be governor.

To be mayor (presidente).
To be a councilman.
To be secretary.

To be treasurer.

To be prosecuting attorney.

Maggobernador. Magpresidente. Magconsejal. Magsecretario. Magtesorero.

Magfiscal.

XXII. Mag, prefixed to abstracts beginning with ka and ending in an, signifies to do what is expressed by the abstract. Such words are used only in the infinitive, and should be clearly distinguished from those roots prefixed by the particle magka, which lack the suffixed an with the indefinite infinitive. Ex:

To do deeds of virtue or justice.

To do right.

Magbanalan (from kabanalan, virtue, justice).

Magkatuiran (from katurran, right, justice). Ex.: Hatolan mo silá nang katuiran (Advise them what is right).

To act chastely or in a cleanly manner.

To behave obscenely.

Magkalinisan (from kalinisan, cleanliness).

Magkahalayan (from kahalayan, obscenity).

XXIII. With adjectives formed by prefixing ma to the root, mag signifies to assume or boast of what is expressed by the adjective, if the meaning permits such assumption or boasting. In some cases mag means to regard as signified by the adjective. Ex.:

To boast of good judgment.

Magmabait. Ex.: Nagmamabait si Juan (Juan boasts of his good judgment [or prudence]). Ma-

To boast of knowledge.

bait, judicious, prudent.

Magmarúnong. Ex.: Nagmamarúnong si Andrés (Andrés boasts of his knowledge). Marúnong, wise, learned (from dúnong). Karunongan, wisdom, knowledge.

To boast of beauty.

Magmarikit. Ex.: Nagmamarikit si Biangoy (Maria boasts of her beauty). Marikit, pretty (from dikit). Dumikit, to grow pretty. Magdikit, to beautify. To boast of elegance, beauty.

To boast of bravery; to swagger.

Magmagandá. Ex.: Nagmamagandá si Loleng, Dolores (Lola) boasts of her elegance; beauty. Magandá, elegant, beautiful. Kagandahan, elegance, beauty. Magmatápang. Ex.: Nagmatápang

Magmatápang. Ex.: Nagmatápang si Faustino (Faustino boasted of his bravery; or Faustino swaggered). Matápang, brave. Katapangan, bravery.

XXIV. If an action does not admit of boasting, mag used with a ma adjective denotes becoming, growing, etc., what may be signified by the adjective. The definite particle in is generally suffixed to the roots in these cases. Ex.:

To become forgetful.

To grow infirm.

Magmalimotin. Lumimot, to try to forget. Makalimot, to forget. Malimot, forgetful. Any nalimotan, what forgotten. Malilimotin, a forgetful person. Kalimotan, forgetfulness.

Magmasaktin. Ex.: Nagmamasaktin siyá (He isgrowing intirm). May sakit, to be ill. Masasaktin, an infirm, sickly person. Sumakit, to feel pain anywhere. Ang sakitan, the seat of pain. (See Par. XXVI).

XXV. Verbs with mag are made diminutives by repeating a bisyllabic root or the first two of a longer one, and suffixing an, han, or nan, as required. Ex.:

To write a little; to scribble.

To cry a little; to snivel.

Magsulatsulatan (from súlat.). (Already used).

Magiyakiyakan (from iyak). Ex.:
Nagiyakiyakan iyang batang iyan,
that child is sniveling.

Magkainkainan, (Already used.)

To nibble.

XXVI. The same form as the above also signifies feigning, imitation, mockery, playing at, etc. Both these and those mentioned in Par. XXV can only be distinguished by the context from intensive reciprocal verbs formed in the same way. (See Par. X).

To affect virtue, i. e., to play the hypocrite.

To play at building houses (as children).

To play at biting (as dogs).

To malinger; feign illness.

To tempt a little or to pretend to tempt.

To sham insanity.

Magbanalbanalan (from banal). Ex.: Nagbabanalbanalan siyá (He is a hypocrite). Magbahaybahayan (from báhay).

(Already used.) Magkagatkagatan (from kagat). (Al-

ready used.)
Magsakitsakitan (from sakit). Ex.:

Nagsasakitsakitan ka (you are malingering). Magtuksotuksohan (from tuksó).

(Used before.)
Magulululular (from úlul). Umúlul,
to drive another crazy. Maúlul, to
become insane. Ang ikaúlul, the
cause of insanity. Kaululan, insanity.

Maghingibingihan (from bingi). Ex.: Houag kang maghingibingihan (Don't try to sham deafness).

To feign deafness.

XXVII. Some um verbs admit prefixed mag, the combination denoting the action to be executed with earnestness, endeavor, enterprise, etc. (b) Some roots with make also take the prefix mag, with the same signification. The infinitive form of the root with um or make is always retained. $\mathbf{Ex.}(a)$:

To make haste.

To force, oblige, compel.

To exert one's self: to work efficiently.

To follow closely, etc. To be able to move to compassion. (b)

To be able to shame greatly. (h)

To be able to placate another; to Magmakaamoamo (from amo, idea of supplicate.(b)

Magdumali (from dumali, to do quickly). Madali, quickly. Magmadali, to do something quickly. (Idiom.) Magdumaling arao, a short while.

Magpilit. In Manila, pumilit. Mag-pumilit, to endeavor. Magsákit. Sumákit, to oblige another to work; to use force toward another. Magsumákit, to exert greatly for the carrying out of an object. Ex.: Ang tauong nagsusumákit matutu nang mabubúting kaasalan, ay iqagálang nang lahat (the man who exerts himself greatly to learn good manners will be respected by everyone). (Sumákit regarded as a new root.)

Magsumunod. (Already explained.) Magmakaaud. (Already used.) See auà.

Magmakahiya (from makahiya, to make ashamed). Ex.: Bakit mo ipinagmamakahiya ang manga magulang? (What is the reason you cause so much shame to your parents?) Walang hiya, without shame, shameless. (See Par. VI, under ma.)

placating). Ex.: Nagmamakaa-moamd ang tauong ito sa inyo (This man is supplicating you). Amd is generally reduplicated, and it will be seen that makaamoamd is regarded as a new root, the ma of maka being reduplicated for the present tense.

XXVIII. Mag also forms nouns indicating plurality, totality, and agency, which have been used many times heretofore. The article is usually prefixed to the compound word. Mag is the antithesis (or opposite in meaning) of ka, which limits the idea to unity.

XXIX. Mag prefixed to noun roots which are generally used with the

dual sense denotes such duality without the use of mangá or other particles,

which rather indicate plurality. Ex.:

and wife.

The brothers-in-law (two).

The two enemies.

The parents; ancestors.

The married couple, the husband Ang magasáua. Magasáua, to marry. (See also Par. XV, under man.) Ang magbayáo.

Ang magáway. Magáway, to quarrel with each other.

Ang magúlang, from gúlang. langan, ancestry, descent. Gumúlang, to grow old.

The two sisters-in-law.

Ang maghipag.

The betrothed couple; the sweet- Ang magingan.

Ang magibigan. Magibigan, to like each other. (See next paragraph.)

XXX. A root capable of expressing plurality is strictly limited to the dual sense by the insertion of ka between mag and the root. Ex.:

The two friends.

Ang magkaibigan. Ang magkasama.

The two companions.

XXXI. If plurality is to be indicated with words sometimes used in the dual sense, ka is reduplicated. Ex.:

The friends (several).
The companions (several).

Ang magkakaibigan. Ang magkakasama.

XXXII. Correlative nouns are expressed with mag prefixed to the root of the principal word. (See also Par. XVIII.) Ex.:

Father and child. Mother and child. Magamá. Maginá.

Father (or mother) -in-law and son (or daughter) -in-law.

Magbianán.

Master and man.

Magpanginoon.

XXXIII. If the second correlative is expressed, especially by a proper noun, jointly with the first, the particle is prefixed to the principal, the subordinate taking the genitive case. Ex.:

John and his father. José and his father-in-law. Lola and her mother.

Magamá ni Juan. Magbianán ni José. Maginá ni Loleng.

XXXIV. Mag denotes totality with some roots of time. Ex.:

The whole night; al! night.

Magdamag. Ex.: Magdamag akong natúlog (I slept all night). Gabí is the usual word for night.

The whole day; all day.

Maghapon. Hapon alone means the time from noon until dark.

XXXV. Mag prefixed to roots conjugated with um and mag forms verbal nouns signifying the agent. The first syllable of the root is reduplicated and the article generally used. Ex.:

The thief. The laborer. Ang magnanákao. (Already used.)
Ang magsasaka. Magsaka, to work
in the fields.

XXXVI. Mag retains pag with the definite in certain cases, but with these exceptions, which have been pointed out from time to time, the definite of mag roots follows the same rule as the definite of um. (See Par. II, under pag.)

THE DEFINITE PARTICLE "PAG."

I. As true auxiliary verbs are not found in Tagalog, the participle assumes as many forms as there are tenses, the imperative excepted. By prefixing the article of common nouns, ang, "the," or a demonstrative pronoun to the proper tense of a verb a particle is formed which may be translated in several ways, even by a clause in English.

Pag and pagka are commonly used in Tagalog where the idea would be expressed in English by the indefinite particle, but the best way to obtain a clear understanding of the variations to which Tagalog verbal nouns may be subjected is to make a close study of the examples following or referred to. Ex.:

To die.

Mamatay. Ang pagkamatay, the act of dying.

To fall.

To eat.

Mahúlog. Ang pagkahúlog, the act of falling.

Kumain. Ang pagkain, the act of eating.

II. Pag (definite) corresponds to mag (definite) in certain cases. As a rule verbs with mag have the same definites as um, except as noted. When pag is prefixed, in is inserted for the present and past tenses, forming pinag. Pag only is prefixed for the imperative and future tenses, in being suffixed at the same time. The first syllable of the root is reduplicated

III. Pag sometimes expresses place in combination with suffixed an, where an alone is used to express the person who may be the object of the action. (See hanapan and paghanapan, Par. V, the definite.)

(b) This rule also applies where the object takes an instead of in.

To collect; to dun.

Sumingil. Ang singilan, the unpaid debt. Ang pagsingilan, the place of asking for a debt. Maningil, to collect or dun as an occupation or habitually.

IV. The particle pag is also used with the definite when place is directly expressed in the sentence, but not when implied or metaphorically (figuratively). This use of pag, however, is only with those verbal roots which admit an for the person or object of the action of the verb, and with other verbal roots pay is not used in this sense, even if place be expressed. Ex.:

To bury; inter.

Magbaón. Ang pagbaonan, the buri-al place. Ex.: Itó ang pinagbaonan nang sundulo (This was the burial

To endure hardships.

place of the soldier).

To place.

Maghirap. Ang paghirapan, the hardships. Ex.: Ang bayang pinaghirapan nilá (The town in which they endured the hardships).

Maglagay. Ex.: Lagyan mo nang tubig itong bangd (Put some water in this vase). Wald along paglalagyán nitong salamín (There will be no place for me to put this mirror).

To embark or travel.

Sumakay. Ang sakayán or sasakyán, boat or vessel of any kind. Ex.: Ito'y ang bangkang pinagsasakyan nang marami (This is the canoe in which many have embarked).

(b) See also magpúlong, "to assemble," and magtayô, "to erect, set up." V. Pag is also combined with i definite, forming ipag, ipinag, as a prefix, when the person for whom an act is performed is mentioned. (See Par. VIII, the definite.)

VI. Whenever the sentence expresses plurality of acts or agents, or of feigning or reciprocal actions, pag (and ipag when required) must be used with the definite. The article ang being generally used, gives the compound the idea of a verbal noun in the majority of cases. For examples

see Par. IX under the definite.

VII. Pag is retained with the definite of the mag form when roots which differ in meaning with um and mag are used. See Par. X, the definite for examples.

te for examples.

VIII. The participle is formed from um verbs or roots by prefixing pag to the root, the compound preceded by the article or its equivalent.

first syllable of the root is reduplicated for mag verbs or roots. See under ma, pa, and pan for other forms of the participle.

To teach.

To study.

To descend; to fasten upon.

To throw or dash down.

Umáral. Ang pagáral, the te ing.

Magaral. Ang pagaaral, the st ing.

Humúlog. Ang paghúlog, the scending; fastening upon. Maghúlog.

aghúlog. Ang paghuhúlog, dashing down or throwing do

IX. Pag sometimes indicates the present tense. Ex.: Pagsabi

kaniyá (as soon as I told him).

siyá pumarito'y hindt ko siyá babayaran (if he does not come here, I not pay him). "If" is generally understood, the idea being a fundamental condition.

XI. Pag, with verbal roots of some kinds, indicates action as transpi

Light; clearness.

Liwanag. Ang pagliwanag, thes ing light (of the day, etc.). liwánag nang árao, the light o or of the sun.

XII. For verbal changes, see tables:

THE INDEFINITE PARTICLE "MA."

I. The indefinite verbalizing particle ma is used with roots which not require an object when verbalized, or with those verbs expression involuntary action. Ma changes to na for the past and present to the first syllable of the root is reduplicated for the present and f tenses. Ma generally expresses a state or condition of being, but the also a possessive idea of "to have," and hence many roots are adjectives when prefixed by this particle, as is already familiar to reader. reader.

II. Such adjectives in ma must express intrinsic states or condiand states or conditions which may or can be attained by the volu

effort of an agent can not be expressed with ma.

III. Actions which require an object when conjugated with other cles may be conjugated with ma if they take place unconsciously

chance on the part of the agent.

IV. The conjugation of roots with ma (na) has naka and maka c pluperfect and future perfect respectively replaced by na and ma, also repeated after the verb in both these tenses. Some roots begin

with p soften it to m after ma. (See tables for examples.)
V. Nga added to ma forms the particles nangá and mangá us express plurality when prefixed to a verbal root. Mangá, as has seen, is the usual indication of plurality when used as a separate

before nouns, etc. Ex.:

To be hungry.

Magútum. Ex.: Marami nga nangagútum (many were hur Marami nga ang nangagu (many are hungry). Maran ang mangagugutum (many whungry). The root is gutun idea of being hungry.

THE DEFINITE PARTICLES "MA" AND "KA."

I. From the fact that ma verbs do not generally require an object, t is little use for some forms of the definite. Every action, however, have a reason, time, or place, and thus i definite and an definite are t found, ma being replaced by ka as a rule, and always with i defi Ka...an, as has been seen, forms abstracts and places, as well as stan for persons and objects of the action. THE INDEFINITE VERBALIZING PARTICLE "MAN."

I. This particle, known as the third to Spanish writers on Tagalog, has Pan for the definite and is one of the most important of the modifying

rot the definite. It admits in, i, and an with the definite.

II. The great attention paid by Tagalog to euphony or smoothness in sounds is well illustrated by the changes demanded of the initial letter of a root when man (pan) is prefixed. This grammatical peculiarity is found root fully developed in western languages, in Irish and Scottish Gaelic, in which it is known as "ellipsis." English has this tendency to a slight degree, as shown by a, an, according to a following vowel or consonant

ound.

III. When preceded by man the following changes take place in initial line. When preceded by man the following changes take place in initial line. Latters of roots, the final n of the particle being either dropped or modified. B and P to M.

K (and hard C or Q) to \widetilde{Ng} . S, T, and D (generally) to N. M, N, and \widetilde{Ng} cause final n to drop out. A, I, O, U modify n to \widetilde{ng} .

IV. Man has nan for the present and past tenses, the first syllable of the root being reduplicated for the present and future tenses. There is a I and III. The project tenses is a land of the project tenses. a II pluperfect tense, the former adding na to the past tense and the latter prefixing naka to the root. The future perfect has also two forms, the first formed by adding na to the future tense, and the second by prefixing make to the root. The present participle (verbal infinitive) is formed

by prefixing pan to the root, the first syllable of which is reduplicated. The use of the definite particles in, i, and an follows the general rule.

(See also index: tilawa, to confide in.)

XVII. Although pan, the definite corresponding to man, generally has a verbal meaning, there are several instances in which pan, prefixed to a coot, signifies an instrument, utensil, or article. These roots then admit, although they do not always require, the euphonic changes, as have already been explained in Par. III. Ex.:

The razor.

The auger.

The mop.

Ang pañgáhit (from mañgáhit). (See index: áhit.)

Ang pamutas (from bútas). Magbútas, to bore; to make a hole in. Ang pañguskus (from kuskus). Ku-

to give an account of.

Makapana. Pumana, to shoot at with bow and arrow. Ex.: Pungmand siyà sa manga ibon, ngum't hindi nakapana siya (He shot at the birds with bow and arrow, but was not able to hit them).

XII. Maka, correctly used, expresses physical power or ability as a general rule, sukat and mangyari being used to express moral power or By the uneducated, these words are used almost indiscriminately. (See sika and mangyari: index.)
XIII. Maka is also used to verbalize kayá; "perhaps, may be," etc., which is conjugated as in the following examples:

Dili ko makayanang dalhin (I do not know if I will be able to carry it). Dili akó makakayá ibigay itó sa kaniyá (I do not know if I will be able to give this to him). Walá akong ikakayá (I have no way to do it). Makakayá ka bagá bumili nitó? (Will you be able then to buy this?) Di kamakayanang labanan kayó (I am not able to fight against you [plural]).

Inumin ko, kun makayanan ko (I will drink it, if I can).
Bagá, "perhaps, by chance," etc., has a stronger meaning than kayá.
XIV. Maka (ma) is sometimes used in reluctantly admitting a fact or in avoiding too direct an injury to the feelings of another. Ex.: (Indef.) Nakapagnakao siyá (he may have stolen); (Def.) napagnakao niyá itó (he

may have stolen this).

XV. Maka is also used colloquially in conversation as follows: Makatanong kayá? (Is there anything more to be asked about it?) Makakitá

bagal (Is there anything more to be seen?)

A more usual form is made with lalo, "more," and the root with in, viz: Lumalo sa tanougint (Is there anything more to ask about it?)

Lumalo sa kitain! (Is there anything more to be seen?)

XVI. Maka forms certain adjectives in Tagalog, which have the inherent idea of potentiality. These adjectives, which in English are generally formed by the suffixes able and ible or by ful, have three distinct forms in

Tagalog.

XVII. (a) Roots expressing qualities which may be felt by the mind are made adjectives by prefixing ka, the casual definite of maka, to the root, which is reduplicated to the second syllable. Ex.: Kaayaaya (aya) "delightful"; kaginhaginhaua (ginhaua), "wholesome; salubrious;" kaibigibig (ibig), "amiable;" kakilakilabot (kilabot), "horrible;" katakottakot (takot) "fearful; dreadful."

(b) Adjectives of similar meaning are also formed by make with the

future indefinite. Ex.:

Makahihiyá (hiyá), "bashful;" makamamatay (matay), "mortal" (death-causing); makasisirá (sirá), "destructive;" makatatauá (tauá), "laugha-

ble;" makatutud (tud), "pleasant, agreeable."

(c) When the roots may express aptitude or inaptitude or facility or difficulty in doing anything; if affirmative the adjective is formed with the future definite of the potential particle ma, and if negative with the imperative ma (without reduplication of the first syllable of the root), which is generally preceded by the negative particle di, "not." Ex.:

Makakain, "edible;" di makain, "unedible, uneatable;" magagawa,

Makakan, "edible;" di makata, "unedible, uneatible; "magagava, "practicable;" di magawa, "impracticable;" mainum, "potable, drinkable;" di mainum, "undrinkable;" makkità, "visible;" di makità, "invisible;" masasabi, "tellable;" di masabi, "untellable, unspeakable;" mangyayari, "possible;" di mangyari, "impossible;" di mabata, "intolerable;" di makalag, "indissoluble;" di magamit, di malapitan, "inaccessible;" di matingkala, "incomprehensible;" di masalang,

"untouchable."

(d) Adjectives of the classes above described take the "tie" ng when united to a following noun or verb if ending in a vowel, but remain unchanged if ending in a consonant. The following verbs take the definite imperative, which is best translated into English by the infinitive with "to." Ex.: Kagalanggalang amá "respected father;" kadumaldúmal tignán, "disgusting to see;" kaayaayang pakingán, "delightful to listen to;" madaling gawin, "easy to do or make;" maliwag sabihin, "difficult to my;" mahirap kamtán, "hard to accomplish."

my;" makirap kamtán, "hard to accomplish."

XVIII. Maka may be compounded with mag, resulting in magmaka, denoting the idea of a great or excessive degree of what may be indicated by the root, which is generally reduplicated. (See par. 27, mag.)

Ex.: Magmakaauaauá (auá) "to be able to move to compassion;" magma-kagalitgálit (gálit), "to be able to move to anger;" magmamakagalitgálit akó iyang taúo, "that man will be able to anger me;" makagálit, "to cause anger;" magmakahiyd, "to be able to shame greatly" (see par. 27, mag); magmakalumbaylumbay (lumbay), "to be able to move to grief;" nagmakalumbaylumbay akó ang balità, "the notice was enough to move me to makalumbaylumbay akó ang balità, "the notice was enough to move me to grief;" makalumbay, "to cause sadness; to make melancholy;" bákil mo ikinalulumbay ang masasamang balità! or Anô't nakalulumbay sa iyó ang masasamang balità! "Why does the bad news sadden you?"

XIX. Maka (naka) is sometimes used in the place of ma (na) indefinite, the two particles having many analogies. Ex.: Nakabukás ang pintó, "the door is open;" nakalimot siná, "he forgot;" nakatayó siyá, "he is standing up;" nakaupó siyá, "he is sitting down."

XX. Maka and its synonym baka express fear or apprehension of possible danger, hurt, or injury. They are written as separate words and not as prefixes. Bakd is more common. These two words may be best rendered into English by "lest," "for fear that," etc. Ex.: Akô'y nagdalang tákot, bakd maringig (I was afraid lest I should be heard.) Houag mong gawin iyan, maka mapahamak ka (do not do that, because you may lose). Houag kang magdaan sa bundok, maka harangin ka nang manga tulisan (do not travel in the mountains, because you might be stopped by the "ladrones"). Humarang, to stop another on the highway. Makd

may táuo diyán (lest there be people there).

(b) Makd also denotes partial resemblance, as in comparing speech, fruit, flowers, etc. Ex.: Makd Tagálog ang capitán nang pangungúsap (the captain is like a Tagalog in his speech). Makd bulakluk sa América

iting bulaklak nang amoy (this flower is like an American flower in odor).

XXI. In addition to the meanings of maka as a verbal particle, it indicates completed verbal action, best translated by the adverb "after" and a verb. Ex.: Makanisa nang paré (after he had said mass the priest—). Makayari nitô'y paroon ka sa — (after you do this go there -). to -

It is also used idiomatically. Ex.: Makasakáling may dungmating, bumili ka nang kakanin (in case anyone should arrive, go buy something

[for him] to eat).

THE INDEFINITE PARTICLE "MAGPA."

I. This particle, signifying the ordering to do or make or permitting to be done what is denoted by the root, reduplicates the last syllable of the particle for the present and future indefinite tenses. The definite, pa being a monosyllable, causes the first syllable of the root to be reduplicated for the same tenses. The definite has all three forms of in, i, and an.

Mag and man roots retain this between magpa and the root. Pag

sometimes precedes magpa in the definite form (pagpa).

Sa is generally used before the person commanded.

To order to teach.

Magpaáral. Magpaáral ka kay Pedro, order Pedro to teach. Magpapagáral, to order to study. Magpapagárul ka kay Juan, order Juan to study. Papagaralin mo To order to read.

with in is: Pasulatin mo siya nitong súlat (order him to write this let-The dual (two) is used in the following examples, but they are translated as usual into English. Pinasúlat kitá nitong súlat (I ordered you to write this letter). Pinasusúlat katá nitong súlat (Í am ordering you to write this letter). Pasusulatin katá nitong súlat (I will order you to write this letter).

(See index: súlat.)
agpasusì. To lock; magsusì. Magpasusi. sian mo itó (lock this). Houag mo susian ito (don't lock this). hindi nakasusi (this is not locked). Alisin mo ang pakasusi nitó (un-lock this [lit., "release this condi-tion of being locked"]). Susian mo ang pinto (lock the door). Ang isusì, the key. Ang susian, what locked. Ang pagsusì, what locked much, or the act of locking. Ang ipagsusi; what used to lock much with. Susi, derived from Chinese, is distinct from susi, meaning clear, pure, or neat, which comes from the Sanskrit, cuchi.

Magpatahi. Itó ang patahi niya sa akin (this is what she told me to sew). (See index: tahî.)

r to sew.

er to lock.

lagpa reverses the meaning in sentences where an inferior addresses ior, or in which the subject has no power to command, the particle eaning "to request, ask," etc. Ex.: Magpagawa ka nito sa inyong sk your father to do this," not "order your father to do this." ral kayo pa sa inyong anak sa escuelahan (indef.) or Papagaralin a ang anak ninyo sa escuelahan (def.) (let your child study for a et at school).

The indefinite form will be seen by the conjugation of magpagawd ler to do or make;" there being but one irregularity of note, viz: pluperfect and future perfect tenses naka and maka, with pagpa prethe root and na following, express these tenses, respectively. (See

or conjugation.)

Pa, the corresponding definite verbal participle to magpa, and by dropping the first syllable of the latter, forms the three defiby dropping the first syname of the latter, forms the three dengularly. The examples given in the tables are magpasúlat (súlat), ler to write "(in); magpagawá (gawá), "to order to do or make" 1 magpatanim (tanim), "to order to sow" (an).

'agpa may be preceded by maka, forming makapagpa, the compiving the idea "to be able to order to." (See under magpapanar. I, magpa.)

Magpa also denotes what is suffered willingly or what is done withraint by others upon the subject; to allow or permit, with those hich admit such ideas. The context serves generally as a guide to ish the idea of "to order to" from "to permit to." Ex.:

w deception; cheating.

Magparayá (from dayá). (See index: dayá.)

w oneself to be crucified.

Magparipá (from dipá). (See index: dipá.)

ble). (See index: árao.) Magpahangin. (See index: hangin.) Magpaulán. (See index: ulán.)

X. Magpa coupled with meteorological phenomena and astronomical Occurrences, connected with a human agency, denotes a waiting on the part of such agent until the condition has changed or the event taken place. The context generally serves to give the correct idea. Ex.:

To wait until the typhoon ceases. To wait for a change of wind.

To wait for the day to become cooler.

To wait until the sun (or moon)

To wait for a change (as in bad Magpatild. Patilain mo muna ang weather).

To wait until the rain ceases.

To wait until daybreak.

Magpabagyó. Magpahangin.

Magpalamig nang árao. (See Par. VII.)

Magpaulán.

Magpaumaga (from umaga, dawn;" root, aga).

XI. With roots expressing the indefinite idea of what may be given magpa expresses acts which benefit another than the agent. These roots are generally those conjugated primarily with um. Ex.:

To give food; to feed. To send; to forward.

(See index: kain.) Itó ang padalá niyá sa Magpakain. Magpadalá. akin (this is what he ordered me to bring [carry]). Itô'y padalá sa ákin ni má (this is what my mother sent [brought] me). Ang ipinadalá (what was ordered brought [i. e., what was sent]). Magdalá, to carry, bear, bring or take (over). Ang dinalá, what so brought, etc. (See index: dalá.)

To beg; to ask for alms. To ask for a pledge or pawn. Magpalimós (from Span., limosna) Magpasanlà. Sangpisos ang sanlako nitong singsing (I want to pled this ring for one peso).

XIII. Actions in which the agent has a passive part are also explained by magpa. Ex.:

To hear confession.

Magpacumpisal (from Sp. confesar Saan naroon ang paré! (Where: the "padre?") Nagpapacumpise siyá (He is hearing confessions! Magcumpisal, to confess. Magpatavad. (See index: tavad.) Magpaghti. (See index: áhit.) Magpagupit. (See index: gupit.) Magpalinis. (See index: linis.)

To pardon.
To get shaved.
To have the hair cut.
To have cleaned (as shoes).

XIV. Magpa also expresses the idea of repeating something many-times, or reciting the same much, and sometimes by many. Pagpa is treated grammatically in many cases like mappa—i. e., the last syllable of the particle is reduplicated for the present and future tenses. Ex.: Magpa "we" kayô (All of you say "we" many times). Nagpadiable akô sa kaniyê (I called him a devil many times). Anh ang ipinagpapadiable minyôf (Why do you say devil so much?) Houag ninyong pagpapadiablehan ang-kapona tino (Don't say devil so much to those around you).

XV. In some cases magpa signifies to do voluntarily what is denoted by

the root. Ex.:

To adorn one's self.

To praise one's self.

Magpamuti (from buti). Nagpapabuti yaong dalaga (That girl is adorning herself).

magpanuri (from puri). At yaong isa'y nagpapamuri (and that one is [doing the same] for the praise). Ang mahinhing dalaga'y pinupuri nang lahat (A sensible girl is praised by everyone). Kapurihan, praise; honor; tame. Syn.: bunyi.

XVI. Magpa with some datives and all adverbs of place signifies "to go or come intentionally," where denoted by the root, etc. Ex.:

To come to me.

To go to you. To go (come) to the person.

To go to Pedro.

To come here (near by).

To go there.

To go up the river, or up country.

Magpasa ákin. Magpasa inyó. Magpasa táuo. Magpakay Pedro. Magpadoin. Magpadoon. Magpa ilaya.

XVII. Mapa, formed by dropping the g of magpa, signifies "to go in some direction naturally or accidentally, and without intention on the part of the subject." I generally precedes the root. Ex.:

To run off or lower (as water).

Mapaibabá. Napapaibabá ang túbig (The water is becoming low [or is running off]). (See index: babá.)

To ascend (as smoke).

To fly up in the air (as a bird).

Mapaitaas. Napapaitaas ang asó (The smoke is rising). Di man makità ang ningas, asó ang magpapaháyag (Although the flame may not be seen, the smoke will reveal it.— T. P., 50).

Mapailandang. Ang banoy ay napailandang sa impapauid (The eagle

ascended into the clouds).

XVIII. It will be observed that the greater part of the roots verbalized by magpa require i in the definite to express "what is ordered done, given," etc., and in or an in the same form to express "the person commanded," etc. Ex.:

 $\mathbf{L}^{\mathbf{O}}$ give food to another. To allow to be punished; or to cause or order to be punished.

To permit to pass.

To give another something to drink; to water animals or fowls. To cause to walk up.

up.

Magpakain. (See index: kain.) Magparusa (from dusa). Houag mong parusahan ang walang kasalanan (Do not permit the innocent [not

guilty] to be punished).

Magpadaan (from daan, "road"). See index.

Magpainum. (See index: inum.)

Magpalákad. (See index: lákad.) To cause or order another to stand Magpatindig. (See index: tindig.)

XIX. A sense of ordering may be given to roots not having such an idea by inserting a second pa, although it is clearer to use may with a following infinitive. This second pa (which remains in all tenses) with roots having the idea of ordering signifies to order a person to order another, although simpler forms are generally used. Ex.: Ang capitán ay nagpa-Painum sa mañgá cabayo (The captain orders the horses to be watered); or,

Major a mangá cabayo (The captain orders the horses to be watered); or, Ang capitán ay naquitos uminum sa mangá cabayo [same meaning]. (2) Magpapasúlat ka kay Juan kay Pedro; or, Magútos ka kay Juan na magpasúlat siyá kay Pedro (Order Juan to order Pedro to write).

XX. The tendency of Tagalog, like all languages, to simplify itself, is shown by the use of the root with pa prefixed, with the significance of a verbal noun. The agent takes the genitive and the object or person acted upon the dative. Ex.: Pabangó, "perfume;" pamuti (buti), "holiday or parade appearance;" padalá, "burden or what carried;" pahiyás, "jewel;" pamana, "inheritance;" patago, "what hidden."

16 ang patago niyá sa ákin (This is what he ordered me to hide). Paú-

Itô ang patago niyá sa ákin (This is what he ordered me to hide). Paú-tang, "credit."

THE PARTICLE "PA."

I. This particle has many affinities with magpa, as will be seen by the examples. It reduplicates the first syllable of the root for the present and future tenses, except when sa is attached to and incorporated with it. With roots of place, which require pasa, the first syllable of the particle is reduplicated for these tenses. Na is prefixed to pa in the indefinite past and present tenses with both pa and pasa. This latter particle should not be confounded with roots beginning with sa conjugated with pa. (See tables:

túlong.)

II. One of the principal significations of pa is to ask or beg for in reference to the subject, while magpa is generally applied under like circum-

stances to the object. Ex.:

To ask for protection. To ask for mercy or compassion. To ask for shelter or support.

Paampón. Paama. (See index: aud.) Pakupkup. Kumupkup, to press to the breast or shelter under the wings.

To ask for aid, succor, or a favor.

To ask for defense. To ask for help.

Parangulang. Magsangalang, to sid, favor, or succor. Patangol. Tumangol, to defend.

Patúlong. (See tables: túlong.)

III. At times pu signifies "to permit" the action indicated by the rot "upon one's self," and sometimes "to ask," as above explained. It denotes greater willingness by the person affected than magpa does. Ex.:

To consent to be deceived.

To ask to be kissed. To consent to be whipped. To consent to be vanquished. To consent to be slapped.

Parayà (from dayà). (See index: dayà.) Pahalik. (See index: halik.) Pahampás. (See index: hampis.) Patalo. (See index: talo.) Patampal. (See index: tampal.)

IV. (a) With the adverbs of place, and roots expressing place, pa signifies movement to or from what is denoted by the root. (b) With root of place sa is added to the particle, forming pasa, which bisyllable particle reduplicates the last syllable of the particle for the present and future tenses. The initial d of the adverbs changes to rafter pa. Ex. (a): Parini, "come here;" parini, "come here;" parini, "come here;" parini, "go there." (See index: dini, dito, diyan, doon.) These four adverbs admit the definites i and an. That in i is compounded with ka, forming iku, ikina. In may be used if compounded with magpa, signifying "to order to come or go." (See tables and index: dito.)

Some localities are to be found where the last syllable of the particle is reduplicated with these adverbs of place for the present and future tenses, but this is irregular and incorrect. The practice is unknown to the earlier

writers.

The four adverbs which have been considered are also further conjugated

with am, making infinitives, etc. Ex.: Pumarini, pumarito, "to come here:" pumarini, pumaroni, "to go there."

(b) Pasabahaa, "to go to the house." (See tables: bahay.) Pasabahid, "to go to the country" (fields); pasadagat, "to go to sea;" pasadag, "to go to the river;" pasabandok, "to go to the mountains;" pasa América, "to go to America;" pasa Kashla, "to go to Spain." Napasam sign! (Samang taoba papara) (Where did he go!) Napatañgo sa Magnilà (He went to Magnila) to Manila).

V. Pa also indicates to say what may be denoted by the root, but withat the plurality indicated by magpa. Ex.: out the plurality indicated by magpa.

To say "yes."

To say "no."

Paóo, Paóo ka! (Say "yes!") Napaio ka sa kaniya? (Did you tell him "yes?") Paddi. Padih ka! (Say "no")

Padih ka! (Say "no") Dili vin (No, indeed); var. diri. Any pinadiri ian; person to whom "no" is being said. Magpadiri; to say "no" repeatedly. And pinagdirian; person to whom "no" has been said often.

Pahindi, Pahindi ka (kayo) (Say

"no").
Pauma. (See index: ayao.)
Padiablo. (See index: diablo.)
Pakorukiá.

To say "no."

To say not to wish. To say "devil." To call "chicky-chicky,"

VI. Pa, prefixed to roots denoting bodily positions, forms words expressing the position taken. Tx.:

Lengthwise; lengthways.

Pahabá. Putlin mo itó nang pahabá (cut this lengthwise). Mahabá. long.

rosswise; crossways.

ying down; prone (position). ying on the side (position).

ying on the face (position). ying on the back (position).

n foot; afoot. nated (position). Pahálang.

(See index: higd.) Pahigà.

Patagʻilid. Pataob.

Patihayà. (See index: tihayà.) Patindig. (See index: tind Paups. (See index: ups.) (See index: tindig.)

VII. Pa, prefixed to roots denoting articles which may be bought, sent, rried, sewn, left, lent, etc., forms nouns indicating what affected by the tion. In composition these nouns take the nominative, the agent the nitive and the recipient the dative. Ex.:

hat brought.

'hat borrowed or lent (not money).

That left as an inheritance. That sewn.

Padalá. (See index: dalá.) Pahiram. Itó'y pahiram sa ákin nang kaibigan ninyó (this is what your friend lent me).

Pamana. (See index: mana.)

Patahî. (See index: taht.)

VIII. Some roots, such as kain, eating; and inum, drinking, are not clear hen used with pa alone in this sense, and are conjugated with both the article pa and the definite of maypa (pu) forming papa. Ex.: Papakain 1 kay Juan (ask Juan to give you something to eat). Papainum ka kay

bmás (ask Tomás to give you something to carl. Tapanam ka kay bmás (ask Tomás to give you something to drink).

IX. Formerly mapa, with roots indicating relatives, signified to call thers by such names. This custom exists to some degree yet. Ex.: [apaali, to call "aunt." Mapanuno, to call "grandfather" (or "grand-other").

THE INDEFINITE PARTICLE "MAGPAKA."

I. This particle, which may be analyzed into paka with mag prefixed enerally signifies to do, suffer or voluntarily allow what may be denoted y the root, and has two forms for the definite, pagpaka and paka. Magaka and pagpaka form the present and future tenses in a peculiar manner. he last syllable, ka, adheres to the root in all tenses, and pa is reduplited for the present and future. The mag of magpaka changes to nag or the past and present tenses. When paka is used with a root it is not ivided, the first syllable of the root being reduplicated for the present and Paka also retains pag with verbs conjugated primarily with iture tenses. ag, forming the prefix pakapag. Paka admits in as well as i and an.
Roots conjugated with magpaka may have either a reflexive or transi-

ve meaning, or both, according to the context. II. For the conjugation of roots with magpaka, see the tables: matay, buti, si, and áral.

III. Some verbal roots conjugated in the foregoing sense by magpaka are:

o allow one's self to be insulted; Magpakaapi. patronized.

o humble; humiliate or lower one's

o satiate one's self. o adorn one's self.

Magpakababá. (See index: babá.)

Magpakabusog.

Magpakabuti. Ang kahinhinan ay nagpapakabuti sa dalaga (modesty befits a girl). Ang ipinagpapakabuti nang dalagang iyán ay nang siyá'y mapuri (the reason why that girl is adorning herself is to be admired).

Magpakadukha. Mapakadukhá, to come to poverty.

Magpakagaling. (See index: galing.)

'o impoverish one's self voluntarily.

lo improve or reform one's self.

To diminish (voluntarily). To esteem one's self highly. To allow one's self to be killed; (2) to commit suicide.

To despise one's self. To repent (deeply). To exert one's self; to make efforts.

To enrich one's self.

Magpakaliit. Maliit, small; little. Magpakamahal. (See index: mahal.)
Magpakamatay. Nagpakamatay ang
tauo kusa niya (the man allowed
himself to be killed). Nagpakamatay ang taga Hapon sa kaniyang sarili (the Japanese voluntarily killed himself [committed sulcide]).

Magpakasamā. (See index: samā.) Magpakasisi. (See index: sisi.) Magpakatápang. Tapangan (pakatapangin) mo ang loob mo (exert yourself; "brace up"). (See in-dex: tápang.) Magpakayáman. (See index: yó-

man.)

IV. As usual, i stands for cause, reason, or instrument of the action with magpaka, and on for the place or the object, according as the verb for the direct object admits it or not for the direct object. Ex .:

To take exact notice.

Magpakatanda. Pakatandaan mo ang sinasabi ka sa iyoʻ (pay exact atten-tion to what I am telling you). (This word should not be con-founded with its homonym tanda, idea of age.

V. The foregoing sense of magpaka generally applies to actions which do not go beyond the subject or to verbs which do not require an object to complete the meaning; but when used with verbs admitting a direct com-plement other than the subject or capable of voluntariness, magpaka gives greater force or intention to the root. In this signification the particle admits in, i, and an, the reduplication being generally from the first syllable of the root, as paka is the usual form of the definite in such cases. Roots conjugated thus must be capable of expressing the idea of more or less. Pag is retained in this sense with mag roots, forming pakapag or pagpaka, as the case may be, and in certain cases pagpakapag may be formed. Ex.:

To teach earnestly.

To have great prudence. To go very slowly.

Magpakaáral. Pakaaralan ninyó ang agpakaarai. Fakaaraian mingo ung manga bata (try to teach the chil-dren earnestly). Magpakapagaral, to study earnestly. Pagpakapa-garalan ninyo ang wikang Tagalog (try earnestly to study the Tagalog language). Magpakapangaral, to preach earnestly.

Magpakabait. Magpakarahan (from dahan). pakarahan kang lumákad (walk very slowly). Pakarahanin mo very slowly). Pakarahanin mo ang paghila (throw it very delib-erately). Dahanan mo iyang gand mo (do that work of yours slowly [carefully]). Mapakarahan, to slow down; to become quiet. Napakarahan na (it has become quiet already; it has slowed down Dumahan, to go away Magdahan, to go slowly. slowly. (See index: dahan.)

To love greatly.

To guard one's self well. To think earnestly, deeply.

To arrange well. To rectify well. To tempt greatly.

kong Magpakagilio. Pinakagigilio kapatid na babaye (my dearly beloved sister).

Magpakaingat. Magpakaisip. Magpakaisipisip, to think very deeply. (See index: (sip.)

Magpakahúsay. (See index: húsay.) Magpakatuid. (See index: tuid.) Magpakatuksó. (See index: tuksó.)

VI. By reduplicating the root, roots capable of expressing the idea of more or less acquire still greater force or intensity with magpaka. They are generally used in the definite with this construction, and the reduplication does not extend beyond the first two syllables of the root, according to the general rule. Ex.: Magpakadalidalida, "to suffer intensely or to endure greatly." Pakaisipisipin mo, "think intensely." Pakasipagsipagin, "take the greatest of care; care for it sedulously."

VII. Dropping the ka from paka, there remains pa, which pronounced long and almost as mag has the same meaning as maka but should not be

ong and almost as paa, has the same meaning as paka, but should not be confounded with pa (the definite of magpa), pa (the particle), nor with pa, "yet." It is generally used in the imperative. Ex.: Pabuksán mo (open wider [or quicker]). Papalò mo (strike harder). Pataponan mo (throw it with more force [or quicker]). (See index: Bukás; palò; and

VIII. A further use of magpaka with nouns or verbs expressing time is to signify to persevere or remain until such time, doing what may be denoted by the root used. This signification admits of in, i, and an. Ex.

To —— until morning.
To —— until evening.
To —— all night awake.

Magpakaárao. (See index: árao.) Magpakahapon. (See index: hapon.) Magpakapúyat. Ang ipinagpapaka-púyat ko'y itong gawa (This work is the cause of my having to remain awake all night). Itong silid itô'y ang pinagpakapuyatan ko (This room is the place where I remained awake [or watched] all night).

IX. When an accidental or fortuitous action is to be expressed with magpaka the g is dropped, making mapaka, an analogous particle to ma. Pinaka, formed from paka and in, should not be confounded with pinaka, used in a very different sense. (See index: pinaká.) Ex.:

To multiply.

To come to poverty. To grow greatly. To be delayed more than usual. Mapakarami (from dami). Applied toanimals, etc. (See index: dami.) Mapakadukha. (See index: dukha.) Mapakalaki. (See index: laki.) Mapakaláwig.

THE INDEFINITE PARTICLE "MAKI."

I. This particle, known as the sixth to Spanish grammarians, has paki for the definite, and reduplicates the second syllable (ki) of the particle for the present and future tenses. The pluperfect and future perfect tenses are wanting. Maki changes to naki for the past and present tenses,

and paki takes in for the same, forming pinaki.

II. The principal signification of maki with roots capable of expressing companionship, etc., is joining with, accompanying another, interference or intermeddling in what may be denoted by the root.

III. Maki may be combined with um, mac, man, magpapa, and pa, as well as with itself (paki). There are some verbs which resemble maki in form,

such as pakinábang, pakinig, etc., which are classed as um verbal forms, and should be carefully distinguished. Ex.:

To join with or interfere in writing.

Makisúlat (from sumúlat). Ipinakikisúlat ko itó doón (I am putting this in so it may be written there). Iyang manga sulat ay pakimlalan mo nitó (Put this in to be written with those letters). Makupagpasúlat; to join (or interfere with) in ordering to write (from magpasii-

To join with in play or gaming.

Makipuglaro (from maglaro; to play or gamble; see tables: lar6). Also: Pakipaglaroan mo si Pedro (Play with Pedro). (With pa) Papak-laroin mo si Pedro sa kanina (Tell

To join in fishing with a casting net called "dala.

[make] Pedro play with him).

Makipandala (from mandala; to fish for a living thus). Dumala; to fish (occasionally) with a "dala." Magdala, to use a "dala." Maka-dala; to be able to catch anything with a "dala."

To join with in saying "yes." To join in a conversation uninvited.

Makipabo (from pabo; to say "yes.") Makipakiúsap (from makiúsap).

IV. See tables: umáral; magáral, and sumakay. V. Maki by itself admits only of i and an in the definite. I represents the reason, cause, or object of the action, and an the person interfered or meddled with, or joined, accompanied, etc. For the conjugation with i see the tables: súlat and humatid. For the definite with an see maglaró.

VI. In is only used with maki in combination with magpa (pa). Ex: Papakigawin mo ang alila mo sa mangá táno igán (Tell your servant to join those men in their task). See also makipaglaró in Paragraph III, preceding, and tables.

VII. Some roots conjugated with the principal signification of maki are:

Makisamá,

To join or meddle with teaching.

Makiáral. (See tables.) ral, to join or meddle with studying. (See tables.) Makipangáral, to join or meddle with preaching Makipagánay. (See index: áuoy.) Makirámay (from dámay).

To claim a part in; to participate. To carry along with; to join; to interfere.

To embark with.

To pick a quarrel.

To thrust oneself into the company of another.

To thrust oneself into a dispute or argument.

To join with in weeping.

To join (or meddle) in pleasure.

Makihatid. (See tables.) Makisakay. (See tables.)

Makitalo. (See index: talo.)

Makitangis. (See index: tangis.) Makituá. (See index: tuá.)

VIII. An is sometimes suffixed to roots conjugated with maki to express intensity of the idea denoted by the root. Pag is generally retained in expressions of this class. Ex.:

To mock greatly; to make fun of, maliciously.

To join eagerly in play or gambling. To thrust oneself into an altercation; to answer with vehemence. Makipagbiroan. (See index: biró.)

Makipaglaroan. (See index: larb.) Makipagsagutan, Ano't nakikipagar gutan sa kapidbáhay mo? (Why To thrust oneself into a conversation; to interrupt a report. To hate intensely; to detest. are you getting into an altercation with your neighbor?) Sumagnt; to answer; to reply.

Makipaysalitaan. (See index: salita.)

Makipagtaniman (from tanim). Not to be confounded with its homonym, tanim, "to sow." Nakikitaniman si Juan kay Pedro (Juan detests [hates] Pedro intensely). Houag kang makipagtaniman sa kapidbahay mo (Do not detest [hate] your neighbor so).

IX. The asking for such articles of food, etc., as are generally exchanged among neighbors for cooking and household work is expressed by maki, with the root denoting what may be asked for. A small quantity is always understood. The cause is expressed with i and the person asked by an, should the definite be used. In is used only in combination with magpa (pa). Ex.:

To ask for a little wine.

To ask for a few coals (fire). To ask for a little salt. To ask for a little rice. Makiálak (from álak). This word is from the Arabic araq, from araqa, "to sweat; perspire." It is found in English as arrack.

Makiapny.
Makiasín. (See index: asín.)
Makibigás. Nakikibigás akó sana sa

inyô, pô (I would ask you for a little rice, sir). Sino ang ipinakikibigás mo? (Who are you asking it for?) Aking ipinakikibigás ang ina kong may sakit (I am asking for the rice for my mother, who is ill). Palá! (Is that so!)

X. With roots verbalized into actions, maki denotes asking that the action expressed by the root be done for the subject. Ex.:

To ask another to reach something. To thank for.

Makiábut. (See index: ábut.
Makihiñjí (from humiñjí; to request;
see index: hiñjí).

XI. With nouns denoting partition maki signifies to ask for what may be denoted by the root; and with ordinal numbers, in using which the initial letter i is dropped, maki signifies to ask for the part designated by the ordinal used. Ex.:

To ask for an inheritance.

To ask for a part or piece of anything (as bread).

Makimana (see index: mana).
Makipisang. Magpisang; to break
up and divide a cracker or bread.
Magpisang kilá (let us break it up
and divide it).

To ask for a fifth, tenth, etc. Makikalima; makikapuo.

XII. With roots denoting work which may be joined in by more than one, maki sometimes expresses the idea of asking to join in such work. Ex.: $Si\ Juan\ aynakikatūbig\ sa\ ākin\ (Juan\ asked\ me\ to\ help\ him\ in\ getting\ some\ water)$. The particle ka, expressing companionship, is prefixed to the root.

XIII. Some roots commencing with b, p, s, and t change with maki in a similar manner as with man, when used in the signification of "to ask, request," etc. Ex.:

To ask for news.

Makimalità (from balità; see index: balitá)

To ask for a passage (as on a vessel).

Makinakay (from sakay).

XIV. With roots signifying nationality, race, state, condition, occution, profession, etc., maki is sometimes used to signify that one acts bears himself like, or resembles what is denoted by the root. This is however, is generally otherwise expressed, as some roots used thus are clear unless fully explained by the context.

XV. With ma, maki has a neuter meaning similar to that borne by alone. Ex.:

To appear like a noble (casually).

To act like or resemble an American. To act like or resemble a Spaniard. To act like or resemble a Tagalog.

To act like or resemble a person.

To act like a woman,

To act like a man; to run after men.

To act like a beast,

To conform to in customs.

Napakimahal. Napakikimahal ble [has become so casually]).

Makiamericano. Makicastila.

Nakikitagálog ito. ng Makitagálog. táuo sa pañgungúsap (This maresembles a Tagalog in his mar ner of speaking). akitáno. Nakikitáno ang amó (uretr

goy) (The monkey acts like a pe erson). Nakibabaye si Jua Makibabaye.

(Juan acted like a woman). The also means to run after women.

Makilalaki. Nakilalaki itong baba-yeng itó (This woman acted like = man).

Makihayop. Nakihayop itong bino it - ito (This man acted like a beast).

THE INDEFINITE PARTICLE "MAGKA."

I. Magka, the ninth particle of the Spanish writers upon Tagalog, may be analyzed into may and ka, one of the definites of ma. This particle generally expresses the idea of having (or being) what was not had or posor state, while man refers more to the action by which a state or condition is brought about tion is brought about.

The second syllable of the particle is reduplicated for the present and future tenses, while m changes to n for the past and present, following the usual rule. There are a few exceptions, the first syllable of the root being

reduplicated in some words. (See tables: útang.)

I definite expresses the cause or reason of the action, while an stands for either place or person, according to the nature of the action. (See tables: útang.)

Some very correct and widely used expressions are made by using an with magka. Ex.:

To look much at things; to inspect closely.

To amuse one's self.

Umaninao. Wald akong súkat pagkakaaninauan (There will be no place where I will be able to look at it [inspect it; study it out]).

Magkalibang. Wald silang pinagkalibangan (There was no place where they could amuse themselves). Malilibang, to be amused; diverted.

(See index: pisan; tipon.)

ie roots conjugated in the foregoing signification with magka are:

Magkaanak. ve children. Magkabait. ssess prudence. ve crocodiles again (as a river). Magkabuaya. Nagkakabuaya na itong ilog (This river is infested with crocodiles again). Magkabunga. Nagkabunga na itong káhoy na itôf (Has this tree borne fruit already?) Hindi pa nagkaladen with fruit. bunga (As yet it has not borne fruit). ve (there). Magkaroón. (See index: doon.) agkaisip. Nagkakaisip na itong batang itôf (Has this child reason yet? [i. e., has it yet arrived at the ve reason. Magkaisip. age of reason]). lucky; to have luck. Magkapalad. Magkapálay. verice again (also to have much). ; to sin. Magkasala. Magkakasala. Magkasalapî. ve money again. agkasakit. Ang ipagkasakit, the cause of illness. And ang ipinagill. Magkasakit. kasakit mof (What made you ill?) Pasaktán, to be pained. Ang papagkasaktín, one ill from his own fault, also a sick person. Magkanyd. Wald po, hindi nagkakave enough. siya sa kaniyang pagkabúhay (No, sir; he does not get enough to live on). ve gray hair. Magkaúban. e a debt. Magkaútang. (See tables: útang.)

The casual, accidental, or chance assemblage of many people or , even though immaterial, is sometimes expressed by magka. The le denotes a plurality of subjects in such cases, as opposed to a pluralacts, as expressed by some other particles. Ex.:

arrel (as two or more).

equal; to coincide; to accord.

eet casually; to gather (as a bong.)

emble casually (as a crowd.)

eet casually (as a crowd.)

ext casually (as a crowd.)

Magkasama. (See index: sama.)

Magkatipon. (See index: tipon.)

Magka also indicates universality or plurality of subjects suffering or affected in some way by what is denoted by the root. Ex.:

fer from a typhoon.

Magkabagyó.

fer from an epidemic of small
ffer from a famine (also for Magkagútum.

ny to be hungry).

fer from a conflagration.
joy a holiday.
ve a riot or tumult.

squeezed or pressed in a crowd.

Magkadud.
Magkaguló.
Magkadagón.

IV. Another use of magka is to express an unintentional or casual erro in what may be noted by the root. The imperative is made with major baka (q. v.). Ex.:

To say one thing accidentally for another.

To err in counting. To equivocate accidentally. Magkaibá. Nagkaibá siyá (He sc: dentally said one thing for st other).

other). Magkalimang. Magkamali. Nagkamali aki

equivocated accidentally Houag mong akalaing abo'y no kakamali (Don't you think I ma any mistake).

V. Magka is also used to express self-deception by the sight, hearing, et the definite past tense with an suffixed being taken as the root. For the present tense the first syllable of the root is reduplicated and not the second syllable of the particle. Ex.:

To be deceived by the hearing.

Magkaringan. Nagkariringan (My hearing deceives me). (index: dingig.) Magkakità. (See index: kità.)

To be deceived by the sight.

VI. A further use of magka is with the um infinitive of some ver roots and some adverbs of place, with which infinitives magka expres the idea of making the said movement or going to or from the place in cated by the adverb for some particular reason or cause. Ex.:

To follow (or obey) for a particular Magkasumunod (from sunod).

to follow wherever another

VIII. (a) Magin is also used in combination with the interrogative adverbs ilán? (how many?) and magkano? (how much?) and with the answers thereto. (b) With magin prefixed to a number and na following it the completion of the period named is denoted. Magin expresses the idea of "about" in these cases. Ex.: (a) Magiginilán silá? (about how many will there be?) Magiginilán ang paroroon? (about how many will go there?) Magiginilalawang puo (about twenty). Magigininagkano iiii (How much will this be worth?) (b) Kung maginisang buán na (After about a month). Nang maginilang árao (after a few days). Kung maginsangtaón na (after about a year).

IX. Magin may be used sometimes in the sense of "be it" of "cither"—"or." Ex.: Maginitó; maginiyán (be it this or be it that). Maginlalaki siyá; maginbabaye (be it man or be it woman). Maginngayón; maginbakas ay paroroon akó (cither to-day or to-morrow I will

have to go there).

THE INDEFINITE PARTICLE "MAGSI."

I. This particle, which changes initial m to n for the indefinite past at present, reduplicates the last syllable of the particle for the present at future tenses. It has all three definites, and may be combined with so other particles, which are placed between it and the root, except make at ma definite in the sense of power, which precede it. (See tables: all gawa; tapon, and kuha.) It has no other signification than to denote plurality or universality of subjects in connection with the verbal action. Naturally there is no singular number. Nyá may be inserted after the first two letters of the particle to indicate an extreme degree of plurality. See tables: pagáral. Ex.:

To teach (many).

Magsiáral. Magsipagáral, to stud (many). Ang mangá batà dito

bayan ito'y magsisipagáral na lahat (all the children here in this town are studying). Ang mangá bata nitong escuelahan nangagsisi pagáral (all the children in this school are learning [or studying]). Magsipañgáral, to preach (many). Mañgágsipañgáral, to preach (by a great number). Magnatiuno. To sit down suddenly

THE INDEFINITE PARTICLE "MANHI."

icle beside the change from m to n for the past and present uplicates the second syllable (hi) of the particle for the present uses. This particle is used to express verbs of searching for those expressing the idea of removing dirt, etc., from the and for miscellaneous ideas which will be better seen from Certain letters beginning roots are modified by manhi, the are by man. The definites with i and panhi, in the sense of

cause, with an and either panhi or hi in the sense of place, and with a and either panhi or hi for ordinary definite sentences exist. (See tables: matay; malay; tingo.)

II. A reciprocal form of many of the verbs conjugated with manhi may be formed with an suffixed or with maghi in place of manhi, retaining on as

a suffix, however. Ex.:

To search for carefully; to glean.

Manhimálay (from pálay, "unhusked rice"). Panhimalnyin (himalayin) mo ang iyong bahawin (look for [glean] what you have to eat). Ang gulum ay ang ipinanhihimálay niyd (hunger is the cause of his gleaning). Ang bábá ni Juan ay ang pinanhimalayan niya (he was gleaning [he gleaned] in the field of Juan).

Manhimuti (from puti, "idea of whiteness'').

Manhinayang (from sayang). Manhinakay (from sakay, "bost, vessel'').

Manhinápang (from tápang).

THE INDEFINITE PARTICLE "MAGSA."

isual, this particle has the past and present indefinite take n in m, while the second syllable (sa) of the particle is reduplicated for ent and future tenses. All three definites exist. See tables; insik. ification of this particle is imitation, adoption or following the dress, or language of another people. It is little used, maki being Ex.: stomary.

v American customs. Magsaamericano. Magsabikol. v Bicol customs. v Visayan customs. Magsabisaya. Magsacastila. v Spanish customs. v Ilocano customs. Magsailoko. v Moro customs. Magsakamorosan.

v Tagalog customs. Magsatagálog. Ang sinasatagálog, what followed or imitated, etc.; Ang ipagsatagálog, the reason or cause of such adoption. Pag is dropped with in.

igea; isa; as in the expressions magsaárao ka nang damit; put the i the sun: isahanığın mo itong bard; hang this shirt in the wind, etc., from this particle but from sa, the preposition "in," conjugated 7 and i respectively.

he signification of magsa may be expressed by other particles i, among them being magka and ma with an suffixed. Ex.: Si nagkakastilaán (Juan is very Spanish in his ways [speech, etc.]). logan siyá (He is very Tagalog in his ways). By doubling the root, llabic one, or the first two syllables thereof if longer, a diminuning is imparted. Ex.: Natatagatagalogan siyá (He is somewhat in his ways).

THE INDEFINITE PARTICLE "MAGKAPA."

This particle changes initial m to n for the past and present indefinite, and reduplicates the last syllable (pa) of the particle for the present and future tenses. The sole use of the particle is to express, prefixed to roots denoting positions of the body or motions of the parts thereof, the involuntary remaining in such position, etc., as the result of fright, surprise, or other violent emotion. The definites with i, to express the cause, and with an, to express place, exist. (See tables: málat.) Ex.:

To remain with staring eyes.

Magkapadilat. Dumilat, to open the eyes. Madilat, to be open (as the eyes). Syn., magkapamilat, to remain with the eyes open. Ang ipagkapamilat, the cause of remaining with staring eyes. Ang pagkapamilatan, the place of remaining thus.

To be left with the mouth open; to stand with open mouth. To stand showing the teeth (as an animal, etc. Magkapangangá, from ngangá. Ngmangá, to open the mouth.

Magkapangisi (from ngisi).

THE INDEFINITE PARTICLE "MAGKAN."

I. This particle takes n in the past and present indefinite in place of m_i and has the peculiarity of reduplicating the *initial* syllable of all roote conjugated by it. For the present and future tenses the second syllable (kn) of the particle is reduplicated in a similar manner to the reduplication of the gi of magin. (See tables: $luh\dot{n}$.) Magkan signifies primarily the involuntary flowing out of the secretions of the body, and has the definites of i for the cause and an for the place. In a metaphorical sense magkan is also used to express involuntary emotions, actions, etc., as will be seen by the examples:

To bleed.

To sweat from fear or illness. To slaver; to drool.

To weep or shed tears unconsciously (as from a wood fire). To blush.

To undress or lose the clothes (involuntarily).

To overflow; to exceed.

To drop off.

To be stunned by a blow.

Magkandudugó (from dugó, "blood"). Magkanpapáwis (from páwis). Magkandudáway (from láway, "saliva"). Magkanduluhà (from luhà, "tesr").

Magkanhihiya (from hiya). Kahi-yahiya, a shameful thing.
Magkanhohobò. Nagkakanhohobò si Juan is shaking his clothes off with laughter).
Magkanlalabis. Linabisan mo ang utos ko sa iyo (You exceeded my orders to you).
Magkanlalaglag.
Magkanlataua.
Magkantitilap.

COMBINATIONS OF PARTICLES.

The combining of various particles is called "transcendency" by the writers upon Tagalog, and may be said to have the following characterities: With two exceptions, double or triple combinations of particles prefixed to a root demand that the one immediately before the root take the definite form. (See tables, áuat; álok.)

the definite form. (See tables, áuat; álak.)

First exception. Some roots conjugated by mag and magka admit um. (See tables, pilit; dali; sunod.)

exception. The particle maka precedes other particles, a prop-possessed by magsi, except when in combination with maka, es before magsi in such cases. (See tables, larò; gawd; húlog; It must further be borne in mind that roots which are primarily ed by mag retain pag as a prefix invariably, as do also those roots in meaning with um and mag.

THE DESIGNATION OF PARTICLES.

avenience of reference to the Spanish works and also to the work poldt, the numbers given by the early writers to the various modifying roots are of use. They are:

The following examples, taken from the Tagalog edition of the Renacimiento, a paper of Manila, will give an idea of ordinary Tagalog composition as applied to modern conditions, and the use of foreign words in connection therewith:

I. Singapore, ika 12 (dalawá) ng (nang) Abril (1905). Ang paraan ni Rodjestvensky ay makaráting siya sa cabo (longos) Padaran na nasa baybayin ng Indo-China, at 150 milla ang agwat sa Saigon. Doon nga magpipisan ang nagkahiwalay na hákbong-dagat ng mgá (mangá) ruso, kun sakáling silá'y

Hindi sila naharang, sapagka't ang mga japon marahil ay nasa malapit sa Formosa na doon nila ibig makilaban.

Maráhil ang Bataria ang susunod na daraungan ng mgá ruso, sapagka't doo'y may cableng âbut hángang Rusia.

[Translation.]

Singapore, 12th of April. The plan of Rodjestvensky is to try to (arrive at) make Cape Padaran, on the coast of Indo-China, and 150 miles distant from Saigon. There the separated fleets (sea armies) of the Russians will unite, if the two are not encountered by the Japanese.

One division of the fleet commanded by Rodjestvensky is now off the

coast of Muntok a few miles from Sumatra.

The other vessels are yet in the region of Banka. The other vessels of this (fleet) are remaining in the route (or neighborhood) of Malacca.

They were not molested, because the Japanese continued to remain near

Formosa, where they wish to commence the struggle.

Russian vessels continue to follow each other into Batavia, because there is a cable connecting with Russia there.

[Translation.]

Newchwang, 7th of April. The 500,000 men composing the army of Oyama are advancing in good order upon the army of Linevitch now intrenched at Kirin.

The plan of advance of the Japanese is good (excellent) and the length of their front (ground) is 40 or 50 miles. Oyama is trying to push the Russians gradually until he can vanquish them all (unitedly).

The army under the charge of General Linevitch does not number more than 200,000, especially because besides the many who have been killed in battle there are many also who have been captured by the Japanese.

III. San Petersburgo, ika 6 ñg Abril. Ang mgá japon ay nakasusulong na unti-unti sa dakong kinalalagyán ni general Linevitch at ng kaniyang hukbo. Isang árao pa't ang Harbin ay hindi na marahil matatahanan ng mgá ruso, sapagka't pinagiisipang gibain ng kadway. Hindi na pinangangatawanan ng

Marami sa Rusia ang naniniwald na madadaig ang hukbo ni general Linevich, kung magkagayón ay magkakaroon ng kapayapaan.

[Translation.]

St. Petersburg, 6th of April. The Japanese are advancing little by little pon the position of General Linevitch and his army. One day more, and Liarbin may possibly not be remaining to the Russians, because they think t may be destroyed by the enemy. The Russians are making no efforts to strengthen themselves in Harbin, because they believe themselves to be in great danger of capture there. The place of retreat for the Russians Vladivostok, which they hope to fortify so well as to hold it until peace. The situation of the Russian armies is bad, but it can not be bettered on account of the riots taking place in Russia. Many in Russia believe that the army of General Linevitch will be defeated, and that in that event there will be peace.

II. For names of animals, birds, fishes, and invertebrates not given in is work the student is referred to Jordana's Bosquejo Geográfico é Hisrico Natural del Archipiélago Filipino, Madrid, 1885; to the work of Friar usto de Elera, Dominican, entitled Catálogo Sistemático de Toda la Fuuna Filipinas, Manila, 1895; and to the book of Montero y Vidal, El Archiflago Filipino y las islas Marianas, Carolinas y Palaos, Madrid, 1886. For e fauna the great work of Friar Blanco, Augustine, will be of great aid, well as the reports of the forestry and agricultural bureaus at Manila. Work of Father Delgado, S. J., Manila, 1892, deserves attention as itsed and annotated. ised and annotated.

In conclusion, it is hoped that a careful study of the language under dission will lead the student to explore for himself, and note the localisms I changes in each province. Any suggestions, corrections, or criticisms I be welcomed by the author.
